Dominium Integrated Project Book v2 - Source Evidence Map

Version: 2

Authority Class: advisory_synthesis

Source Root: docs/

Conversation Corpus Root: docs/archive/conversations/

Promotion Status: not_promoted

Canon impact: unchanged

Contract/schema impact: unchanged

Implementation impact: unchanged

Release impact: unchanged

Queue impact: unchanged

This companion explains how evidence cards were used. It is a review map, not the main book and not canon.

1.1 Evidence Summary

- **fact:** 271
- **design_goal:** 122
- **specification:** 2405
- **decision:** 1635
- **prohibition:** 136
- **prerequisite:** 107
- **constraint:** 411
- **contradiction:** 40
- **unresolved_question:** 66
- **risk:** 63
- **change_of_direction:** 68

- **second_order_effect:** 10
- **third_order_effect:** 114
- **source_context:** 0

1.2 1. What Dominium Is

Dominium is the official game and domain layer built on Domino's deterministic substrate; it is also a governed product environment rather than a single renderer-owned executable.

- **EVC-00698 decision:** The user then redirected the entire plan. They argued that native OS widget GUI tools already exist through Visual Studio, Xcode, etc. The project needed a cross-platform rendered tool environment that uses the same CLI, TUI, and rendered GUI systems as... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00139 decision:** This chat was a long architecture/specification-generation session for the Dominium Game project. It focused on turning a broad v3 game architecture into concrete, file-by-file 'txt' implementation specs for Codex automation. The user decided that Codex... `_Source:_ docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00243 decision:** See DECISION-01 through DECISION-13. Strongest user-stated decisions: science-bounded procedural planets, robotic mothership premise, robot bodies, nanobot construction, automation over worker NPCs, mothership-limited fabrication, machine process... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md`.
- **EVC-00259 decision:** A later assistant response refined the architecture around three roles: Domino as deterministic simulation, Unreal as renderer/client/tooling, and Dominium as game rules. It also drew a feasibility boundary: millions of users can exist across a logical... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_detailed_summary_and_report.md`.
- **EVC-00267 decision:** The first major conclusion was architectural. The assistant recommended that Dominium should not be built as one giant live Unreal scene. Instead, **Domino should be a deterministic simulation/data engine**, and Unreal or another graphics engine should... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00295 decision:** Future chats might incorrectly treat every brainstorm item as a final decision, especially assistant recommendations. They might over-focus on Unreal and ignore Domino's need for deterministic data/simulation. They might reintroduce worker NPC labour... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__01_human_readable_report.md`.
- **EVC-00363 decision:** A recurring theme was urgency. The user repeatedly expressed that the directory and root-structure cleanup had taken too long, and at points threatened to manually drag/drop folders if the assistant and Codex process failed to produce real progress. That... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md`.
- **EVC-00379 decision:** This chat developed a framework/provider strategy for Dominium. The user wanted to accelerate development with open-source code while preserving portability, modularity, extensibility, determinism, and future replaceability. The final architecture is... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.

- **EVC-00381 decision:** See Decision Register. Most important: framework/provider architecture, raylib as first provider suite, service-first layout, profiles for provider selection, Lua/SDL2 as first-wave providers, and sparse deterministic delegated simulation as design doctrine. `_Source: docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00395 decision:** This chat was a design-decision and architecture-baseline discussion for Dominium, focused on language standards, platform floors, binary architecture, portability strategy, and the project's long-term modular structure. The user began by asking whether... `_Source: docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md`.
- **EVC-00505 decision:** This chat was a detailed architecture and refactor planning session for the Dominium + Domino project. The central result is a stable separation between **Domino**, the deterministic engine under 'source/domino', and **Dominium**, the product suite under... `_Source: docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00588 decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md`.
- **EVC-00599 decision:** Main decision candidates: custom deterministic core; Unreal as frontend only; server-authoritative MMO state; sparse procedural planets; single universe via partitioning; Domino as future adapter. `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__06_reader_brief.md`.
- **EVC-00605 decision:** The chat concluded that Dominium's requirements exceed what UE5, UE6, Domino, or any single commercial engine can provide out of the box. The game should be architected as a custom deterministic simulation and persistent world backend, with Unreal as a... `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00708 decision:** The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The user's question directly made arbitrary placement a major topic. [INFERENCE]... `_Source: docs/archive/conversations/_reader/by_chat/advanced_simulation_infrastructure.md`.
- **EVC-00716 decision:** The idea is attractive because it supports broad distribution and long-term extensibility. But it is not a final decision. Dynamic plugins introduce ABI, packaging, security, and platform restrictions. Static registration may be simpler. A hybrid may be... `_Source: docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md`.
- **EVC-00738 decision:** This chat was a strategic architecture and design convergence session for Dominium/Domino. It began from a transferred knowledge base about rebuilding Dominium's GUI and binary strategy, then evolved into a broad platform-specification discussion... `_Source: docs/archive/conversations/_reader/by_chat/architecture_ui_providers.md`.
- **EVC-00762 decision:** A central design theme emerged: not everything should be simulated at the same fidelity. The Sol system should be represented in great detail because the user explicitly said most playtime will happen there. The Milky Way should have a backbone of real... `_Source: docs/archive/conversations/_reader/by_chat/chronology_celestial_systems.md`.
- **EVC-00806 decision:** The prior assistant summarized these files as containing two different launcher concepts: an engine-rendered launcher view and a native Win32 launcher. It also claimed the CMake file built the Win32 source for non-Windows targets. However, this report... `_Source: docs/archive/conversations/_reader/by_chat/dominium_architecture_iii.md`.

- **EVC-00812 decision:** A central decision was to separate the project into two conceptual layers. **Domino** is the reusable engine layer: platform abstraction, renderer abstraction, audio, UI, core services, package/instance management, simulation control, events, plugins... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iv.md`.
- **EVC-00898 decision:** This chat was a design-decision and architecture-baseline discussion for Dominium, focused on language standards, platform floors, binary architecture, portability strategy, and the project's long-term modular structure. The user began by asking whether... `_Source:_ docs/archive/conversations/_reader/by_chat/language_platform_architecture.md`.
- **EVC-00916 decision:** A major early conclusion was that Dominium should use **one codebase but multiple binaries**. The assistant proposed, and the user continued from, the idea that setup, launcher, and game should be separate executables rather than one monolithic... `_Source:_ docs/archive/conversations/_reader/by_chat/launcher_setup_architecture.md`.
- **EVC-01018 decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01020 decision:** The assistant recommended against starting directly on UE6 because public technical access and production documentation were not treated as available in the visible chat. This was not framed as a permanent rejection of UE6. It was a timing decision: do... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01118 decision:** Module/plugin/framegraph/support-tier ideas are proposals, not accepted final decisions. `_Source:_ docs/archive/conversations/app_runtime_platform_renderers/dominium_app0_runtime_platform_renderers__05_reader_brief.md`.
- **EVC-01145 decision:** The final UI/UX synthesis connects directly to that premise. The interface should feel like a robot operating system. The player boots into an OS, connects to a universe, downloads consciousness into a fabricated robot body, and disconnects into... `_Source:_ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__01_human_readable_report.md`.
- **EVC-01291 decision:** Limitations in plain language: this report reconstructs the conversation from the visible transcript and from repository files that were fetched during the chat. It does not prove that the local commands the user reported were actually run, because those... `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__01_human_readable_report.md`.
- **EVC-01309 decision:** Read '01_human_readable_report.md' first for context. Use '04_registers.md' for structured tasks and decisions. Use '05_aggregator_packet.md' for merging with other old-chat reports. Use '03_spec_sheet.yaml' for machine-assisted aggregation. `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__09_in_chat_reader.md`.
- **EVC-01311 decision:** Which ideas are final decisions and which are recommendations? `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__09_in_chat_reader.md`.
- **EVC-01322 decision:** 1. Do not say the playable game engine is finished. 2. Do not skip Milestone 0. 3. Do not treat CAD/destruction/MMO/universe architecture as near-term implementation scope. 4. Do not treat assistant recommendations as final user decisions. 5. Do not... `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__10_companion_detailed_summary_report.md`.
- **EVC-01325 decision:** The second and current main thread was GUI and binary planning. The user decided to redo GUIs from scratch. Every product should always work through CLI, is expected to work through

TUI, and may have multiple modular GUIs attached to product backends to... [_Source: __ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md](#).

- **EVC-01373 decision:** This chat was about platform support planning for Dominium. It started with broad questions about what systems and operating systems Dominium could support, then expanded into a large device-family inventory covering PlayStation, Xbox, Nintendo, PC... [_Source: __ docs/archive/conversations/platform_support/dominium_platform_support_planning__05_reader_brief.md](#).
- **EVC-00007 specification:** express behavior composition through profiles, bundles, law surfaces, and explicit constraints [_Source: __ AGENTS.md](#).
- **EVC-00015 specification:** The project is about invention, production, logistics, economics, settlement, trust, communication, and institutional power emerging from lawful simulation rather than scripted outcomes. Commands, processes, packs, capabilities, diagnostics, evidence... [_Source: __ README.md](#).
- **EVC-00017 specification:** Dominium is the official game, product, and domain layer on top of Domino. It defines rules, process meaning, law targets, domain interpretation, authored content use, and product composition. [_Source: __ README.md](#).
- **EVC-00023 specification:** The active portability floor includes Windows 7 SP1, macOS 10.9.5, and Linux. C++17 language mode is allowed, but public ABI surfaces do not expose C++ classes, STL types, exceptions, RTTI, allocator objects, or compiler object layout. [_Source: __ README.md](#).
- **EVC-00024 specification:** Fast strict is the normal development gate. Extended, release, and full proof tiers are separate gates defined by 'contracts/testing/test_tiers.contract.toml'. A green fast strict result does not claim full certification. [_Source: __ README.md](#).
- **EVC-00025 specification:** When behavior or compatibility meaning changes, update the relevant contract surface and proof in the same task. [_Source: __ README.md](#).
- **EVC-00026 specification:** Content is authored data, not runtime law. Packs and registries describe optional content, capabilities, compatibility, activation, and distribution surfaces. Missing optional content must degrade or refuse explicitly. [_Source: __ README.md](#).
- **EVC-00078 specification:** Dominium/Domino is a deterministic world runtime and law-governed simulation OS. [_Source: __ docs/architecture/WHAT_THIS_IS.md](#).
- **EVC-01432 specification:** Runtime behavior MUST resolve from profile data ('ExperienceProfile', 'LawProfile', 'ParameterBundle', optional 'MissionSpec' constraints). [_Source: __ docs/canon/constitution_v1.md](#).
- **EVC-01438 specification:** All runtime-impacting schemas MUST declare 'schema_id', 'schema_version', and 'stability'. [_Source: __ docs/canon/constitution_v1.md](#).
- **EVC-01446 specification:** Deprecated terms must not be introduced in new runtime logic. [_Source: __ docs/canon/glossary_v1.md](#).
- **EVC-01066 specification:** Domino is the reusable deterministic substrate: execution ordering, storage, replay, ABI-facing boundaries, and engine mechanisms. Archived conversations consistently treat Domino as reusable infrastructure rather than a one-off game binary. [_Source: __ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md](#).
- **EVC-01077 specification:** 'ui' (45 conversations): presentation, tools, editor concepts, perceived model surfaces, and command/result display. Sources: [Dominium Advanced Simulation and Infrastructure Architecture](#) [../_reader/by_chat/advanced_simulation_infrastructure.md...](#) [_Source: __ docs/archive/conversations/_synthesis/FULL_PROJECT_PICTURE_v0.md](#).
- **EVC-00134 specification:** The user also specified world start and UI rules: default date anchor is Gregorian January 1, 2000 AD, but the player spawns at local sunrise. At game start the player has no clock, calendar, date, or time HUD. Time/date knowledge is diegetic and must... [_Source: __ docs/archive/conversations/Chronology_Celestial_Systems/Dominium_Chronology_Celestial_Systems__05_reader_brief.md](#).

- **EVC-00157 specification:** The view system requirements expanded to include instant seamless zoom, instant switching between top-down 2D and first-person 3D, vector/graphics modes per view, and arbitrary cameras for free cam, map views, HUD cameras, CCTV, overlays, windows, and... `_Source:_ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md`.
- **EVC-00163 specification:** This chat defined and refined the architecture and implementation roadmap for the Dominium game and the reusable Domino engine. It moved from earlier platform/render/launcher/setup/game planning into a more rigorous ABIs-first roadmap. The current plan... `_Source:_ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md`.
- **EVC-00291 specification:** The user then gave a long spoken brainstorm that shifted the discussion from pure architecture into a more concrete game premise. The game became a **robotic seed-civilisation** game: humanity sent a robotic mothership to another solar system; the ship... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__01_human_readable_report.md`.
- **EVC-00439 specification:** This package preserves the current chat about Dominium modularity, future-proof structure, AIDE refactorability, and reusable engine architecture. It contains a human-readable report, structured registers, future-chat handoff, YAML spec sheet, aggregator... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.
- **EVC-00441 specification:** The chat's core contribution is that Dominium needs stable ownership roots, AIDE-driven refactor mechanics, and strict separation of reusable engine/runtime/contracts from Dominium-specific game rules. The main next action is to verify live repo state... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.
- **EVC-00604 specification:** This package preserves the visible chat about Dominium's engine/runtime strategy. It explains why Unreal/UE6 should not be treated as the whole game, why a custom deterministic core is required, how Domino portability can be preserved, and what work... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00606 specification:** Client compute must not commit persistent MMO outcomes. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00675 specification:** The final user-confirmed world model uses a toroidal horizontal SurfaceGrid of 2^{24} metres per axis, one vertical Page of 4096 metres, 16 metre cubic chunks, runtime Q16.16 coordinates with 8-bit Segment addressing, and Q4.12 chunk-local save... `_Source:_ docs/archive/conversations/World_Architecture/Dominium_World_Architecture__05_reader_brief.md`.
- **EVC-00715 specification:** The discussion then moved into what APP0 really needs to accomplish. The user clarified that the long-term macro-prompt plan should not merely produce documentation or empty stubs. At the end of that plan, the project should have a **running executable**... `_Source:_ docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md`.
- **EVC-00750 specification:** The user wanted reusable code for different games on the Domino engine and possibly unrelated future engine/game projects. The answer was to freeze contracts rather than implementations. Stable ABI/API/data/protocol surfaces should be explicitly... `_Source:_ docs/archive/conversations/_reader/by_chat/build_and_future_proofing.md`.
- **EVC-00811 specification:** The user's underlying goal was to build **Dominium** as more than a single game executable. The desired result is an extensible ecosystem with a reusable engine, a launcher, setup tools, editors, mod/pack SDKs, game creation tools, and a game that can... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iv.md`.

- **EVC-00914 specification:** This chat was about designing the **Dominium launcher, setup system, run-time integration model, and surrounding user-facing infrastructure**. It began from a broad architectural philosophy for the Dominium project: keep the simulation core deterministic... `_Source:_ docs/archive/conversations/_reader/by_chat/launcher_setup_architecture.md`.
- **EVC-01026 specification:** This chat was about designing a long-term UI authoring system for the **Dominium / Domino** project. The immediate practical problem was that the current Windows launcher UI "looks mangled and flickers." The broader goal was much larger: create an... `_Source:_ docs/archive/conversations/_reader/by_chat/ui_editor_tool_editor_planning.md`.
- **EVC-01106 specification:** [FACT] This chat developed architecture for the Dominium/Domino deterministic engine, beginning with advanced simulation systems and expanding into gameplay layering, infrastructure construction, arbitrary placement, corridors/splines... `_Source:_ docs/archive/conversations/advanced_simulation_infrastructure/dominium_advanced_simulation_infrastructure_architecture__05_reader_brief.md`.

1.3 2. Why Dominium Exists

The project exists to make invention, production, logistics, economics, settlement, trust, communication, and institutions emerge from lawful simulation.

- **EVC-00135 decision:** DECISION-06: Calendars are pure renderers and never affect physics. [FACT] `_Source:_ docs/archive/conversations/Chronology_Celestial_Systems/Dominium_Chronology_Celestial_Systems__05_reader_brief.md`.
- **EVC-00243 decision:** See DECISION-01 through DECISION-13. Strongest user-stated decisions: science-bounded procedural planets, robotic mothership premise, robot bodies, nanobot construction, automation over worker NPCs, mothership-limited fabrication, machine process... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md`.
- **EVC-00259 decision:** A later assistant response refined the architecture around three roles: Domino as deterministic simulation, Unreal as renderer/client/tooling, and Dominium as game rules. It also drew a feasibility boundary: millions of users can exist across a logical... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_detailed_summary_and_report.md`.
- **EVC-00267 decision:** The first major conclusion was architectural. The assistant recommended that Dominium should not be built as one giant live Unreal scene. Instead, **Domino should be a deterministic simulation/data engine**, and Unreal or another graphics engine should... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00274 decision:** The key technical conclusion was that the world cannot be treated as a normal game-engine level full of live actors. The world must be a deterministic simulation and data system first. Domino should store the true universe as seeds, rules, fields, sparse... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md`.
- **EVC-00282 decision:** This report should be read as a summary of the whole visible conversation, not as a final design specification. Some items were clearly stated by the user and are marked as FACT. Some were assistant-proposed architecture or design synthesis and are... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md`.

- **EVC-00558 decision:** The conversation then moved from the general 2038 problem into representation design. The user clarified that they did not need millions of years of date support, only roughly 10,000 years into the future and past. This turned the problem into a... `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__01_human_readable_report.md`.
- **EVC-00576 decision:** Which repo files supported the Dominium conclusion? `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md`.
- **EVC-00584 decision:** The answer distinguished system width from time representation. The important conclusion was that 2038 is caused by signed 32-bit time counters reaching their maximum representable value. The risk appears where signed 32-bit Unix-style timestamps are... `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__10_accompanying_detailed_summary_report.md`.
- **EVC-00599 decision:** Main decision candidates: custom deterministic core; Unreal as frontend only; server-authoritative MMO state; sparse procedural planets; single universe via partitioning; Domino as future adapter. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__06_reader_brief.md`.
- **EVC-00605 decision:** The chat concluded that Dominium's requirements exceed what UE5, UE6, Domino, or any single commercial engine can provide out of the box. The game should be architected as a custom deterministic simulation and persistent world backend, with Unreal as a... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00762 decision:** A central design theme emerged: not everything should be simulated at the same fidelity. The Sol system should be represented in great detail because the user explicitly said most playtime will happen there. The Milky Way should have a backbone of real... `_Source:_ docs/archive/conversations/_reader/by_chat/chronology_celestial_systems.md`.
- **EVC-00891 decision:** An assistant initially rewrote that prompt into a cleaner Codex-ready form. The user then corrected the process: **before generating prompts, the group needed to discuss the design**. That changed the status of the rewritten prompt. It became a useful... `_Source:_ docs/archive/conversations/_reader/by_chat/gui_binary_content.md`.
- **EVC-00933 decision:** The final strategic direction before this preservation request was to run a ?-series: snapshot intake, reality extraction, blueprint reconciliation, foundation readiness, and final prompt synthesis. This is needed because plans must now be mapped onto... `_Source:_ docs/archive/conversations/_reader/by_chat/omega_xi_pi_architecture_future.md`.
- **EVC-01011 decision:** The conversation then moved from the general 2038 problem into representation design. The user clarified that they did not need millions of years of date support, only roughly 10,000 years into the future and past. This turned the problem into a... `_Source:_ docs/archive/conversations/_reader/by_chat/timekeeping_and_2038_resilience.md`.
- **EVC-01050 decision:** The future relevance of this chat is high. It should feed directly into the future project spec book and into a corrected implementation prompt. But it should not be treated as final implementation detail everywhere. Many high-level decisions are... `_Source:_ docs/archive/conversations/_reader/by_chat/world_architecture.md`.
- **EVC-01145 decision:** The final UI/UX synthesis connects directly to that premise. The interface should feel like a robot operating system. The player boots into an OS, connects to a universe, downloads consciousness into a fabricated robot body, and disconnects into... `_Source:_ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__01_human_readable_report.md`.

- **EVC-01322 decision:** 1. Do not say the playable game engine is finished. 2. Do not skip Milestone 0. 3. Do not treat CAD/destruction/MMO/universe architecture as near-term implementation scope. 4. Do not treat assistant recommendations as final user decisions. 5. Do not... `_Source: docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__10_companion_detailed_summary_report.md`.
- **EVC-00007 specification:** express behavior composition through profiles, bundles, law surfaces, and explicit constraints `_Source: AGENTS.md`.

Its value is explanatory and evidentiary... `_Source: docs/archive/conversations/_reader/by_chat/launcher_app_layer.md`.
- **EVC-00971 specification:** The chat began with the user pasting what they called the latest README. That README already had a strong direction: deterministic C89 engine core, C++98 higher layers, fixed-point math, bit-identical simulation across platforms, sparse planetary-scale... `_Source: docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md`.
- **EVC-00972 specification:** The final README reflects that by saying all platforms build from the same unified source hierarchy. Platform-specific behavior is expressed through thin shims, compile-time flags, and capability tables. Ports cannot fork or override engine/runtime... `_Source: docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md`.
- **EVC-01049 specification:** This conversation matters as historical context for the topics tagged here: architecture, content, contracts_schema, determinism, governance, release, setup_launcher, simulation, timekeeping, tooling, ui, workbench, worldgen. Its value is explanatory and... `_Source: docs/archive/conversations/_reader/by_chat/world_architecture.md`.
- **EVC-01054 specification:** The user is building Dominion / Domino, a deterministic universe simulation/game project. The project doctrine throughout the chat emphasized determinism, replayability, process-only mutation, named RNG streams, law-governed authority, and a strict... `_Source: docs/archive/conversations/_reader/by_chat/xstack_lab_galaxy.md`.
- **EVC-01175 specification:** The seventh phase was raylib/SDL/Lua provider architecture. The user pasted or summarized advice about using raylib heavily. The chat accepted the accelerator strategy but rejected vendor-shaped structure. Raylib, rlgl, rlsw, raygui, raudio, SDL2, and... `_Source: docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__01_human_readable_report.md`.
- **EVC-01382 specification:** The most important change came from the user's direct requirement that ports should not be stored in a separate directory or system, should work within the same structure, and should degrade gracefully without flowing upstream. The final README now says... `_Source: docs/archive/conversations/readme_ports_determinism/dominium_readme_ports_determinism__05_reader_brief.md`.
- **EVC-01383 specification:** The chat also clarified determinism rules: no floats in '/engine' or engine-controlled formats; non-authoritative tools/renderers may use floats only if they never feed back; RNG streams advance only during deterministic tick phases; tick phases are... `_Source: docs/archive/conversations/readme_ports_determinism/dominium_readme_ports_determinism__05_reader_brief.md`.
- **EVC-01407 specification:** A later uploaded transcript records a 13-prompt run in a new chat that reportedly implemented a Lab Galaxy deterministic substrate: canonical docs/schemas, pack system, registry compile/lockfile/cache, modular tools/xstack runner, session boot... `_Source: docs/archive/conversations/xstack_lab_galaxy/dominium_xstack_lab_galaxy_handoff__05_reader_brief.md`.

- **EVC-00245 constraint:** Most important: official scope; realism bounds; field format; mothership limits; robot chassis; nanobot limits; machine compiler; city liveliness without NPCs; fog-of-war rules; client compute; Unreal role; first vertical slice. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md`.
- **EVC-00269 constraint:** The mothership solves several design problems at once. It explains why players have a HUD, blueprints, recipes, construction guidance, and advanced technical knowledge. Players do not need to reinvent CPUs, railway gauges, smelting, computing, or... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00560 constraint:** The main outcome is not that Dominium needs a conceptual rewrite. The outcome is that Dominium's existing model is directionally correct, but needs boundary hardening: audit all DSYS backend timers, freeze ACT units and serialization semantics, prevent... `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__01_human_readable_report.md`.
- **EVC-00589 constraint:** The user then escalated the technical scope substantially. They asked whether UE5, UE6, or any other engine could handle a deterministic full-scale real solar system with fully recreated procedural planets, player-built civilizations, terraforming... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md`.
- **EVC-01019 constraint:** The user then escalated the technical scope substantially. They asked whether UE5, UE6, or any other engine could handle a deterministic full-scale real solar system with fully recreated procedural planets, player-built civilizations, terraforming... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01046 constraint:** This chat was mainly about designing the foundational world architecture for **Dominium**, especially its spatial model, coordinate system, save format, terrain representation, environmental simulation model, deterministic core constraints, mod/content... `_Source:_ docs/archive/conversations/_reader/by_chat/world_architecture.md`.
- **EVC-01387 constraint:** CP/M-80/86 is tooling/limited frontends only, not complete world simulation. `_Source:_ docs/archive/conversations/readme_ports_determinism/dominium_readme_ports_determinism__05_reader_brief.md`.
- **EVC-00006 prohibition:** do not silently rewrite broader planning artifacts just to erase that drift unless a prompt explicitly targets them `_Source:_ AGENTS.md`.
- **EVC-00022 prohibition:** Do not infer ownership from similarly named roots. `_Source:_ README.md`.
- **EVC-00239 prohibition:** Another crucial design shift was rejecting worker NPC labour as a core simulation. The user initially considered NPC workers but then pointed out that labour, pathfinding, and person-like simulation are expensive and unnecessary if the civilisation is... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__01_human_readable_report.md`.

1.5 4. Current Authority Model

Authority is layered: canon and glossary outrank AGENTS, which outranks lower planning, generated outputs, archive material, and conversation evidence.

- **EVC-00012 decision:** Keep target-specific project state in `'aide/memory/'`; do not copy source AIDE memory, queue history, generated context, reports, route decisions, cache-key reports, Gateway/provider status reports, `'aide.local/'`, raw prompts, raw responses, or secrets. `_Source:_ AGENTS.md`.

- **EVC-00065 decision:** Travel scheduling, replay, and law decisions become nondeterministic. `_Source:_ docs/architecture/INVARIANTS.md`.
- **EVC-01433 decision:** Rendering is presentational only and MUST NOT mutate truth or enforce authority decisions. `_Source:_ docs/canon/constitution_v1.md`.
- **EVC-01457 decision:** Foundation Lock is the repository decision gate that determines whether Dominium can leave the Foundation Lock queue and begin a first narrow governed product slice. `_Source:_ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00691 decision:** 'DECISION-0006': Should this conversation-derived claim become a future review item, remain historical, or be deferred: The assistant formalized this as the Perfect Earth Calendar, later called HPC-E. The final structure is clear, though the exact leap... `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00692 decision:** 'DECISION-0007': What disposition should be chosen for this unresolved claim: Before relying on this chat as project authority, a future assistant or human reviewer must confirm whether Dominium is actually intended to be simulation-heavy, whether strict...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00123 decision: Chat label:** Dominium Build and Future-Proofing Architecture **Date anchor:** 2026-05-27 Australia/Melbourne **Scope:** This report covers the visible conversation and the preservation task that produced the accompanying handoff files. It does **not**... `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00136 decision:** DECISION-12: HPC-E Year Day and Leap Day are appended after February; canonical mode is undated and compatibility mode may use Feb 29/30. [FACT / INFERENCE] `_Source:_ docs/archive/conversations/Chronology_Celestial_Systems/Dominium_Chronology_Celestial_Systems__05_reader_brief.md`.
- **EVC-00153 decision:** DECISION-06: Support canonical surface plus multiple surface instances for shards/mirrors. `_Source:_ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.
- **EVC-00175 decision: DECISION-01:** The old v1 contract/glossary were accepted as the baseline for this chat because the user supplied them as the old ground truth and asked later questions against them. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__01_human_readable_report.md`.
- **EVC-00186 decision:** Kept assistant portability doctrine as recommendation/inference unless clearly accepted. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__07_verification_and_audit.md`.
- **EVC-00198 decision:** '04_registers': workstreams, decisions, tasks, risks, verification queue. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__09_in_chat_reader.md`.
- **EVC-00214 decision:** 1. 'Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md' - direct narrative explanation of the whole conversation. 2. 'Dominium_Canon_Portability_Audit__01_human_readable_report.md' - prior full preservation... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__README_FIRST.md`.
- **EVC-00371 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__01_human_readable_report.md`.

- **EVC-00467 decision:** The user asked for a single downloadable bundle containing all the files plus an accompanying human-readable detailed report of the conversation: what was discussed, what was decided, what was deferred, what was produced, and what still needs follow-up... `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__10_accompanying_detailed_summary_report.md`.
- **EVC-00566 decision:** The most important repo-supported decision is that Dominium authority must remain logical ACT, not wall-clock. The strongest recommendations are to freeze ACT units/serialization, audit DSYS timers, and keep civil time as projection-only. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__06_reader_brief.md`.
- **EVC-00579 decision:** 1. Save the ZIP. 2. Confirm which recommendations are accepted as requirements. 3. Audit DSYS timer backends. 4. Audit ACT serialization. 5. Draft canonical Dominium time architecture documentation. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md`.
- **EVC-00620 decision:** Finally, the user pasted a newer repo-status summary saying the structure was now clean enough to stop broad structure refactors: canonical structure passed with warnings, fast strict and smoke proof passed, full CTest remained blocked by stale full-gate... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__01_human_readable_report.md`.
- **EVC-00643 decision:** 1. treating the Universe Explorer as a normal renderer/free-camera task; 2. ignoring the current queue and trying to implement broad Workbench UI or gameplay; 3. restarting broad repo structure cleanup; 4. treating assistant recommendations as accepted... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md`.
- **EVC-00821 decision:** DECISION-01:** The old v1 contract/glossary were accepted as the baseline for this chat because the user supplied them as the old ground truth and asked later questions against them. `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_complete_conversation.md`.
- **EVC-00883 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source:_ docs/archive/conversations/_reader/by_chat/framework_open_source_provider.md`.
- **EVC-00909 decision:** There was also an early suggestion to create a 'DUI' facade, a Dominium UI abstraction, to support native widgets and fallback rendering. This idea was useful as a conceptual stepping stone but was not ultimately locked as a final requirement in the form... `_Source:_ docs/archive/conversations/_reader/by_chat/launcher_app_layer.md`.
- **EVC-01162 decision:** By the end, user reports indicated that several actual cleanup commits landed. Important reported commits included provider-structure work, actual final structure cleanup, full-gate legacy path routing, and Domino framework boundary definition. The... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__01_human_readable_report.md`.
- **EVC-01173 decision:** Ask: "What decisions are final?", "What is still uncertain?", "What is the next prompt?", "Which rejected options should we avoid?", "What should go into the master spec book?" `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__09_in_chat_reader.md`.
- **EVC-01180 decision:** 1. Is full CTest/T4 now green? Known answer from chat: no, not yet. It needs auditing and repair. 2. Are stale AuditX/identity evidence and launcher marker debt fixed? Last visible status said no or still pending. 3. Are raylib/SDL2/Lua providers... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__01_human_readable_report.md`.

- **EVC-01190 decision: Generated:** 2026-05-27 21:03:35 AEST **Scope:** This conversation's accessible content, the prior generated handoff package, visible user status reports, and uploaded/mounted summaries. **Purpose:** A human-readable companion report that explains what... **_Source:** `docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary.md`.
- **EVC-01198 decision: Generated:** 2026-05-27 21:03:35 AEST **Scope:** This conversation's accessible content, the prior generated handoff package, visible user status reports, and uploaded/mounted summaries. **Purpose:** A human-readable companion report that explains what... **_Source:** `docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary.txt`.
- **EVC-01207 decision:** This report summarizes the accessible conversation and the mounted artifacts available in `mnt/data`. It incorporates the prior handoff/preservation files, user-reported commit statuses, repeated directory-structure reviews, and the architecture... **_Source:** `docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary_report.md`.
- **EVC-01251 decision:** 1. Old UI Editor / Tool Editor are superseded as final products. 2. Their useful pieces become Workbench modules and services. 3. Workbench is a production environment over the system, not authority. 4. CLI, TUI, rendered GUI, native GUI, headless... **_Source:** `docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__06_reader_brief.md`.
- **EVC-01395 decision:** See DECISION-01 through DECISION-27 in the registers. Highest priority: DECISION-01, DECISION-06, DECISION-10, DECISION-21, DECISION-23. **_Source:** `docs/archive/conversations/testx_repos_governance/dominium_testx_repos_governance_handoff__05_reader_brief.md`.
- **EVC-00001 specification:** Future Series: Sigma-1, Sigma-2, Sigma-3, Sigma-4, Sigma-5, Phi, Upsilon, Zeta Replacement Target: none; later mirrors and machine-readable governance surfaces must derive from this file rather than compete with it Binding Sources... **_Source:** `AGENTS.md`.
- **EVC-00003 specification:** 1. `docs/canon/constitution_v1.md` 2. `docs/canon/glossary_v1.md` 3. `AGENTS.md` 4. scope-specific canonical planning, semantic, schema, contract, release, and policy artifacts named by the active task 5. operational registries, projections, mirrors... **_Source:** `AGENTS.md`.
- **EVC-00014 specification:** create or resume a bounded AIDE task before reporting blocked; ask the user only for semantic authority conflicts, destructive ambiguity, missing external secrets, or required review gates. **_Source:** `AGENTS.md`.
- **EVC-00031 specification:** Required updates: documentation surface exists, but current canon ownership is not explicit **_Source:** `docs/README.md`.
- **EVC-00032 specification:** Normative contracts live under `docs/architecture/` only. All other docs are guidance, reference, or historical context. **_Source:** `docs/README.md`.
- **EVC-00040 specification:** Archived documents are kept for provenance only. Canonical contracts are in `docs/architecture/`. **_Source:** `docs/README.md`.
- **EVC-00044 specification:** Dependency direction is authoritative and must not be inverted. **_Source:** `docs/architecture/CANONICAL_SYSTEM_MAP.md`.
- **EVC-00048 specification:** Law admission gates sit before scheduling, before execution, and before commit. **_Source:** `docs/architecture/CANONICAL_SYSTEM_MAP.md`.
- **EVC-00050 specification:** Domain volumes define where reality exists and which laws apply. Domain queries are deterministic, budgeted, and SDF-based. **_Source:** `docs/architecture/CANONICAL_SYSTEM_MAP.md`.
- **EVC-00056 specification:** Scope: index of frozen and evolving constitutional surfaces. **_Source:** `docs/architecture/CONTRACTS_INDEX.md`.

- **EVC-00057 specification:** This index is the navigation hub for stability surfaces. "FROZEN" means the `__Source: __ docs/architecture/CONTRACTS_INDEX.md`.
- **EVC-00058 specification:** document defines a contract that must not change lightly. "EVOLVING" means the `__Source: __ docs/architecture/CONTRACTS_INDEX.md`.
- **EVC-00060 specification:** Schemas are the authoritative data-shape contracts. Start here: `__Source: __ docs/architecture/CONTRACTS_INDEX.md`.
- **EVC-00061 specification:** 'tests/apps/' (legacy and adjacent contract checks) `__Source: __ docs/architecture/CONTRACTS_INDEX.md`.
- **EVC-00063 specification:** Scope: hard invariants for all systems, documentation, and data. `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00066 specification:** Reachability lies, bypassed costs, and broken domain law. `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00067 specification:** Invariant: No authority without capability and law `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00068 specification:** Invariant: Authority gates actions only, never visibility (AUTH3-AUTH-001) `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00069 specification:** Invariant: Demo is an authority profile, not a build (AUTH3-DEMO-003) `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00070 specification:** Invariant: Authority upgrades/downgrades do not mutate state (AUTH3-UPGRADE-007) `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00071 specification:** Invariant: Saves are tagged by authority scope (AUTH3-SAVE-008) `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-00076 specification:** Future Series: DOC-ARCHIVE Replacement Target: legacy reference surface retained without current binding authority `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00078 specification:** Dominion/Domino is a deterministic world runtime and law-governed simulation OS. `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00081 specification:** A law-governed simulation OS where authority is data-defined. `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00082 specification:** A multi-scale reality model with explicit existence/refinement and visitability. `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00085 specification:** god-mode admin tools (law-gated and audited) `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00087 specification:** There are no game modes; behavior is law + capability + policy. `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00088 specification:** It is not acceptable to bypass law or audit for convenience. `__Source: __ docs/architecture/WHAT_THIS_IS.md`.
- **EVC-00093 specification:** authoritative logic is deterministic and law-gated. `__Source: __ docs/architecture/WHAT_THIS_IS_NOT.md`.
- **EVC-00096 specification:** Micro detail is refined only when required; macro existence is valid. `__Source: __ docs/architecture/WHAT_THIS_IS_NOT.md`.

1.6 5. The System Stack

The stack separates deterministic substrate, domain meaning, product composition, runtime services, contracts, content, tools, and docs.

- **EVC-00686 decision:** What disposition should be chosen for this unresolved claim: This chat was about preserving and re-grounding Dominium's architecture around a very old constitutional contract, then checking whether the current GitHub repository still foll...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00693 decision:** 'DECISION-0009': What disposition should be chosen for this unresolved claim: This chat was about preserving and re-grounding Dominium's architecture around a very old constitutional contract, then checking whether the current GitHub repository still foll...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00695 decision:** The user also made a clear versioning decision. **FACT:** The user wanted **major.minor.patch semantic versioning** for all components/packages and for the complete game package. The user explicitly did **not** want build numbers or build dates in... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00139 decision:** This chat was a long architecture/specification-generation session for the Dominium Game project. It focused on turning a broad v3 game architecture into concrete, file-by-file 'txt' implementation specs for Codex automation. The user decided that Codex... `_Source:_ docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00140 decision:** The visible chat generated many implementation-spec prompts across engine, platform, render, audio, systems, and the start of game. It also preserved important decisions: UTF-8 internal text, retro fallbacks, semantic versioning, build metadata policy... `_Source:_ docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00236 decision:** This was recommended by the assistant, not explicitly accepted by the user. It follows from the user's deterministic, persistent, sparse, MMO-scale requirements. The alternative would be to make Unreal or a normal scene graph the source of truth, but... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__01_human_readable_report.md`.
- **EVC-00282 decision:** This report should be read as a summary of the whole visible conversation, not as a final design specification. Some items were clearly stated by the user and are marked as FACT. Some were assistant-proposed architecture or design synthesis and are... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00295 decision:** Future chats might incorrectly treat every brainstorm item as a final decision, especially assistant recommendations. They might over-focus on Unreal and ignore Domino's need for deterministic data/simulation. They might reintroduce worker NPC labour... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__01_human_readable_report.md`.
- **EVC-00363 decision:** A recurring theme was urgency. The user repeatedly expressed that the directory and root-structure cleanup had taken too long, and at points threatened to manually drag/drop folders if the assistant and Codex process failed to produce real progress. That... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md`.
- **EVC-00379 decision:** This chat developed a framework/provider strategy for Dominium. The user wanted to accelerate development with open-source code while preserving portability, modularity, extensibility, determinism, and future replaceability. The final architecture is... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.

- **EVC-00381 decision:** See Decision Register. Most important: framework/provider architecture, raylib as first provider suite, service-first layout, profiles for provider selection, Lua/SDL2 as first-wave providers, and sparse deterministic delegated simulation as design doctrine. `__Source: docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00395 decision:** This chat was a design-decision and architecture-baseline discussion for Dominium, focused on language standards, platform floors, binary architecture, portability strategy, and the project's long-term modular structure. The user began by asking whether... `__Source: docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md`.
- **EVC-00429 decision:** The best next action is to verify live repo state, then implement AIDE-STRUCTURE-00 and AIDE-ARCH-00 as non-invasive control-plane and architecture-constitution tasks. Do not start broad moves until contracts and inventories exist. Do not trust pasted... `__Source: docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__01_human_readable_report.md`.
- **EVC-00433 decision:** See DECISION-01 through DECISION-10 in the registers. The clearest user-accepted decisions are AIDE adoption and recycling existing material. `__Source: docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md`.
- **EVC-00442 decision:** Ask: "Which decisions are accepted versus recommendations?", "Draft the AIDE-STRUCTURE-00 Codex prompt", "Design root_constitution.toml", "What repo facts must be verified?", "How should old XStack-style tools be recycled?", or "Turn this into Project... `__Source: docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.
- **EVC-00474 decision:** The final user action uploaded a preservation-package prompt. This response turns the visible chat into a human-readable report, registers, context packet, spec sheet, aggregator packet, audit, and downloadable ZIP. The main caveat is that many technical... `__Source: docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__01_human_readable_report.md`.
- **EVC-00486 decision:** Additional points: DDAP/DIL is proposed; repo not inspected; conformance tests prove modularity; data compatibility must be formalized; generated output needs validation; future aggregation must preserve recommendation-vs-decision labels. `__Source: docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__06_reader_brief.md`.
- **EVC-00496 decision:** 1. Read the human-readable report. 2. Review the decision register and mark accepted/rejected/needs revision. 3. Inspect the actual repo. 4. Draft public API and data evolution policies. 5. Choose one conformance-test pilot. `__Source: docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__09_in_chat_reader.md`.
- **EVC-00498 decision:** This report is reliable for explaining what was discussed in the visible chat. It is not proof that the real repository has the recommended structure, not proof that the user formally accepted every recommendation, and not a substitute for verifying the... `__Source: docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__10_accompanying_detailed_summary_report.md`.
- **EVC-00505 decision:** This chat was a detailed architecture and refactor planning session for the Dominium + Domino project. The central result is a stable separation between **Domino**, the deterministic engine under 'source/domino', and **Dominium**, the product suite under... `__Source: docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.

- **EVC-00532 decision:** The uploaded instruction file defines this as a maximum-fidelity preservation, explanation, handoff, audit, spec-prep, and export task for the current chat. The extraction below is grounded in the visible conversation context and the uploaded prompt. The... `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__01_human_readable_report.md`.
- **EVC-00543 decision:** See Decision Register in file 04. `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00584 decision:** The answer distinguished system width from time representation. The important conclusion was that 2038 is caused by signed 32-bit time counters reaching their maximum representable value. The risk appears where signed 32-bit Unix-style timestamps are... `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__10_accompanying_detailed_summary_report.md`.
- **EVC-00588 decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md`.
- **EVC-00599 decision:** Main decision candidates: custom deterministic core; Unreal as frontend only; server-authoritative MMO state; sparse procedural planets; single universe via partitioning; Domino as future adapter. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__06_reader_brief.md`.
- **EVC-00708 decision:** The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The user's question directly made arbitrary placement a major topic. [INFERENCE]... `_Source:_ docs/archive/conversations/_reader/by_chat/advanced_simulation_infrastructure.md`.
- **EVC-00716 decision:** The idea is attractive because it supports broad distribution and long-term extensibility. But it is not a final decision. Dynamic plugins introduce ABI, packaging, security, and platform restrictions. Static registration may be simpler. A hybrid may be... `_Source:_ docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md`.
- **EVC-00738 decision:** This chat was a strategic architecture and design convergence session for Dominium/Domino. It began from a transferred knowledge base about rebuilding Dominium's GUI and binary strategy, then evolved into a broad platform-specification discussion... `_Source:_ docs/archive/conversations/_reader/by_chat/architecture_ui_providers.md`.
- **EVC-00762 decision:** A central design theme emerged: not everything should be simulated at the same fidelity. The Sol system should be represented in great detail because the user explicitly said most playtime will happen there. The Milky Way should have a backbone of real... `_Source:_ docs/archive/conversations/_reader/by_chat/chronology_celestial_systems.md`.
- **EVC-00794 decision:** This chat was mainly about turning the **Dominium** game/engine from a broad, ambitious design into a coherent, Codex-ready architecture. The user had already explored many individual systems elsewhere or earlier in the same chat: railways, roadways... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_ii.md`.
- **EVC-00806 decision:** The prior assistant summarized these files as containing two different launcher concepts: an engine-rendered launcher view and a native Win32 launcher. It also claimed the CMake file built the Win32 source for non-Windows targets. However, this report... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iii.md`.

- **EVC-00828 decision:** The user then asked for recommendations. The assistant recommended a clean startup policy: explicit flags first, no environment/config override in v1, terminal detection through dsys, generic AUTO behavior, product-specific headless handling for the... `_Source: docs/archive/conversations/_reader/by_chat/dominium_domino_codex_planning.md`.
- **EVC-00846 decision:** Finally, the user retired the chat and asked for a maximum-fidelity context transfer packet. The assistant produced one. The user then asked for a downloadable shareable report package. The assistant created Markdown/YAML/report files and a ZIP. The user... `_Source: docs/archive/conversations/_reader/by_chat/dominium_setup.md`.
- **EVC-00860 decision:** After the architecture and prompts were created, the user asked for a maximum-fidelity context transfer packet. The assistant produced one. The user then asked for a downloadable report package; the assistant generated package files and a ZIP. The user... `_Source: docs/archive/conversations/_reader/by_chat/domino_engine_refactor_prompts.md`.
- **EVC-00868 decision:** The visible conclusion was that the engine has real deterministic substrate pieces, but these must be hardened through small playable slices and proof/replay tests. Determinism is not only a mathematical preference; it enables multiplayer authority... `_Source: docs/archive/conversations/_reader/by_chat/engine_baseline_architecture.md`.
- **EVC-00891 decision:** An assistant initially rewrote that prompt into a cleaner Codex-ready form. The user then corrected the process: **before generating prompts, the group needed to discuss the design**. That changed the status of the rewritten prompt. It became a useful... `_Source: docs/archive/conversations/_reader/by_chat/gui_binary_content.md`.
- **EVC-00898 decision:** This chat was a design-decision and architecture-baseline discussion for Dominium, focused on language standards, platform floors, binary architecture, portability strategy, and the project's long-term modular structure. The user began by asking whether... `_Source: docs/archive/conversations/_reader/by_chat/language_platform_architecture.md`.
- **EVC-00916 decision:** A major early conclusion was that Dominium should use **one codebase but multiple binaries**. The assistant proposed, and the user continued from, the idea that setup, launcher, and game should be separate executables rather than one monolithic... `_Source: docs/archive/conversations/_reader/by_chat/launcher_setup_architecture.md`.
- **EVC-00924 decision:** The conversation implies a goal of turning Dominium into a long-lived product-line platform rather than a single-game repository. It also implies a desire for auditability: decisions should be grounded, visible, mechanically enforceable, and later... `_Source: docs/archive/conversations/_reader/by_chat/modularity_aide_refactorability.md`.
- **EVC-00938 decision:** This chat was about rethinking Dominium from a conventional game project into a much broader, more modular, deterministic, extensible software environment. The user repeatedly asked whether the current plan was the best possible version, and the... `_Source: docs/archive/conversations/_reader/by_chat/os_interface_repo_architecture.md`.
- **EVC-00946 decision:** The central problem was not simply "write some code." The user wanted a carefully sequenced prompt pack that could guide Codex through a large, risky engine refactor without breaking the repository between steps. The plan had to respect strict... `_Source: docs/archive/conversations/_reader/by_chat/platform_renderer_api_plan.md`.
- **EVC-00956 decision:** That early answer was generated by the assistant, not stated by the user as a final decision. It matters because it introduced a very broad portability ambition, but it was later superseded by more practical platform planning. It should now be treated as... `_Source: docs/archive/conversations/_reader/by_chat/platform_support.md`.
- **EVC-00964 decision:** Known: Assistant recommended DDAP; user has not explicitly accepted it. `_Source: docs/archive/conversations/_reader/by_chat/portability_assurance_future_proof.md`.

- **EVC-00970 decision:** This chat was mainly about refining the root 'README.md' for the **Dominium / Domino** project and then preserving the resulting decisions in a form that could survive into later chats. The project, as described in the README, is a deterministic... `_Source:_ docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md`.
- **EVC-00995 decision:** The conversation then moved into how this might fit XStack. The model shifted from "better public version number" to "layered identity model." The assistant recommended preserving per-product versions, a global build number, build IDs, compatibility... `_Source:_ docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.
- **EVC-01018 decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01020 decision:** The assistant recommended against starting directly on UE6 because public technical access and production documentation were not treated as available in the visible chat. This was not framed as a permanent rejection of UE6. It was a timing decision: do... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01118 decision:** Module/plugin/framegraph/support-tier ideas are proposals, not accepted final decisions. `_Source:_ docs/archive/conversations/app_runtime_platform_renderers/dominium_app0_runtime_platform_renderers__05_reader_brief.md`.
- **EVC-01145 decision:** The final UI/UX synthesis connects directly to that premise. The interface should feel like a robot operating system. The player boots into an OS, connects to a universe, downloads consciousness into a fabricated robot body, and disconnects into... `_Source:_ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__01_human_readable_report.md`.
- **EVC-01241 decision:** Finally, the chat considered third-party acceleration. The user pasted advice about raylib, rgl, rlsw, raygui, raudio, SDL2, and Lua. The accepted doctrine was service-first and provider-backed: use these aggressively as seed providers, but fence their... `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__01_human_readable_report.md`.
- **EVC-01275 decision:** This chat was primarily about the Dominium / Domino Setup system: a deterministic, auditable, reversible installer/updater/verifier/rollback authority. It began with cross-platform setup architecture and directory planning, then shifted to canonical... `_Source:_ docs/archive/conversations/dominium_setup/dominium_setup_handoff__05_reader_brief.md`.
- **EVC-01291 decision:** Limitations in plain language: this report reconstructs the conversation from the visible transcript and from repository files that were fetched during the chat. It does not prove that the local commands the user reported were actually run, because those... `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__01_human_readable_report.md`.
- **EVC-01302 decision:** The key accepted decision is Milestone 0 first. The key architectural direction is contract-driven deterministic substrate with game/product layers on top. `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__06_reader_brief.md`.
- **EVC-01309 decision:** Read '01_human_readable_report.md' first for context. Use '04_registers.md' for structured tasks and decisions. Use '05_aggregator_packet.md' for merging with other old-chat reports. Use '03_spec_sheet.yaml' for machine-assisted aggregation. `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__09_in_chat_reader.md`.

- **EVC-01311 decision:** Which ideas are final decisions and which are recommendations? `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture_09_in_chat_reader.md`.
- **EVC-01322 decision:** 1. Do not say the playable game engine is finished. 2. Do not skip Milestone 0. 3. Do not treat CAD/destruction/MMO/universe architecture as near-term implementation scope. 4. Do not treat assistant recommendations as final user decisions. 5. Do not... `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__10_companion_detailed_summary_report.md`.
- **EVC-01343 decision:** 1. Make Dominium/DOMINO portable, modular, extensible, and reusable for other games and engine projects. 2. Allow entire code/data/files/directories to be replaced or rewritten while preserving stable contracts and behavior. 3. Develop the project like a... `_Source:_ docs/archive/conversations/omega_xi_pi_architecture_future/dominium_omega_xi_pi_architecture_future_proofing_planning__01_human_readable_report.md`.
- **EVC-01365 decision:** This chat built a continuity-safe implementation plan for the Dominium/Domino engine. The user wanted ready-to-run prompts for Codex CLI / VS Code Codex running GPT-5.2 on Windows at 'c:\Inbox\Git Repos\dominium', with no interactive approvals and no... `_Source:_ docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01373 decision:** This chat was about platform support planning for Dominium. It started with broad questions about what systems and operating systems Dominium could support, then expanded into a large device-family inventory covering PlayStation, Xbox, Nintendo, PC... `_Source:_ docs/archive/conversations/platform_support/dominium_platform_support_planning__05_reader_brief.md`.
- **EVC-01378 decision:** DECISION-10: Use platform contracts/support matrix rather than an undifferentiated "support everything" claim. (INFERENCE; assistant-proposed; strongly implied by scope). `_Source:_ docs/archive/conversations/platform_support/dominium_platform_support_planning__05_reader_brief.md`.

1.7 6. Engine, Game, Runtime, Products, and Tools

Engine, game, runtime, products, and tools have different authority roles and must not be collapsed.

- **EVC-00690 decision:** 'DECISION-0003': What disposition should be chosen for this unresolved claim: Future work must define the client's allowed dependency surface and whether it can access any simulation-adjacent prediction layer.? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00697 decision:** This context matters because the rest of the conversation happened inside those constraints. The launcher could not become a dumping ground for OS-specific behavior, sim mutation, renderer decisions, or nondeterministic game-state changes. It had to fit... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00698 decision:** The user then redirected the entire plan. They argued that native OS widget GUI tools already exist through Visual Studio, Xcode, etc. The project needed a cross-platform rendered tool environment that uses the same CLI, TUI, and rendered GUI systems as... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00699 decision:** The user later asked where to create Visual Studio and Xcode apps after opening the repo as a folder. The assistant advised that Visual Studio and Xcode projects should be generated through CMake, not hand-authored or treated as authoritative source... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.

- **EVC-00139 decision:** This chat was a long architecture/specification-generation session for the Dominium Game project. It focused on turning a broad v3 game architecture into concrete, file-by-file 'txt' implementation specs for Codex automation. The user decided that Codex... `_Source:_ docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00259 decision:** A later assistant response refined the architecture around three roles: Domino as deterministic simulation, Unreal as renderer/client/tooling, and Dominium as game rules. It also drew a feasibility boundary: millions of users can exist across a logical... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_detailed_summary_and_report.md`.
- **EVC-00295 decision:** Future chats might incorrectly treat every brainstorm item as a final decision, especially assistant recommendations. They might over-focus on Unreal and ignore Domino's need for deterministic data/simulation. They might reintroduce worker NPC labour... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__01_human_readable_report.md`.
- **EVC-00321 decision:** A second major theme was unification of presentation surfaces. The user wanted CLI, TUI, rendered GUI, and OS-native GUI to share code and semantics. The decision emerged that these should not be four separate systems. Instead, all products should expose... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__01_human_readable_report.md`.
- **EVC-00505 decision:** This chat was a detailed architecture and refactor planning session for the Dominium + Domino project. The central result is a stable separation between **Domino**, the deterministic engine under 'source/domino', and **Dominium**, the product suite under... `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00646 decision:** This report is not a perfect raw transcript substitute. It reconstructs the working state from the visible conversation, user-pasted transcripts, assistant outputs, repo-state checks performed in this chat, and the final uploaded preservation... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__01_human_readable_report.md`.
- **EVC-00659 decision:** This preservation package explains the conversation, records the current task state, preserves decisions and rejected options, and prepares the chat for aggregation into a master Project Spec Book. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00660 decision:** Read: 1. Human-readable report for full understanding. 2. Context transfer packet for continuing in a new chat. 3. Spec sheet for aggregation. 4. Registers for task/decision tracking. 5. Verification/audit before relying on the state. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00668 decision:** The conclusion was not to globally simulate everything. Instead, the architecture should support deterministic lazy historical evaluation: `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__10_accompanying_detailed_summary.md`.
- **EVC-00708 decision:** The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The user's question directly made arbitrary placement a major topic. [INFERENCE]... `_Source:_ docs/archive/conversations/_reader/by_chat/advanced_simulation_infrastructure.md`.
- **EVC-00762 decision:** A central design theme emerged: not everything should be simulated at the same fidelity. The Sol system should be represented in great detail because the user explicitly said most playtime will happen there. The Milky Way should have a backbone of real... `_Source:_ docs/archive/conversations/_reader/by_chat/chronology_celestial_systems.md`.

- **EVC-00806 decision:** The prior assistant summarized these files as containing two different launcher concepts: an engine-rendered launcher view and a native Win32 launcher. It also claimed the CMake file built the Win32 source for non-Windows targets. However, this report... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iii.md`.
- **EVC-00812 decision:** A central decision was to separate the project into two conceptual layers. **Domino** is the reusable engine layer: platform abstraction, renderer abstraction, audio, UI, core services, package/instance management, simulation control, events, plugins... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iv.md`.
- **EVC-00828 decision:** The user then asked for recommendations. The assistant recommended a clean startup policy: explicit flags first, no environment/config override in v1, terminal detection through dsys, generic AUTO behavior, product-specific headless handling for the... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_domino_codex_planning.md`.
- **EVC-00834 decision:** The discussion then moved into AIDE. The user wanted to automate as much as possible through Codex and AIDE. We developed a task operating model: AIDE creates WorkUnits, tracks attempts, blockers, evidence, repairs, resumes, checkpoints, and promotion... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-00916 decision:** A major early conclusion was that Dominium should use **one codebase but multiple binaries**. The assistant proposed, and the user continued from, the idea that setup, launcher, and game should be separate executables rather than one monolithic... `_Source:_ docs/archive/conversations/_reader/by_chat/launcher_setup_architecture.md`.
- **EVC-00924 decision:** The conversation implies a goal of turning Dominium into a long-lived product-line platform rather than a single-game repository. It also implies a desire for auditability: decisions should be grounded, visible, mechanically enforceable, and later... `_Source:_ docs/archive/conversations/_reader/by_chat/modularity_aide_refactorability.md`.
- **EVC-00933 decision:** The final strategic direction before this preservation request was to run a ?-series: snapshot intake, reality extraction, blueprint reconciliation, foundation readiness, and final prompt synthesis. This is needed because plans must now be mapped onto... `_Source:_ docs/archive/conversations/_reader/by_chat/omega_xi_pi_architecture_future.md`.
- **EVC-00946 decision:** The central problem was not simply "write some code." The user wanted a carefully sequenced prompt pack that could guide Codex through a large, risky engine refactor without breaking the repository between steps. The plan had to respect strict... `_Source:_ docs/archive/conversations/_reader/by_chat/platform_renderer_api_plan.md`.
- **EVC-01003 decision:** The user then asked whether the implementation was industry-accepted and what could be improved. The response framed the approach as closer to game engines, operating systems, and long-lived infrastructure than typical game development. The important... `_Source:_ docs/archive/conversations/_reader/by_chat/testx_repox_governance.md`.
- **EVC-01020 decision:** The assistant recommended against starting directly on UE6 because public technical access and production documentation were not treated as available in the visible chat. This was not framed as a permanent rejection of UE6. It was a timing decision: do... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01118 decision:** Module/plugin/framegraph/support-tier ideas are proposals, not accepted final decisions. `_Source:_ docs/archive/conversations/app_runtime_platform_renderers/dominium_app0_runtime_platform_renderers__05_reader_brief.md`.
- **EVC-01128 decision:** How are 'DOMINIUM_RUN_ROOT' and 'DOMINIUM_HOME' finalized? `_Source:_ docs/archive/conversations/app_testx_codehygiene/dominium_app_testx_codehygiene_handoff__05_reader_brief.md`.

- **EVC-01241 decision:** Finally, the chat considered third-party acceleration. The user pasted advice about raylib, rlg, rlsw, raygui, raudio, SDL2, and Lua. The accepted doctrine was service-first and provider-backed: use these aggressively as seed providers, but fence their... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__01_human_readable_report.md`.
- **EVC-01254 decision:** This package preserves the chat's substance, decisions, tasks, constraints, artifacts, risks, open questions, and future handoff material. The main report is human-readable. Registers and YAML are for aggregation. `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__09_in_chat_reader.md`.
- **EVC-01261 decision:** The user accepted that the old UI Editor/Tool Editor were good general ideas but bad final products. The new direction became a cross-platform rendered Workbench that uses the same runtime, renderer, UI, command, pack, and diagnostics systems as the... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md`.
- **EVC-01282 decision:** Verify actual repository state, then execute or audit the generated "Dominator Setup: Final Spec Alignment, Gap Closure, and Hardening Pass" prompt. `_Source: docs/archive/conversations/dominium_setup/dominium_setup_handoff__05_reader_brief.md`.
- **EVC-01302 decision:** The key accepted decision is Milestone 0 first. The key architectural direction is contract-driven deterministic substrate with game/product layers on top. `_Source: docs/archive/conversations/engine_baseline_architecture/dominator_dominium_engine_baseline_architecture__06_reader_brief.md`.
- **EVC-01322 decision:** 1. Do not say the playable game engine is finished. 2. Do not skip Milestone 0. 3. - **EVC-01082 specification:** 'timekeeping' (35 conversations): calendar, chronology, timestamp durability, 2038 resilience, and time-domain law. Sources: Dominium Advanced Simulation and Infrastructure Architecture `../_reader/by_chat/advanced_simulation_infrastructure.md...` `_Source:_ docs/archive/conversations/_synthesis/FULL_PROJECT_PICTURE_v0.md`.
- **EVC-01096 specification:** 'contracts_schema' (42 conversations): machine-readable contracts, schemas, compatibility, manifests, and registries. Sources: Dominium Advanced Simulation and Infrastructure Architecture `../_reader/by_chat/advanced_simulation_infrastructure.md...` `_Source:_ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md`.
- **EVC-00157 specification:** The view system requirements expanded to include instant seamless zoom, instant switching between top-down 2D and first-person 3D, vector/graphics modes per view, and arbitrary cameras for free cam, map views, HUD cameras, CCTV, overlays, windows, and... `_Source:_ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md`.
- **EVC-00168 specification:** Domino engine, Dominion product/game layer, Repository structure, ABI/API spine, Platform API and backends, Renderer API and backends, Audio API and backends, Unified UI system, Product contracts and runtime selection, Packages, instances, mods, packs... `_Source:_ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md`.
- **EVC-00207 specification:** 1. **Fresh repo checkout audit** - Needed to resolve current physical layout, active code paths, and potentially stale references. 2. **Full build/test verification** - Needed to prove CMake, CTest, XStack, RepoX/TestX/AuditX, and product binaries in the... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md`.
- **EVC-00396 specification:** Another major thread was modularity. The user wanted code, data, modules, packs, tools, apps, and Workbench to integrate cleanly and be reusable. The answer became a contract-centered composition model: apps compose modules; modules require services... `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md`.

- **EVC-00416 specification:** The final major direction change was the user's requirement that the launcher be designed and implemented using the Domino platform/rendering layers: 'dsys' for platform services and 'dgfx' for rendering, with strict C89 APIs and retro/modern support... `_Source:_ docs/archive/conversations/Launcher_Setup_Architecture/Dominium_Launcher_Setup_Architecture__05_reader_brief.md`.
- **EVC-00424 specification:** Finally, the user made the broadest request: Dominium code must be portable, modular, extensible, reusable for another game on the same engine, and potentially reusable for different engine or game projects. The user wanted to know what was missing, what... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__01_human_readable_report.md`.
- **EVC-00432 specification:** 1. The user wants Dominium built like a serious long-lived game/engine platform. 2. The goal is not just cleaner folders; it is long-term portability and refactorability. 3. A stable root constitution is needed. 4. New top-level roots should be refused... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md`.
- **EVC-00441 specification:** The chat's core contribution is that Dominium needs stable ownership roots, AIDE-driven refactor mechanics, and strict separation of reusable engine/runtime/contracts from Dominium-specific game rules. The main next action is to verify live repo state... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.
- **EVC-00473 specification:** This chat was mainly about turning Domino/Dominium from a one-off game project into a durable, reusable engine/product platform. It began with a question about whether standards from high-assurance domains-especially DO-178B/C and adjacent... `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__01_human_readable_report.md`.
- **EVC-00507 specification:** The chat also defined the 'DOMINIUM_HOME' model for multi-version installs. Product builds, mods, and packs live in a shared versioned repo; instances reference versions instead of copying whole suites. Versioning is split across core, products, formats... `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00604 specification:** This package preserves the visible chat about Dominium's engine/runtime strategy. It explains why Unreal/UE6 should not be treated as the whole game, why a custom deterministic core is required, how Domino portability can be preserved, and what work... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00606 specification:** Client compute must not commit persistent MMO outcomes. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00616 specification:** The answer challenged the framing. It said that UE6 should not be treated as a present production target because public UE6 tooling and detailed requirements were not established in the visible sources. It recommended building in current Unreal... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__10_accompanying_human_readable_detailed_summary_and_report.md`.
- **EVC-00655 specification:** This chat preserved and refined the architecture, repo-control strategy, Workbench plan, AIDE development model, and immediate product-spine task sequence for Dominium. It established Dominium as a deterministic, contract-governed simulation platform... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__06_reader_brief.md`.

1.8 7. Law, Authority, Capability, and Refusal

Authority grants permission to attempt; law decides accept, refuse, transform, or degrade in deterministic, auditable form.

- EVC-00198 **decision:** '04_registers': workstreams, decisions, tasks, risks, verification queue. __Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__09_in_chat_reader.md.
- EVC-00620 **decision:** Finally, the user pasted a newer repo-status summary saying the structure was now clean enough to stop broad structure refactors: canonical structure passed with warnings, fast strict and smoke proof passed, full CTest remained blocked by stale full-gate... __Source: __ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__01_human_readable_report.md.
- EVC-01180 **decision:** 1. Is full CTest/T4 now green? Known answer from chat: no, not yet. It needs auditing and repair. 2. Are stale AuditX/identity evidence and launcher marker debt fixed? Last visible status said no or still pending. 3. Are raylib/SDL2/Lua providers... __Source: __ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__01_human_readable_report.md.
- EVC-00018 **specification:** AIDE and Codex are repo/control-plane harnesses and bounded patch execution surfaces. They help operate the repository; they do not replace canon, contracts, validation, or evidence. __Source: __ README.md.
- EVC-00025 **specification:** When behavior or compatibility meaning changes, update the relevant contract surface and proof in the same task. __Source: __ README.md.
- EVC-00028 **specification:** 1. Read the relevant canon, contract, and ownership documents. 2. Keep edits in the owning root. 3. Update contracts/schemas when behavior or compatibility meaning changes. 4. Run targeted validation plus 'git diff --check'. 5. Run fast strict when scope... __Source: __ README.md.
- EVC-01069 **specification:** Not safe now: implementation work in blocked scopes, canon/schema/contract rewrites from archive claims, release publication, renderer implementation, gameplay, provider/package runtime, broad Workbench UI, native GUI. __Source: __ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md.
- EVC-01070 **specification:** Any claim touching canon, glossary, authority order, contracts, schema law, current queue, release, implementation, or blocked scope. __Source: __ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md.
- EVC-01090 **specification:** The conversations strongly prefer a rich Workbench and eventual editor/operator surfaces. Current authority is narrower: broad Workbench UI, renderer implementation, and native GUI remain blocked. Therefore synthesis may describe intent, but follow-up... __Source: __ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md.
- EVC-01104 **specification:** Do not patch canon, contracts, schema, implementation, release, or queue files from this atlas. __Source: __ docs/archive/conversations/_synthesis/READ_THIS_FIRST_v0.md.
- EVC-01417 **specification:** Dominion's current documentation picture is authority layered. Canon, glossary, 'AGENTS.md', contract/schema law, current queue state, and validated repo artifacts are the highest-confidence sources. Archive and conversation material can explain how... __Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_CURRENT_PROJECT_PICTURE_v0.md.
- EVC-01425 **specification:** It does not rewrite canon, contracts, schema, implementation, release, or queue state. __Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_CURRENT_PROJECT_PICTURE_v0.md.

- **EVC-00351 specification:** 1. Dominium is now framed as a deterministic contract-governed simulation platform. 2. Domino is reusable substrate. 3. Workbench is production/evidence environment, not authority. 4. AIDE is repo/control-plane harness. 5. Contracts are law... `__Source: __ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__06_reader_brief.md`.
- **EVC-00455 specification:** 1. CLI is mandatory, TUI expected, GUI modular. 2. GUI shells are thin projections over command/service contracts. 3. Current repo authority is post-CONVERGE roots. 4. Domain work splits across contracts/game/content/docs/tests. 5. Current code is partly... `__Source: __ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__06_reader_brief.md`.
- **EVC-01044 specification:** This reader page is derived from archived conversation material. It cannot override canon, contracts, schema law, current queue state, live repo structure, or validated repo artifacts. `__Source: __ docs/archive/conversations/_reader/by_chat/workbench_aide_product_spine.md`.
- **EVC-01239 specification:** 1. The old UI Editor/Tool Editor plan was superseded. 2. Dominium Workbench is now the central production-environment concept. 3. Workbench is not authority; it operates over contracts, commands, services, documents, patches, providers, packs, modules... `__Source: __ docs/archive/conversations/dominium_full_conversation/companion_report/dominium_full_conversation_companion_report__07_reader_brief.md`.
- **EVC-00008 constraint:** do not perform silent migrations or compatibility reinterpretation `__Source: __ AGENTS.md`.
- **EVC-01172 prohibition:** 1. Verify current live repo status from a fresh tracked export. 2. If fast strict/RepoX is blocked, repair proof hygiene. 3. If gates are clean, proceed with projection conformance or presentation contracts. 4. Do not restart root-structure debate unless... `__Source: __ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__09_in_chat_reader.md`.
- **EVC-02175 decision:** 'process_signal_send' now executes deterministic dispatch pipeline: 1. validate channel and artifact contract 2. resolve address via address engine 3. create canonical queue entries 4. enqueue by deterministic ordering 5. emit decision-log entry payload `__Source: __ docs/archive/audit/MESSAGE_LAYER_BASELINE.md`.
- **EVC-04606 specification:** Prompt and queue automation must use the gate contract in 'docs/governance/PROMPT_GATE_CONTRACT.md'. `__Source: __ docs/governance/REPOX_TOOL_RULES.md`.
- **EVC-04777 specification:** Domain schemas live under 'schema/*/README.md' and are scoped to specific subsystems (economy, war, governance, world, etc.). This index intentionally focuses on the core, cross-cutting schemas that all systems defer to. `__Source: __ docs/reference/schema/SCHEMA_INDEX.md`.
- **EVC-05190 specification:** This task defines the minimum AIDE Capability Reality Ledger so future docs, queues, audits, Workbench projections, and agents do not overstate implementation status. `__Source: __ docs/repo/audits/AIDE_CAPABILITY_REALITY_LEDGER_01.md`.
- **EVC-05238 specification:** If a path can safely move, the target must use ownership nouns and the singular/plural grammar. If a path has unclear identity, ABI, runtime, policy, release, or language meaning, it remains deferred. `__Source: __ docs/repo/audits/NAME_00_NAMING_CANON_AUDIT.md`.
- **EVC-05289 specification:** The reconciliation therefore did not move the queue backward. It records 'STATUS-RECONCILE-02' as the current coordinator task, preserves product-spine and workflow-law evidence, and sets the executable next task to 'AIDE-WORKUNIT-SCHEMA-01'. `__Source: __ docs/repo/audits/STATUS-RECONCILE_02.md`.

1.9 8. Determinism, Replay, Evidence, and Provenance

Determinism is both runtime law and validation strategy: identical canonical inputs must yield identical authoritative outputs.

- **EVC-00694 decision:** [INFERENCE] The conclusion was not a finalized implementation but a working architecture: each simulation domain should be deterministic, fixed-point, content-driven, versioned, replayable, and integrated through clear read/write boundaries. `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00140 decision:** The visible chat generated many implementation-spec prompts across engine, platform, render, audio, systems, and the start of game. It also preserved important decisions: UTF-8 internal text, retro fallbacks, semantic versioning, build metadata policy... `_Source:_ docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00379 decision:** This chat developed a framework/provider strategy for Dominium. The user wanted to accelerate development with open-source code while preserving portability, modularity, extensibility, determinism, and future replaceability. The final architecture is... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00429 decision:** The best next action is to verify live repo state, then implement AIDE-STRUCTURE-00 and AIDE-ARCH-00 as non-invasive control-plane and architecture-constitution tasks. Do not start broad moves until contracts and inventories exist. Do not trust pasted... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__01_human_readable_report.md`.
- **EVC-00433 decision:** See DECISION-01 through DECISION-10 in the registers. The clearest user-accepted decisions are AIDE adoption and recycling existing material. `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md`.
- **EVC-00442 decision:** Ask: "Which decisions are accepted versus recommendations?", "Draft the AIDE-STRUCTURE-00 Codex prompt", "Design root_constitution.toml", "What repo facts must be verified?", "How should old XStack-style tools be recycled?", or "Turn this into Project... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.
- **EVC-00474 decision:** The final user action uploaded a preservation-package prompt. This response turns the visible chat into a human-readable report, registers, context packet, spec sheet, aggregator packet, audit, and downloadable ZIP. The main caveat is that many technical... `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__01_human_readable_report.md`.
- **EVC-00486 decision:** Additional points: DDAP/DIL is proposed; repo not inspected; conformance tests prove modularity; data compatibility must be formalized; generated output needs validation; future aggregation must preserve recommendation-vs-decision labels. `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__06_reader_brief.md`.
- **EVC-00517 decision:** The most important decisions were DECISION-03 through DECISION-10. The user accepted that XStack should remain Dominium's strict profile, not the public general system. AIDE should become the portable repo-native operating layer. AIDE's first product... `_Source:_ docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__01_human_readable_report.md`.

- **EVC-00724 decision:** A large set of prompts was then generated to lock down architecture, determinism, performance, schema governance, rendering, epistemic UI, sharding, interest sets, and fidelity projection. This became the Phase 1 hardening layer. Additional audit prompts... `_Source: docs/archive/conversations/_reader/by_chat/app_testx_codehygiene.md`.
- **EVC-00794 decision:** This chat was mainly about turning the **Dominium** game/engine from a broad, ambitious design into a coherent, Codex-ready architecture. The user had already explored many individual systems elsewhere or earlier in the same chat: railways, roadways... `_Source: docs/archive/conversations/_reader/by_chat/dominium_architecture_ii.md`.
- **EVC-00891 decision:** An assistant initially rewrote that prompt into a cleaner Codex-ready form. The user then corrected the process: **before generating prompts, the group needed to discuss the design**. That changed the status of the rewritten prompt. It became a useful... `_Source: docs/archive/conversations/_reader/by_chat/gui_binary_content.md`.
- **EVC-00996 decision:** The chat was then summarized into a knowledge base. After that, the user proposed an even deeper internal rule: use capabilities instead of versions for compatibility. The response accepted this as a stronger model: versions identify releases... `_Source: docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.
- **EVC-01180 decision:** 1. Is full CTest/T4 now green? Known answer from chat: no, not yet. It needs auditing and repair. 2. Are stale AuditX/identity evidence and launcher marker debt fixed? Last visible status said no or still pending. 3. Are raylib/SDL2/Lua providers... `_Source: docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework_01_human_readable_report.md`.
- **EVC-01241 decision:** Finally, the chat considered third-party acceleration. The user pasted advice about raylib, rgl, rlsw, raygui, raudio, SDL2, and Lua. The accepted doctrine was service-first and provider-backed: use these aggressively as seed providers, but fence their... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy_01_human_readable_report.md`.
- **EVC-01363 decision:** 1. Preserve all uncertainty labels. 2. Do not restart Omega/Xi/Pi unless the user explicitly asks. 3. Treat user-reported repo status as user-reported fact, not independently verified truth. 4. Verify live repo reality before exact implementation plans... `_Source: docs/archive/conversations/omega_xi_pi_architecture_future/dominium_omega_xi_pi_architecture_future_proofing_planning_10_accompanying_human_readable_detailed_summary_and_report.md`.
- **EVC-00003 specification:** 1. 'docs/canon/constitution_v1.md' 2. 'docs/canon/glossary_v1.md' 3. 'AGENTS.md' 4. scope-specific canonical planning, semantic, schema, contract, release, and policy artifacts named by the active task 5. operational registries, projections, mirrors... `_Source: AGENTS.md`.
- **EVC-00018 specification:** AIDE and Codex are repo/control-plane harnesses and bounded patch execution surfaces. They help operate the repository; they do not replace canon, contracts, validation, or evidence. `_Source: README.md`.
- **EVC-00028 specification:** 1. Read the relevant canon, contract, and ownership documents. 2. Keep edits in the owning root. 3. Update contracts/schemas when behavior or compatibility meaning changes. 4. Run targeted validation plus 'git diff --check'. 5. Run fast strict when scope... `_Source: README.md`.
- **EVC-01066 specification:** Domino is the reusable deterministic substrate: execution ordering, storage, replay, ABI-facing boundaries, and engine mechanisms. Archived conversations consistently treat Domino as reusable infrastructure rather than a one-off game binary. `_Source: docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-00113 specification:** 1. User's canon: C89 engine, C++98 game, determinism, per-floor artifacts, no CRT mixing, no silent API creep. 2. Build complexity comes from many machines and historical toolchains. 3. More hand-written presets are not the optimal solution. 4. Build... `_Source: docs/archive/`

conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__06_reader_brief.md.

- **EVC-00215 specification:** The conversation established that Dominion should be treated as a long-lived deterministic platform: stable contracts, replaceable implementations, ownership-rooted layout, portable projections, and no accidental authority from paths, tools, UIs, or prompts. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__README_FIRST.md.`
- **EVC-00303 specification:** Verify Unreal capabilities, real Solar System data sources/licensing, planetary science models, determinism risks, sparse terrain tech, MMO scalability, and client-shared compute security. `__ Source: __ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__06_reader_brief.md.`
- **EVC-00366 specification:** 1. fast strict test tier; 2. public surface registry; 3. API/ABI canon; 4. dependency direction law; 5. command/refusal/result surface law; 6. diagnostic and evidence registry; 7. artifact identity law; 8. schema/protocol evolution law; 9... `__Source: __ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md.`
- **EVC-00391 specification:** The chat concluded that Dominion should use open-source code through providers, especially raylib, SDL2, Lua, raygui, raudio, rlgl, and rlsw, while preserving first-party simulation and contracts. It also defined a sparse deterministic delegated... `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md.`
- **EVC-00407 specification:** This package preserves the chat where Dominion's mainline architecture settled around C17 + C++17, 64-bit, little-endian, C-compatible ABI, deterministic law, provider/capability modularity, Workbench/AIDE governance, and support-tier/projection strategy. `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__09_in_chat_reader.md.`
- **EVC-00430 specification:** Reader Brief - Dominion Modularity, AIDE Refactorability, and Future-Proof Architecture `__Source: __ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md.`
- **EVC-00432 specification:** 1. The user wants Dominion built like a serious long-lived game/engine platform. 2. The goal is not just cleaner folders; it is long-term portability and refactorability. 3. A stable root constitution is needed. 4. New top-level roots should be refused... `__Source: __ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md.`
- **EVC-00435 specification:** Main questions: current live repo state; useful old tooling; stable API boundaries; reuse-level classification; generated artifact policy; which recommendations become formal requirements. `__ Source: __ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md.`
- **EVC-00437 specification:** Verify live repo head, CTest/validator status, referenced docs, old tool paths, component matrix names, and prior generated file availability. `__Source: __ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md.`
- **EVC-00438 specification:** In-Chat Reader - Dominion Modularity, AIDE Refactorability, and Future-Proof Architecture `__Source: __ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md.`
- **EVC-00443 specification:** AIDE-first control plane; recycle existing tools/docs/tests; paths are not identity; stable root constitution; product-line architecture; public API stability levels; deterministic proof matrix. `__`

Source: `__docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.

- **EVC-00482 specification:** Domino/Dominium future-proof architecture: standards-informed assurance, portability, modularity, extensibility, replaceability, public contracts, data compatibility, deterministic replay, testing, and preservation. `__Source: __docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__06_reader_brief.md`.
- **EVC-00514 specification:** The future relevance of this chat is high. It defines the operating doctrine for AIDE, the relationship between AIDE and XStack, the immediate Dominium cleanup sequence, the longer AIDE Q35-Q57 roadmap, the branch/commit/workunit discipline, the... `__Source: __docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__01_human_readable_report.md`.
- **EVC-00535 specification:** The decisions above are not all equally final. The strongest decisions are the separation of strict SemVer from SemVer-shaped release identifiers, the separation of product/suite/build/compatibility identities, and the rule that GBN/BII are provenance... `__Source: __docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__01_human_readable_report.md`.
- **EVC-00541 specification:** This chat designed a release identity/versioning architecture for Dominium/XStack. It moved from general versioning theory to a concrete layered model that separates strict SemVer components, SemVer-shaped product/suite release IDs, GBN/BII build... `__Source: __docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00542 specification:** 1. Do not solve release identity with one number. 2. Strict SemVer is only for declared public APIs/contracts. 3. Products and suites may use SemVer-shaped IDs without strict SemVer semantics. 4. Products and suites are separate entity classes. 5. GBN is... `__Source: __docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00550 specification:** This chat decided that Dominium/XStack should use a layered identity architecture: strict SemVer for public API components, SemVer-shaped release IDs for products/suites, GBN/BII/hash for exact provenance, manifests for canonical truth, and... `__Source: __docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.
- **EVC-00554 specification:** Preserve layered identity, strict SemVer scoping, product/suite separation, GBN/BII provenance, lifecycle/prerelease split, manifest authority, and capability-based internal compatibility. `__Source: __docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.
- **EVC-00610 specification:** Most important unresolved issue: Domino's exact role and capabilities are not defined in the visible chat. `__Source: __docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00707 specification:** The conversation began from a technical planning prompt for "Plan Part 6 - Advanced Simulation," where the user asked for an architecture covering heat simulation, power grids, fluids, atmospheres, vehicles, structural loads, destruction, and... `__Source: __docs/archive/conversations/_reader/by_chat/advanced_simulation_infrastructure.md`.
- **EVC-00780 specification:** The user then refined the problem by asking about C/C++ documentation best practices: block comments, inline comments, metadata, arguments, complexity, destructors, modifications, memory, registers, prohibitions, requirements, dependencies, and... `__Source: __docs/archive/conversations/_reader/by_chat/documentation_standards_readme.md`.

- **EVC-00819 specification:** The user then asked how the current GitHub repository 'julesc013/dominium' aligned with that old v1 contract and glossary, asking specifically: what do the docs say, and what does the code do? The assistant inspected the live repository through the... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_complete_conversation.md`.
- **EVC-00838 specification:** The provider strategy became service-first. Raylib, rlgl, rlsw, raygui, raudio, SDL2, and Lua can be used aggressively, but only as replaceable providers. Dominium owns service contracts, provider law, commands, saves, replays, packs, UI documents, and... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-00851 specification:** The central decision is that Workbench must not become semantic authority. Workbench is a surface over contracts, commands, services, documents, patches, providers, packs, modules, apps, artifacts, diagnostics, evidence, tests, and replay/proof. It is... `_Source:_ docs/archive/conversations/_reader/by_chat/domino_dominium_workbench.md`.
- **EVC-00859 specification: FACT:** The user began by establishing very strict architectural constraints. The **Domino Engine** must be ISO C89, deterministic, portable, fixed-point where determinism matters, and free of OS, platform, UI, rendering, or gameplay-semantic... `_Source:_ docs/archive/conversations/_reader/by_chat/domino_engine_refactor_prompts.md`.
- **EVC-00925 specification:** The live repo still needs verification. The exact AIDE files, contracts, validators, and migration tasks must be implemented. It remains unresolved which existing roots and tools map to which final homes, which APIs become stable, which code is reusable... `_Source:_ docs/archive/conversations/_reader/by_chat/modularity_aide_refactorability.md`.
- **EVC-00986 specification:** The conversation quickly shifted from simple prompt engineering toward harness engineering. The central lesson became that high-quality agentic development depends less on one perfect prompt and more on the surrounding system: repo instructions, task... `_Source:_ docs/archive/conversations/_reader/by_chat/refactor_control_plane.md`.
- **EVC-01054 specification:** The user is building Dominium / Domino, a deterministic universe simulation/game project. The project doctrine throughout the chat emphasized determinism, replayability, process-only mutation, named RNG streams, law-governed authority, and a strict... `_Source:_ docs/archive/conversations/_reader/by_chat/xstack_lab_galaxy.md`.
- **EVC-01131 specification:** The main outcome is a layered, data-driven design: Domino provides generic deterministic systems; Dominium provides products, GUI, launcher/setup/tools; content packs/mods define all actual gameplay data through TLV schemas. The user explicitly corrected... `_Source:_ docs/archive/conversations/architecture_codex_prompts/dominium_domino_architecture_codex_prompts__05_reader_brief.md`.
- **EVC-01222 specification:** This chat designed a documentation strategy and automation plan for a long-lived C/C++ systems codebase in the Dominium Game project context. It did not scan the repository or modify files. Its outputs were standards, examples, Codex prompts, and a... `_Source:_ docs/archive/conversations/documentation_standards_readme/documentation_standards_readme_handoff__05_reader_brief.md`.
- **EVC-01283 specification:** This chat designed and organized a major deterministic-engine refactor for Dominium/Domino. The user established that the Domino engine must remain ISO C89, deterministic, fixed-point where determinism matters, free of OS/UI/rendering/platform APIs, and... `_Source:_ docs/archive/conversations/domino_engine_refactor_prompts/dominium_domino_engine_refactor_prompts__05_reader_brief.md`.
- **EVC-01324 specification:** This chat preserved two connected Dominium / Domino planning threads. The first was CONTENT0, a data/schema/docs-only canonical content prompt for universe, Milky Way, Sol, Earth, populations, civilizations, economies, technology, history, and start... `_Source:_ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md`.

- **EVC-01366 specification:** The active nine-prompt pack focuses on C89/C++98 baseline enforcement, stable ABI/vtable facades, central capability registry, determinism grades, launcher profiles, CMake presets, null backends, Win32/win32-headless Tier-1 platform completion... `_Source: docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01369 specification:** Net handshake includes build ID, schema ID/version, determinism profile, content hashes. `_Source: docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01381 specification:** This chat refined the Dominium / Domino root README and produced a maximum-fidelity handoff for future continuation. Dominium / Domino is described as a deterministic, integer-math, multi-platform simulation game and engine. Domino is the deterministic... `_Source: docs/archive/conversations/readme_ports_determinism/dominium_readme_ports_determinism__05_reader_brief.md`.
- **EVC-00008 constraint:** do not perform silent migrations or compatibility reinterpretation `_Source: AGENTS.md`.
- **EVC-00426 constraint:** Topic 8 - Determinism, data, compatibility, and testing `_Source: docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__01_human_readable_report.md`.
- **EVC-00513 constraint:** AIDE itself also changed direction. It was first imagined broadly as an Automated Integrated Development Environment: perhaps a desktop app, extension family, multi-agent runtime, daemon, service, or control plane. Over time, the plan narrowed into... `_Source: docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__01_human_readable_report.md`.
- **EVC-00521 constraint:** This chat developed the architecture and migration strategy for AIDE, XStack, and Dominium. It started from improving AI coding workflows and ended with a concrete plan: AIDE becomes the repo-native operating/refactor control plane; XStack becomes... `_Source: docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__06_reader_brief.md`.

1.10 9. Contracts, Schemas, Packs, and Compatibility

Contracts and schemas define public meaning; packs and registries provide optional content and capabilities without executable authority.

- **EVC-00694 decision:** [INFERENCE] The conclusion was not a finalized implementation but a working architecture: each simulation domain should be deterministic, fixed-point, content-driven, versioned, replayable, and integrated through clear read/write boundaries. `_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00695 decision:** The user also made a clear versioning decision. **FACT:** The user wanted **major.minor.patch semantic versioning** for all components/packages and for the complete game package. The user explicitly did **not** want build numbers or build dates in... `_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00703 decision:** The user pasted the final README after those cleanup changes. At that point, the README had the current active form: deterministic constraints clarified, ports unified under one source hierarchy, '/ports' metadata-only if retained, Section 9 normative... `_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00110 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source: docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__01_human_readable_report.md`.

- **EVC-00330 decision:** This chat is a major planning pivot. It began with a Windows UI Editor/Tool Editor design and ended with a broader Dominium Workbench Platform architecture. The old editor plan is superseded as a final product. Its useful pieces should be recycled into... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__06_reader_brief.md`.
- **EVC-00334 decision:** This package preserves a chat that pivoted from a Windows UI Editor plan to a modular Dominium Workbench Platform architecture. It captures decisions, tasks, risks, artifacts, open questions, and spec-book integration guidance. `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__09_in_chat_reader.md`.
- **EVC-00395 decision:** This chat was a design-decision and architecture-baseline discussion for Dominium, focused on language standards, platform floors, binary architecture, portability strategy, and the project's long-term modular structure. The user began by asking whether... `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md`.
- **EVC-00403 decision:** This chat decided Dominium's modern language/platform architecture. The key outcome is C17 + C++17, 64-bit, little-endian, C-compatible ABI, deterministic fixed-width data, and provider/capability modularity. `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__06_reader_brief.md`.
- **EVC-00498 decision:** This report is reliable for explaining what was discussed in the visible chat. It is not proof that the real repository has the recommended structure, not proof that the user formally accepted every recommendation, and not a substitute for verifying the... `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__10_accompanying_detailed_summary_report.md`.
- **EVC-00547 decision:** Verify SemVer primary spec, repo/build files, OS/toolchain feasibility, final product/suite inventory, and capability-profile relationship. `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00716 decision:** The idea is attractive because it supports broad distribution and long-term extensibility. But it is not a final decision. Dynamic plugins introduce ABI, packaging, security, and platform restrictions. Static registration may be simpler. A hybrid may be... `_Source:_ docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md`.
- **EVC-00749 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source:_ docs/archive/conversations/_reader/by_chat/build_and_future_proofing.md`.
- **EVC-00794 decision:** This chat was mainly about turning the **Dominium** game/engine from a broad, ambitious design into a coherent, Codex-ready architecture. The user had already explored many individual systems elsewhere or earlier in the same chat: railways, roadways... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_ii.md`.
- **EVC-00846 decision:** Finally, the user retired the chat and asked for a maximum-fidelity context transfer packet. The assistant produced one. The user then asked for a downloadable shareable report package. The assistant created Markdown/YAML/report files and a ZIP. The user... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_setup.md`.
- **EVC-00860 decision:** After the architecture and prompts were created, the user asked for a maximum-fidelity context transfer packet. The assistant produced one. The user then asked for a downloadable report package; the assistant generated package files and a ZIP. The user... `_Source:_ docs/archive/conversations/_reader/by_chat/domino_engine_refactor_prompts.md`.

- **EVC-00898 decision:** This chat was a design-decision and architecture-baseline discussion for Dominium, focused on language standards, platform floors, binary architecture, portability strategy, and the project's long-term modular structure. The user began by asking whether... `_Source: docs/archive/conversations/_reader/by_chat/language_platform_architecture.md`.
- **EVC-00938 decision:** This chat was about rethinking Dominium from a conventional game project into a much broader, more modular, deterministic, extensible software environment. The user repeatedly asked whether the current plan was the best possible version, and the... `_Source: docs/archive/conversations/_reader/by_chat/os_interface_repo_architecture.md`.
- **EVC-00946 decision:** The central problem was not simply "write some code." The user wanted a carefully sequenced prompt pack that could guide Codex through a large, risky engine refactor without breaking the repository between steps. The plan had to respect strict... `_Source: docs/archive/conversations/_reader/by_chat/platform_renderer_api_plan.md`.
- **EVC-00956 decision:** That early answer was generated by the assistant, not stated by the user as a final decision. It matters because it introduced a very broad portability ambition, but it was later superseded by more practical platform planning. It should now be treated as... `_Source: docs/archive/conversations/_reader/by_chat/platform_support.md`.
- **EVC-00970 decision:** This chat was mainly about refining the root 'README.md' for the **Dominium / Domino** project and then preserving the resulting decisions in a form that could survive into later chats. The project, as described in the README, is a deterministic... `_Source: docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md`.
- **EVC-00980 decision:** The user then shifted from architecture implementation to preservation. They asked for prompts that would cause Codex to generate starter prompts for future ChatGPT conversations, including an extended master starter prompt. Finally, they asked for a... `_Source: docs/archive/conversations/_reader/by_chat/refactor_architecture.md`.
- **EVC-01275 decision:** This chat was primarily about the Dominium / Domino Setup system: a deterministic, auditable, reversible installer/updater/verifier/rollback authority. It began with cross-platform setup architecture and directory planning, then shifted to canonical... `_Source: docs/archive/conversations/dominium_setup/dominium_setup_handoff__05_reader_brief.md`.
- **EVC-01330 decision:** Define the GUI/binary architecture doctrine and backend/UI contract first, then map products and platforms into matrices. Do not generate code or final prompts until those decisions are explicit. `_Source: docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md`.
- **EVC-01365 decision:** This chat built a continuity-safe implementation plan for the Dominium/Domino engine. The user wanted ready-to-run prompts for Codex CLI / VS Code Codex running GPT-5.2 on Windows at 'c:\Inbox\Git Repos\dominium', with no interactive approvals and no... `_Source: docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01368 decision:** Final active plan is the 9-prompt pack, not earlier superseded plans. `_Source: docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01372 decision:** Download this package, then if continuing implementation, inspect the repo/archive and run Final Prompt 1 in Codex. `_Source: docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01378 decision:** DECISION-10: Use platform contracts/support matrix rather than an undifferentiated "support everything" claim. (INFERENCE; assistant-proposed; strongly implied by scope). `_Source: docs/archive/conversations/platform_support/dominium_platform_support_planning__05_reader_brief.md`.

- **EVC-01384 decision:** Final README keeps '/ports' only as metadata/build config/capability descriptors, but this may need confirmation. `__Source: __ docs/archive/conversations/readme_ports_determinism/dominium_readme_ports_determinism__05_reader_brief.md`.
- **EVC-00023 specification:** The active portability floor includes Windows 7 SP1, macOS 10.9.5, and Linux. C++17 language mode is allowed, but public ABI surfaces do not expose C++ classes, STL types, exceptions, RTTI, allocator objects, or compiler object layout. `__Source: __ README.md`.
- **EVC-00024 specification:** Fast strict is the normal development gate. Extended, release, and full proof tiers are separate gates defined by 'contracts/testing/test_tiers.contract.toml'. A green fast strict result does not claim full certification. `__Source: __ README.md`.
- **EVC-00035 specification:** Packs provide capabilities, data, and assets; executables do not embed content. `__Source: __ docs/README.md`.
- **EVC-01459 specification:** Foundation Lock means the governance spine exists, validates in required scope, is documented, and is integrated with the normal fast strict proof gate. It allows only narrow product slices that obey the public surface, command, diagnostics, artifact... `__Source: __ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-01065 specification:** Conversation-derived context: the archive expands that picture into a long-horizon product ecosystem: engine substrate, official game/domain layer, Workbench, setup/launcher, content packs, portability, release identity, and repo-governed assistant... `__Source: __ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-01078 specification:** 'governance' (44 conversations): authority order, canon, contracts, refusal, review gates, and agent operation. - **EVC-00168 specification:** Domino engine, Dominion product/game layer, Repository structure, ABI/API spine, Platform API and backends, Renderer API and backends, Audio API and backends, Unified UI system, Product contracts and runtime selection, Packages, instances, mods, packs... `_Source:_ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md`.
- **EVC-00280 specification:** The user then gave the project its strongest identity. Humans sent a robotic mothership to another solar system. It lands, manufactures robot bodies, and begins rebuilding civilisation. Players spawn as robots from physical machines. They can choose... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md`.
- **EVC-00288 specification:** 1. **Exact launch scope:** The user used broad language around solar systems, galaxies, universes, and multiverses. The first official scope still needs to be chosen. 2. **Planet generator schema:** The exact physical parameters, realism scoring, and... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00316 specification:** The user then asked about portability, modularity, extensibility, naming, schemas, protocols, ABI, APIs, and directory structure. The discussion established that the real problem is not just folders; it is engineering law. Public surfaces, ABI rules... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion__human_readable_detailed_summary_report.md`.
- **EVC-00366 specification:** 1. fast strict test tier; 2. public surface registry; 3. API/ABI canon; 4. dependency direction law; 5. command/refusal/result surface law; 6. diagnostic and evidence registry; 7. artifact identity law; 8. schema/protocol evolution law; 9... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md`.
- **EVC-00380 specification:** 1. Use the framework approach, not a monolithic fork. 2. Domino Framework defines contracts and provider ABI. 3. A Domino engine implementation provides services. 4. Dominion is one game implementation using those services. 5. raylib is a first visible... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00382 specification:** Top tasks: verify repo baseline, draft framework ABI, add provider manifests, add forbidden include validator, implement null providers, implement raylib providers, create profiles, and define work-lease/CAD schemas. `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.

- **EVC-00383 specification:** Main open questions: dependency versions, C17/C++17 repo state, Lua version, framework ABI, profile order, deterministic class, license policy, CAD graph scope, and distributed compute verification. `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md.`
- **EVC-00385 specification:** Verify repository state, raylib/SDL2/Lua versions and platform support, licenses for reference projects, and any second-wave dependency licenses. `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md.`
- **EVC-00391 specification:** The chat concluded that Dominium should use open-source code through providers, especially raylib, SDL2, Lua, raygui, raudio, rgl, and rls, while preserving first-party simulation and contracts. It also defined a sparse deterministic delegated... `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md.`
- **EVC-00392 specification:** Ask next: "Draft DOMINO-FRAMEWORK-WEDGE-01," "Define the provider ABI header," "Verify repo C17/C++17 state," "Design the work-lease protocol," "Create raylib/SDL/Lua provider manifests," or "Turn this into a spec book chapter." `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md.`
- **EVC-00396 specification:** Another major thread was modularity. The user wanted code, data, modules, packs, tools, apps, and Workbench to integrate cleanly and be reusable. The answer became a contract-centered composition model: apps compose modules; modules require services... `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md.`
- **EVC-00404 specification:** 1. C17 + C++17 is the mainline direction. 2. C89/C++98 is superseded for mainline, preserved only for retro/projection/archive thinking. 3. Pure C99 was rejected as too weak for Dominium-scale modularity. 4. Pure C++11 was rejected as unnecessarily... `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__06_reader_brief.md.`
- **EVC-00407 specification:** This package preserves the chat where Dominium's mainline architecture settled around C17 + C++17, 64-bit, little-endian, C-compatible ABI, deterministic law, provider/capability modularity, Workbench/AIDE governance, and support-tier/projection strategy. `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__09_in_chat_reader.md.`
- **EVC-00410 specification:** Draft the architecture profile contract for 64-bit/little-endian/source-native tiers. `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__09_in_chat_reader.md.`
- **EVC-00411 specification:** Design the first composition resolver schema. `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__09_in_chat_reader.md.`
- **EVC-00412 specification:** C17 + C++17 mainline; C-compatible ABI; deterministic fixed-width law; 64-bit source-native; little-endian; providers not identity; Workbench not authority; Foundation blocker first. `__Source: __ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__09_in_chat_reader.md.`

1.11 10. Client, Server, Launcher, Setup, and Workbench

Product shells compose services and project truth; they do not define simulation authority by themselves.

- **EVC-00690 decision:** 'DECISION-0003': What disposition should be chosen for this unresolved claim: Future work must define the client's allowed dependency surface and whether it can access any simulation-adjacent prediction layer.? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md.`
- **EVC-00697 decision:** This context matters because the rest of the conversation happened inside those constraints. The launcher could not become a dumping ground for OS-specific behavior, sim mutation, renderer decisions, or nondeterministic game-state changes. It had to fit... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md.`
- **EVC-00698 decision:** The user then redirected the entire plan. They argued that native OS widget GUI tools already exist through Visual Studio, Xcode, etc. The project needed a cross-platform rendered tool environment that uses the same CLI, TUI, and rendered GUI systems as... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md.`
- **EVC-00295 decision:** Future chats might incorrectly treat every brainstorm item as a final decision, especially assistant recommendations. They might over-focus on Unreal and ignore Domino's need for deterministic data/simulation. They might reintroduce worker NPC labour... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__01_human_readable_report.md.`
- **EVC-00321 decision:** A second major theme was unification of presentation surfaces. The user wanted CLI, TUI, rendered GUI, and OS-native GUI to share code and semantics. The decision emerged that these should not be four separate systems. Instead, all products should expose... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__01_human_readable_report.md.`
- **EVC-00330 decision:** This chat is a major planning pivot. It began with a Windows UI Editor/Tool Editor design and ended with a broader Dominium Workbench Platform architecture. The old editor plan is superseded as a final product. Its useful pieces should be recycled into... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__06_reader_brief.md.`
- **EVC-00334 decision:** This package preserves a chat that pivoted from a Windows UI Editor plan to a modular Dominium Workbench Platform architecture. It captures decisions, tasks, risks, artifacts, open questions, and spec-book integration guidance. `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__09_in_chat_reader.md.`
- **EVC-00338 decision:** What was the biggest decision in this chat? `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__09_in_chat_reader.md.`
- **EVC-00363 decision:** A recurring theme was urgency. The user repeatedly expressed that the directory and root-structure cleanup had taken too long, and at points threatened to manually drag/drop folders if the assistant and Codex process failed to produce real progress. That... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md.`
- **EVC-00505 decision:** This chat was a detailed architecture and refactor planning session for the Dominium + Domino project. The central result is a stable separation between **Domino**, the deterministic engine under 'source/domino', and **Dominium**, the product suite under... `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md.`
- **EVC-00643 decision:** 1. treating the Universe Explorer as a normal renderer/free-camera task; 2. ignoring the current queue and trying to implement broad Workbench UI or gameplay; 3. restarting broad repo structure cleanup; 4. treating assistant recommendations as accepted... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md.`

- **EVC-00646 decision:** This report is not a perfect raw transcript substitute. It reconstructs the working state from the visible conversation, user-pasted transcripts, assistant outputs, repo-state checks performed in this chat, and the final uploaded preservation... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__01_human_readable_report.md`.
- **EVC-00659 decision:** This preservation package explains the conversation, records the current task state, preserves decisions and rejected options, and prepares the chat for aggregation into a master Project Spec Book. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00660 decision:** Read: 1. Human-readable report for full understanding. 2. Context transfer packet for continuing in a new chat. 3. Spec sheet for aggregation. 4. Registers for task/decision tracking. 5. Verification/audit before relying on the state. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00668 decision:** The conclusion was not to globally simulate everything. Instead, the architecture should support deterministic lazy historical evaluation: `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__10_accompanying_detailed_summary.md`.
- **EVC-00738 decision:** This chat was a strategic architecture and design convergence session for Dominium/Domino. It began from a transferred knowledge base about rebuilding Dominium's GUI and binary strategy, then evolved into a broad platform-specification discussion... `_Source:_ docs/archive/conversations/_reader/by_chat/architecture_ui_providers.md`.
- **EVC-00812 decision:** A central decision was to separate the project into two conceptual layers. **Domino** is the reusable engine layer: platform abstraction, renderer abstraction, audio, UI, core services, package/instance management, simulation control, events, plugins... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iv.md`.
- **EVC-00834 decision:** The discussion then moved into AIDE. The user wanted to automate as much as possible through Codex and AIDE. We developed a task operating model: AIDE creates WorkUnits, tracks attempts, blockers, evidence, repairs, resumes, checkpoints, and promotion... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-01020 decision:** The assistant recommended against starting directly on UE6 because public technical access and production documentation were not treated as available in the visible chat. This was not framed as a permanent rejection of UE6. It was a timing decision: do... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01118 decision:** Module/plugin/framegraph/support-tier ideas are proposals, not accepted final decisions. `_Source:_ docs/archive/conversations/app_runtime_platform_renderers/dominium_app0_runtime_platform_renderers__05_reader_brief.md`.
- **EVC-01145 decision:** The final UI/UX synthesis connects directly to that premise. The interface should feel like a robot operating system. The player boots into an OS, connects to a universe, downloads consciousness into a fabricated robot body, and disconnects into... `_Source:_ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__01_human_readable_report.md`.
- **EVC-01241 decision:** Finally, the chat considered third-party acceleration. The user pasted advice about raylib, rlg1, rlsw, raygui, raudio, SDL2, and Lua. The accepted doctrine was service-first and provider-backed: use these aggressively as seed providers, but fence their... `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__01_human_readable_report.md`.

- **EVC-01254 decision:** This package preserves the chat's substance, decisions, tasks, constraints, artifacts, risks, open questions, and future handoff material. The main report is human-readable. Registers and YAML are for aggregation. `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__09_in_chat_reader.md.`
- **EVC-01261 decision:** The user accepted that the old UI Editor/Tool Editor were good general ideas but bad final products. The new direction became a cross-platform rendered Workbench that uses the same runtime, renderer, UI, command, pack, and diagnostics systems as the... `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md.`
- **EVC-01302 decision:** The key accepted decision is Milestone 0 first. The key architectural direction is contract-driven deterministic substrate with game/product layers on top. `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__06_reader_brief.md.`
- **EVC-01325 decision:** The second and current main thread was GUI and binary planning. The user decided to redo GUIs from scratch. Every product should always work through CLI, is expected to work through TUI, and may have multiple modular GUIs attached to product backends to... `_Source:_ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md.`
- **EVC-01373 decision:** This chat was about platform support planning for Dominium. It started with broad questions about what systems and operating systems Dominium could support, then expanded into a large device-family inventory covering PlayStation, Xbox, Nintendo, PC... `_Source:_ docs/archive/conversations/platform_support/dominium_platform_support_planning__05_reader_brief.md.`
- **EVC-00017 specification:** Dominium is the official game, product, and domain layer on top of Domino. It defines rules, process meaning, law targets, domain interpretation, authored content use, and product composition. `_Source:_ README.md.`
- **EVC-00683 specification:** What disposition should be chosen for this unresolved claim: Future work must define the client's allowed dependency surface and whether it can access any simulation-adjacent prediction layer.? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md.`
- **EVC-01065 specification:** Conversation-derived context: the archive expands that picture into a long-horizon product ecosystem: engine substrate, official game/domain layer, Workbench, setup/launcher, content packs, portability, release identity, and repo-governed assistant... `_Source:_ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md.`
- **EVC-01075 specification:** Domino is the deterministic substrate. Dominium is the official game, product, and domain layer. Workbench is a governed validation and inspection environment. Setup and launcher compose product instances. Tools validate, generate, audit, and migrate... `_Source:_ docs/archive/conversations/_synthesis/FULL_PROJECT_PICTURE_v0.md.`
- **EVC-01086 specification:** The archive describes Dominium as a long-horizon deterministic simulation product: a game, engine-backed operating environment, validation workbench, content platform, and governance-heavy repository. Across the conversations, the recurring intent is not... `_Source:_ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md.`
- **EVC-01088 specification:** Repo truth keeps Engine, Game, Client, Server, Workbench, setup, launcher, tools, contracts, and content in separate roles. Conversation-derived material reinforces the boundary: renderer and UI project state, clients issue intents, server/game/engine... `_Source:_ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md.`
- **EVC-00331 specification:** Top things to know: 1. Workbench is not authority; it is a projection over contracts/services/commands/documents/evidence. 2. CLI, TUI, rendered GUI, native GUI, and headless should share one semantic spine. 3. TUI is first-class. 4. Rendered GUI is... `_Source:_ docs/archive/`

conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__06_reader_brief.md.

- **EVC-00380 specification:** 1. Use the framework approach, not a monolithic fork. 2. Domino Framework defines contracts and provider ABI. 3. A Domino engine implementation provides services. 4. Dominium is one game implementation using those services. 5. raylib is a first visible... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00396 specification:** Another major thread was modularity. The user wanted code, data, modules, packs, tools, apps, and Workbench to integrate cleanly and be reusable. The answer became a contract-centered composition model: apps compose modules; modules require services... `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md`.
- **EVC-00404 specification:** 1. C17 + C++17 is the mainline direction. 2. C89/C++98 is superseded for mainline, preserved only for retro/projection/archive thinking. 3. Pure C99 was rejected as too weak for Dominium-scale modularity. 4. Pure C++11 was rejected as unnecessarily... `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__06_reader_brief.md`.
- **EVC-00450 specification:** 1. Should 'engine' remain the physical name while being conceptually treated as kernel, or should a future rename be considered? 2. What exact schema should define 'module_descriptor_v1'? 3. How should rendered-mode capability law be updated without... `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__01_human_readable_report.md`.
- **EVC-00606 specification:** Client compute must not commit persistent MMO outcomes. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00655 specification:** This chat preserved and refined the architecture, repo-control strategy, Workbench plan, AIDE development model, and immediate product-spine task sequence for Dominium. It established Dominium as a deterministic, contract-governed simulation platform... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__06_reader_brief.md`.
- **EVC-00664 specification:** Which parts should become spec requirements? `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00666 specification:** **Date anchor:** 2026-05-27 Australia/Melbourne **Source scope:** This chat only unless explicitly labelled as PROJECT-CONTEXT. **Reliability note:** This report reconstructs the visible conversation, the user-pasted transcripts, the generated handoff... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__10_accompanying_detailed_summary.md`.
- **EVC-00838 specification:** The provider strategy became service-first. Raylib, rlgl, rlsw, raygui, raudio, SDL2, and Lua can be used aggressively, but only as replaceable providers. Dominium owns service contracts, provider law, commands, saves, replays, packs, UI documents, and... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-00851 specification:** The central decision is that Workbench must not become semantic authority. Workbench is a surface over contracts, commands, services, documents, patches, providers, packs, modules, apps, artifacts, diagnostics, evidence, tests, and replay/proof. It is... `_Source:_ docs/archive/conversations/_reader/by_chat/domino_dominium_workbench.md`.

- **EVC-00979 specification:** This conversation matters as historical context for the topics tagged here: architecture, content, contracts_schema, platform, release, setup_launcher, simulation, timekeeping, tooling, ui, workbench. Its value is explanatory and evidentiary, not... `_Source: docs/archive/conversations/_reader/by_chat/refactor_architecture.md`.
- **EVC-01023 specification:** The first topic was whether Dominium should be made on UE6 instead of Domino. The answer separated availability from suitability. UE6 was treated as not yet available enough for production planning. UE5 was treated as a practical near-term... `_Source: docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01034 specification:** This chat was a high-level Dominium planning, recovery, repo-audit, and forward-strategy session. The user began by pasting substantial prior discussion from earlier Dominium chats. Those excerpts covered the project's deep simulation architecture: total... `_Source: docs/archive/conversations/_reader/by_chat/universe_explorer_planning.md`.
- **EVC-01108 specification:** [FACT] The key late requirement is no grid lock: the engine should support arbitrary position, rotation, inclination, and full 3D curves. Grids are optional Dominium UI snapping aids only. Determinism should come from fixed-point math, quantized... `_Source: docs/archive/conversations/advanced_simulation_infrastructure/dominium_advanced_simulation_infrastructure_architecture_05_reader_brief.md`.
- **EVC-01140 specification:** Future relevance: this chat should feed several chapters of a master Project Spec Book, including architecture doctrine, repo layout, provider strategy, renderer plan, language/toolchain baseline, UI/Workbench platform, Robot OS UX, and game design... `_Source: docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy_01_human_readable_report.md`.
- **EVC-01168 specification:** 1. The user wanted to end months of structure churn and get back to building real systems. 2. The top-level root model is now settled and should not be casually changed. 3. No first-party 'src/' or 'source/' wrappers. 4. Domino is the reusable... `_Source: docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation_06_reader_brief.md`.
- **EVC-01184 specification:** 1. Domino is the reusable deterministic/runtime substrate. 2. Dominium is the game/product family built on Domino. 3. Workbench is a production/evidence/editor surface, not authority. 4. AIDE is the repo/control-plane harness. 5. The canonical root model... `_Source: docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework_06_reader_brief.md`.
- **EVC-01248 specification:** The repo/task planning thread evolved through many reported states. Foundation Lock passed with warnings; package mount, replay proof, barebones client, product-spine review, AIDE workflow law, WorkUnit schema, dev/main policy, checkpoint loop... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy_01_human_readable_report.md`.
- **EVC-01276 specification:** The most important outcome is that setup is the only component allowed to install files, modify installation/system state, verify/repair installations, perform rollback, and enforce package layout. Launcher may invoke setup and read its outputs, but may... `_Source: docs/archive/conversations/dominium_setup/dominium_setup_handoff_05_reader_brief.md`.
- **EVC-01301 specification:** 1. Domino should be the reusable deterministic substrate. 2. Dominium should be one game/rules/product layer on top. 3. The engine substrate is real, but not a finished playable engine. 4. The client advertises 'support_claim_playable=false'. 5. The... `_Source: docs/archive/conversations/engine_baseline_architecture/dominio_dominium_engine_baseline_architecture_06_reader_brief.md`.
- **EVC-00315 constraint:** The conversation then described how layout, controls, themes, styles, views, and projections should be modular. The answer was a layered UI architecture: view model, view document, style/

theme tokens, runtime controls/widgets/layouts, and renderer... [_Source: docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion_human_readable_detailed_summary_report.md](#).

- **EVC-00323 constraint:** The chat opened with the user asking for help designing an internal "Tool Editor" that could visually design pixel-perfect UIs and broad-strokes functionality for setup, launcher, game, and other tools. The first questions focused on platforms... [_Source: docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning_01_human_readable_report.md](#).
- **EVC-00350 constraint:** This chat was about getting Dominium out of endless repo refactor and into governed product work. It preserved the architecture, task queue, constraints, and next steps. [_Source: docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation_06_reader_brief.md](#).
- **EVC-00372 constraint:** The third major theme was service-first architecture. Earlier suggestions used paths like 'runtime/render/raylib', but the conversation refined that to 'runtime/<service>/providers/<provider>'. The intended services include platform, input, render, draw... [_Source: docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture_01_human_readable_report.md](#).
- **EVC-00399 constraint:** The immediate plan is not more doctrine. The next active task is **FOUNDATION-REPAIR-DEPENDENCY-DIRECTION-01**. It should classify the 358 dependency-direction violations and 38 warnings, repair real boundary leaks, add only narrow justified exceptions... [_Source: docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline_01_human_readable_report.md](#).
- **EVC-00652 constraint:** Current expected state from this chat: Foundation Lock is 'PASS_WITH_WARNINGS', fast strict passes, dependency-direction strict has 0 violations with known warnings, full CTest remains T4/full-gate debt, and broad feature work remains blocked... [_Source: docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning_01_human_readable_report.md](#).

1.12 11. UI, Renderer, Native GUI, and Presentation Boundaries

Presentation is downstream of truth and perception; renderer and UI surfaces must not enforce authority or mutate truth.

- **EVC-00697 decision:** This context matters because the rest of the conversation happened inside those constraints. The launcher could not become a dumping ground for OS-specific behavior, sim mutation, renderer decisions, or nondeterministic game-state changes. It had to fit... [_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md](#).
- **EVC-00698 decision:** The user then redirected the entire plan. They argued that native OS widget GUI tools already exist through Visual Studio, Xcode, etc. The project needed a cross-platform rendered tool environment that uses the same CLI, TUI, and rendered GUI systems as... [_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md](#).
- **EVC-00259 decision:** A later assistant response refined the architecture around three roles: Domino as deterministic simulation, Unreal as renderer/client/tooling, and Dominium as game rules. It also drew a feasibility boundary: millions of users can exist across a logical... [_Source: docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture_10_accompanying_detailed_summary_and_report.md](#).
- **EVC-00267 decision:** The first major conclusion was architectural. The assistant recommended that Dominium should not be built as one giant live Unreal scene. Instead, **Dominio should be a deterministic simulation/data engine**, and Unreal or another graphics engine should... [_Source: docs/archive/](#)

conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_human_readable_detailed_summary_report.md.

- **EVC-00330 decision:** This chat is a major planning pivot. It began with a Windows UI Editor/Tool Editor design and ended with a broader Dominium Workbench Platform architecture. The old editor plan is superseded as a final product. Its useful pieces should be recycled into... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__06_reader_brief.md`.
- **EVC-00334 decision:** This package preserves a chat that pivoted from a Windows UI Editor plan to a modular Dominium Workbench Platform architecture. It captures decisions, tasks, risks, artifacts, open questions, and spec-book integration guidance. `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__09_in_chat_reader.md`.

- **EVC-00806 decision:** The prior assistant summarized these files as containing two different launcher concepts: an engine-rendered launcher view and a native Win32 launcher. It also claimed the CMake file built the Win32 source for non-Windows targets. However, this report... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iii.md`.
- **EVC-00812 decision:** A central decision was to separate the project into two conceptual layers. **Domino** is the reusable engine layer: platform abstraction, renderer abstraction, audio, UI, core services, package/instance management, simulation control, events, plugins... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_architecture_iv.md`.
- **EVC-00834 decision:** The discussion then moved into AIDE. The user wanted to automate as much as possible through Codex and AIDE. We developed a task operating model: AIDE creates WorkUnits, tracks attempts, blockers, evidence, repairs, resumes, checkpoints, and promotion... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.

- **EVC-00835 decision:** The final part of the conversation dealt with repo status and task queue. The user pasted status reports indicating that 'PRESENTATION-CONTRACT-01' completed with warnings, and then chose to generate six maintenance prompts before replanning... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-00846 decision:** Finally, the user retired the chat and asked for a maximum-fidelity context transfer packet. The assistant produced one. The user then asked for a downloadable shareable report package. The assistant created Markdown/YAML/report files and a ZIP. The user... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_setup.md`.
- **EVC-01011 decision:** The conversation then moved from the general 2038 problem into representation design. The user clarified that they did not need millions of years of date support, only roughly 10,000 years into the future and past. This turned the problem into a... `_Source:_ docs/archive/conversations/_reader/by_chat/timekeeping_and_2038_resilience.md`.
- **EVC-01112 decision:** Most important: actual repo structure, existing GPT-5.2 refactor plan contents, final Q formats, orientation representation, grid assumptions in current code, microsegment length, packing VM instruction set, bridge/tunnel ownership, and checksum rules. `_Source:_ docs/archive/conversations/advanced_simulation_infrastructure/dominium_advanced_simulation_infrastructure_architecture_05_reader_brief.md`.
- **EVC-01156 decision:** Read file 01 first if you want to understand what happened. Read file 04 if you need tasks and decisions. Read file 05 if merging into a master Project Spec Book. Read file 07 before treating external support claims as implementation truth. `_Source:_ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy_09_in_chat_reader.md`.
- **EVC-01254 decision:** This package preserves the chat's substance, decisions, tasks, constraints, artifacts, risks, open questions, and future handoff material. The main report is human-readable. Registers and YAML are for aggregation. `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy_09_in_chat_reader.md`.
- **EVC-01325 decision:** The second and current main thread was GUI and binary planning. The user decided to redo GUIs from scratch. Every product should always work through CLI, is expected to work through TUI, and may have multiple modular GUIs attached to product backends to... `_Source:_ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff_05_reader_brief.md`.
- **EVC-01399 decision:** The chat produced a large set of Codex prompts, not verified implementation. These include an 11-prompt foundational plan, a final UI Editor implementation prompt, a six-prompt UU plan for import/CLI/ops/launcher/setup/hardening, and an IDE live-editing... `_Source:_ docs/archive/conversations/ui_editor_tool_editor_planning/dominium_ui_editor_tool_editor_planning_05_reader_brief.md`.
- **EVC-00701 specification:** The 32-bit question followed. The answer was to make full native products 64-bit and keep 32-bit as constrained or projection support only. The key caveat was not to make native pointer size part of game law. Save, replay, network, IDs, and renderer IR... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00163 specification:** This chat defined and refined the architecture and implementation roadmap for the Dominium game and the reusable Domino engine. It moved from earlier platform/render/launcher/setup/game planning into a more rigorous ABIs-first roadmap. The current plan... `_Source:_ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV_05_reader_brief.md`.
- **EVC-00420 specification:** Actual repo, build system, dsys/dgfx APIs were not inspected. `_Source:_ docs/archive/conversations/Launcher_Setup_Architecture/Dominium_Launcher_Setup_Architecture_05_reader_brief.md`.
- **EVC-00469 specification:** The fourth level was reality checking. The user asked how the current repo code actually works from process start to client UI/world interaction. The audit found that the repo has real modular scaffolding: native product targets, an engine library, a... `_Source:_ docs/archive/conversations/OS_`

Interface Repo Architecture/Dominium_OS_Interface Repo Architecture__10_accompanying_detailed_summary_report.md.

- **EVC-00631 specification:** Verify latest queue. If unchanged, proceed with 'PRESENTATION-CONTRACT-01'; then draft 'UNIVERSE-EXPLORER-CONTRACT-01'. __Source:__ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__06_reader_brief.md.
- **EVC-00664 specification:** Which parts should become spec requirements? __Source:__ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md.
- **EVC-00971 specification:** The chat began with the user pasting what they called the latest README. That README already had a strong direction: deterministic C89 engine core, C++98 higher layers, fixed-point math, bit-identical simulation across platforms, sparse planetary-scale... __Source:__ docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md.
- **EVC-01301 specification:** 1. Domino should be the reusable deterministic substrate. 2. Dominium should be one game/rules/product layer on top. 3. The engine substrate is real, but not a finished playable engine. 4. The client advertises 'support_claim_playable=false'. 5. The... __Source:__ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__06_reader_brief.md.
- **EVC-00315 constraint:** The conversation then described how layout, controls, themes, styles, views, and projections should be modular. The answer was a layered UI architecture: view model, view document, style/theme tokens, runtime controls/widgets/layouts, and renderer... __Source:__ docs/archive/conversations/Domino_Workbench/dominium_workbench_full_conversation_companion_human_readable_detailed_summary_report.md.
- **EVC-00644 constraint:** > Verify the latest repo queue and Foundation Lock, then draft 'PRESENTATION-CONTRACT-01' if it is not complete; if it is complete, draft 'UNIVERSE-EXPLORER-CONTRACT-01' as a planning artifact, preserving Workbench projection discipline... __Source:__ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md.
- **EVC-00721 constraint:** Verify every implementation, platform, tooling, release, and queue claim against current repo artifacts. __Source:__ docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md.
- **EVC-00805 constraint:** The user then specified another important constraint: **FACT:** the launcher backend should be C89, while frontend code for each binary can use C++98. The user also said client/server binaries can have single-system support. __Source:__ docs/archive/conversations/_reader/by_chat/dominium_architecture_iii.md.
- **EVC-00836 constraint:** Verify live repo state, then review/run 'FULL-GATE-LEGACY-TEST-ROUTE-01', then generate 'PACK-INTERNAL-LAYOUT-CANON-01' if the queue/status supports the maintenance lane. __Source:__ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md.
- **EVC-00960 constraint:** UNCERTAIN / UNVERIFIED: XR was never promoted to top-tier. Its priority remains unresolved. Future work should not let XR quietly expand the scope of the main product unless the user explicitly elevates it. __Source:__ docs/archive/conversations/_reader/by_chat/platform_support.md.
- **EVC-00984 constraint:** The user opened with a long "new thread" prompt framing this as the **Graphics / UI / UX / Packs Architecture Thread** for Dominium + Domino. The explicit scope was visual and audio presentation: rendering architecture, UI framework, graphics packs... __Source:__ docs/archive/conversations/_reader/by_chat/refactor_architecture.md.

- **EVC-01138 constraint:** Plain-language limitation: this package reconstructs the conversation available in this chat, including user-pasted prior-chat transcripts and the assistant's responses here. It does not claim independent access to every old chat or every latest repo... `__Source: __ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__01_human_readable_report.md.`
- **EVC-01326 constraint:** The next chat should not start coding. It should first define GUI/binary doctrine, the shared backend/UI contract, product matrix, platform matrices, compatibility lanes, visual profiles, packaging strategy, and build/toolchain verification plan. `__Source: __ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md.`
- **EVC-01332 constraint:** This chat focused on the Dominium / Domino application layer, especially the Dominium Launcher. It began with the user asking whether the post-Plan 8 system could support a fast, native-feeling, cross-platform launcher with one common codebase and... `__Source: __ docs/archive/conversations/launcher_app_layer/dominium_launcher_app_layer_handoff__05_reader_brief.md.`
- **EVC-00702 prohibition:** The discussion proposed target-based CMake and module boundaries rather than path mythology. Public headers, private headers, allowed dependencies, and forbidden dependencies should be explicit. Apps must remain thin. Engine must not depend on... `__Source: __ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md.`
- **EVC-00320 prohibition:** If you want to continue this work, do not restart with UI Editor. Start from Workbench and the presentation spine. `__Source: __ docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion__human_readable_detailed_summary_report.md.`
- **EVC-00452 prohibition:** The code audit concluded that the current repo is modular at source/build level and partly data-driven through registries and validators, but not yet a fully data-driven moddable runtime. The client still has hard-coded help, command descriptors, session... `__Source: __ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__01_human_readable_report.md.`
- **EVC-00809 prohibition:** Do not assume unresolved items are safe to implement. `__Source: __ docs/archive/conversations/_reader/by_chat/dominium_architecture_iii.md.`
- **EVC-00841 prohibition:** Do not assume unresolved items are safe to implement. `__Source: __ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md.`
- **EVC-00854 prohibition:** If you want to continue this work, do not restart with UI Editor. Start from Workbench and the presentation spine. `__Source: __ docs/archive/conversations/_reader/by_chat/dominio_dominium_workbench.md.`
- **EVC-01125 prohibition:** UI is data (UI IR), never business logic. `__Source: __ docs/archive/conversations/app_testx_codehygiene/dominium_app_testx_codehygiene_handoff__05_reader_brief.md.`
- **EVC-01174 prohibition:** This chat was a long-running architecture and repository-convergence session for the Dominium project. The central problem was that Dominium's repository structure had become too sprawling, redundant, and unstable for serious development. The user was... `__Source: __ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__01_human_readable_report.md.`
- **EVC-01243 prohibition:** Each task should be narrow, with allowed/forbidden paths, non-goals, validation, blocker handling, and final response format. Broad Workbench UI, renderer/gameplay/native GUI, provider runtime, package runtime, module loader, and release publication... `__Source: __ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__01_human_readable_report.md.`
- **EVC-01259 prohibition:** A key process doctrine emerged: development is non-blocking, promotion is evidence-blocked. AIDE should manage parallel task branches, dirty worktree classification, blockers, repair tasks, checkpoints, and main promotion. Full CTest remains full-gate... `__Source: __ docs/archive/conversations/`

dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md.

- EVC-00324 **prerequisite:** 8. Plans, Future Work, and Next Steps __Source:__ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__01_human_readable_report.md.
- EVC-00332 **prerequisite:** Best next step: verify current repo state, then draft COMMAND-RESULT-VIEW-SLICE-01 if gates allow. __Source:__ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__06_reader_brief.md.
- EVC-00427 **prerequisite:** A second tradeoff is between immediate cleanup and preserving working checks. The user rejected throwing away old tools. The better path is wrap-before-rename: inventory existing tools, call them through AIDE, classify them, then migrate names and paths... __Source:__ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__01_human_readable_report.md.
- EVC-00935 **prerequisite:** 7. Support future live operations such as hot-swappable renderers and live mod activation, but only after foundations. __Source:__ docs/archive/conversations/_reader/by_chat/omega_xi_pi_architecture_future.md.
- EVC-01232 **prerequisite:** The chat also developed a startup policy: product executables should use CLI when run from a terminal, and when double-clicked/no terminal should try GUI, then TUI, then CLI. Explicit --mode flags should override auto mode; game server/headless flags... __Source:__ docs/archive/conversations/dominium_domino_codex_planning/dominium_domino_codex_planning__05_reader_brief.md.
- EVC-01246 **prerequisite:** Before merging into a master spec, all repo-status claims should be verified. The doctrine is reusable; the live task status is perishable. __Source:__ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__01_human_readable_report.md.
- EVC-01252 **prerequisite:** Best next step: verify live repo state, then continue the maintenance prompt sequence or replan if repo advanced. __Source:__ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__06_reader_brief.md.
- EVC-01263 **prerequisite:** The biggest live risk is stale repo status; verify before generating current-state prompts. __Source:__ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md.
- EVC-00238 **contradiction:** It is not established whether the user prefers Unreal, Raylib, or a fully custom renderer long-term. It is not established how realistic the science model should be, how punishing respawn should be, how many robot bodies should exist, whether official... __Source:__ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__01_human_readable_report.md.
- EVC-00729 **contradiction:** INFERENCE:** The user wanted to prevent future chats or Codex sessions from drifting, forgetting, or simplifying. They care deeply about maintaining continuity across many chats and turning fragmented planning into a stable project corpus. __Source:__ docs/archive/conversations/_reader/by_chat/app_testx_codehygiene.md.

1.13 12. AIDE, Codex, Automation, and Repo Governance

AIDE, Codex, and related automation are governed repo/control-plane harnesses; they assist work but do not override canon, contracts, validation, or evidence.

- **EVC-00692 decision:** 'DECISION-0007': What disposition should be chosen for this unresolved claim: Before relying on this chat as project authority, a future assistant or human reviewer must confirm whether Dominium is actually intended to be simulation-heavy, whether strict...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00699 decision:** The user later asked where to create Visual Studio and Xcode apps after opening the repo as a folder. The assistant advised that Visual Studio and Xcode projects should be generated through CMake, not hand-authored or treated as authoritative source... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00110 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__01_human_readable_report.md`.
- **EVC-00139 decision:** This chat was a long architecture/specification-generation session for the Dominium Game project. It focused on turning a broad v3 game architecture into concrete, file-by-file 'txt' implementation specs for Codex automation. The user decided that Codex... `_Source:_ docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00153 decision:** DECISION-06: Support canonical surface plus multiple surface instances for shards/mirrors. `_Source:_ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.
- **EVC-00195 decision:** 1. context loaded, 2. top active priorities, 3. key constraints, 4. open questions, 5. contradictions or uncertainties, 6. recommended next action. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__08_future_chat_bootstrap_prompt.md`.
- **EVC-00198 decision:** '04_registers': workstreams, decisions, tasks, risks, verification queue. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__09_in_chat_reader.md`.
- **EVC-00243 decision:** See DECISION-01 through DECISION-13. Strongest user-stated decisions: science-bounded procedural planets, robotic mothership premise, robot bodies, nanobot construction, automation over worker NPCs, mothership-limited fabrication, machine process... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md`.
- **EVC-00313 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion__human_readable_detailed_summary_report.md`.
- **EVC-00321 decision:** A second major theme was unification of presentation surfaces. The user wanted CLI, TUI, rendered GUI, and OS-native GUI to share code and semantics. The decision emerged that these should not be four separate systems. Instead, all products should expose... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__01_human_readable_report.md`.
- **EVC-00363 decision:** A recurring theme was urgency. The user repeatedly expressed that the directory and root-structure cleanup had taken too long, and at points threatened to manually drag/drop folders if the assistant and Codex process failed to produce real progress. That... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md`.

- **EVC-00429 decision:** The best next action is to verify live repo state, then implement AIDE-STRUCTURE-00 and AIDE-ARCH-00 as non-invasive control-plane and architecture-constitution tasks. Do not start broad moves until contracts and inventories exist. Do not trust pasted... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__01_human_readable_report.md`.
- **EVC-00433 decision:** See DECISION-01 through DECISION-10 in the registers. The clearest user-accepted decisions are AIDE adoption and recycling existing material. `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__06_reader_brief.md`.
- **EVC-00442 decision:** Ask: "Which decisions are accepted versus recommendations?", "Draft the AIDE-STRUCTURE-00 Codex prompt", "Design root_constitution.toml", "What repo facts must be verified?", "How should old XStack-style tools be recycled?", or "Turn this into Project... `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md`.
- **EVC-00474 decision:** The final user action uploaded a preservation-package prompt. This response turns the visible chat into a human-readable report, registers, context packet, spec sheet, aggregator packet, audit, and downloadable ZIP. The main caveat is that many technical... `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__01_human_readable_report.md`.
- **EVC-00525 decision:** '04_registers.md': workstreams, decisions, tasks, constraints, artifacts, risks, verification. `_Source:_ docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__09_in_chat_reader.md`.
- **EVC-00547 decision:** Verify SemVer primary spec, repo/build files, OS/toolchain feasibility, final product/suite inventory, and capability-profile relationship. `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00566 decision:** The most important repo-supported decision is that Dominium authority must remain logical ACT, not wall-clock. The strongest recommendations are to freeze ACT units/serialization, audit DSYS timers, and keep civil time as projection-only. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__06_reader_brief.md`.
- **EVC-00646 decision:** This report is not a perfect raw transcript substitute. It reconstructs the working state from the visible conversation, user-pasted transcripts, assistant outputs, repo-state checks performed in this chat, and the final uploaded preservation... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__01_human_readable_report.md`.
- **EVC-00659 decision:** This preservation package explains the conversation, records the current task state, preserves decisions and rejected options, and prepares the chat for aggregation into a master Project Spec Book. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00660 decision:** Read: 1. Human-readable report for full understanding. 2. Context transfer packet for continuing in a new chat. 3. Spec sheet for aggregation. 4. Registers for task/decision tracking. 5. Verification/audit before relying on the state. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00668 decision:** The conclusion was not to globally simulate everything. Instead, the architecture should support deterministic lazy historical evaluation: `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__10_accompanying_detailed_summary.md`.

- **EVC-00708 decision:** The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The user's question directly made arbitrary placement a major topic. [INFERENCE]... `_Source: docs/archive/conversations/_reader/by_chat/advanced_simulation_infrastructure.md`.
- **EVC-00724 decision:** A large set of prompts was then generated to lock down architecture, determinism, performance, schema governance, rendering, epistemic UI, sharding, interest sets, and fidelity projection. This became the Phase 1 hardening layer. Additional audit prompts... `_Source: docs/archive/conversations/_reader/by_chat/app_testx_codehygiene.md`.
- **EVC-00736 decision:** The final state of the conversation is therefore: the architecture and implementation-roadmap discussion has been preserved, but the actual next work is elsewhere-especially the Path D advanced simulation conversation. `_Source: docs/archive/conversations/_reader/by_chat/architecture_codex_prompts.md`.
- **EVC-00749 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source: docs/archive/conversations/_reader/by_chat/build_and_future_proofing.md`.
- **EVC-00756 decision:** This produced a pattern: generate a large Codex/AIDE task, the user ran it or reported a result, then the assistant evaluated what was truly fixed versus what was only validator/document churn. The user eventually demanded a one-shot "actual final... `_Source: docs/archive/conversations/_reader/by_chat/canonical_structure_and_framework.md`.
- **EVC-00852 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source: docs/archive/conversations/_reader/by_chat/domino_dominium_workbench.md`.
- **EVC-00876 decision:** The key conclusion was that Workbench is not the general module system; it is one consumer of the module/command/service/provider/pack/artifact system. Workbench must not call private tools directly. It must route through registered commands and typed... `_Source: docs/archive/conversations/_reader/by_chat/foundation_workbench_codex.md`.
- **EVC-00933 decision:** The final strategic direction before this preservation request was to run a ?-series: snapshot intake, reality extraction, blueprint reconciliation, foundation readiness, and final prompt synthesis. This is needed because plans must now be mapped onto... `_Source: docs/archive/conversations/_reader/by_chat/omega_xi_pi_architecture_future.md`.
- **EVC-00987 decision:** A major middle phase focused on XStack. XStack began as a Dominion-specific governance stack grown out of TestX, then expanded into RepoX, AuditX, and other concepts. We initially explored making XStack a general portable metaharness, but that proved too... `_Source: docs/archive/conversations/_reader/by_chat/refactor_control_plane.md`.
- **EVC-01003 decision:** The user then asked whether the implementation was industry-accepted and what could be improved. The response framed the approach as closer to game engines, operating systems, and long-lived infrastructure than typical game development. The important... `_Source: docs/archive/conversations/_reader/by_chat/testx_repoX_governance.md`.
- **EVC-01036 decision:** The final plan accepted the newer repo status: structure is clean enough to stop giant structure prompts. Remaining cleanup should be targeted: stale full-gate tests, pack layout canon, residual taxonomy, AIDE state classification, public header ABI... `_Source: docs/archive/conversations/_reader/by_chat/universe_explorer_planning.md`.
- **EVC-01050 decision:** The future relevance of this chat is high. It should feed directly into the future project spec book and into a corrected implementation prompt. But it should not be treated as final implementation detail everywhere. Many high-level decisions are... `_Source: docs/archive/conversations/_reader/by_chat/world_architecture.md`.

- **EVC-01128 decision:** How are 'DOMINIUM_RUN_ROOT' and 'DOMINIUM_HOME' finalized? `_Source: docs/archive/conversations/app_testx_codehygiene/dominium_app_testx_codehygiene_handoff__05_reader_brief.md`.
- **EVC-01173 decision:** Ask: "What decisions are final?", "What is still uncertain?", "What is the next prompt?", "Which rejected options should we avoid?", "What should go into the master spec book?" `_Source: docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__09_in_chat_reader.md`.
- **EVC-01207 decision:** This report summarizes the accessible conversation and the mounted artifacts available in '/mnt/data'. It incorporates the prior handoff/preservation files, user-reported commit statuses, repeated directory-structure reviews, and the architecture... `_Source: docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary_report.md`.
- **EVC-01236 decision:** DECISION-03 - All platform interaction must go through dsys. (FACT) `_Source: docs/archive/conversations/dominium_domino_codex_planning/dominium_domino_codex_planning__05_reader_brief.md`.
- **EVC-01254 decision:** This package preserves the chat's substance, decisions, tasks, constraints, artifacts, risks, open questions, and future handoff material. The main report is human-readable. Registers and YAML are for aggregation. `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__09_in_chat_reader.md`.
- **EVC-01261 decision:** The user accepted that the old UI Editor/Tool Editor were good general ideas but bad final products. The new direction became a cross-platform rendered Workbench that uses the same runtime, renderer, UI, command, pack, and diagnostics systems as the... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md`.
- **EVC-01282 decision:** Verify actual repository state, then execute or audit the generated "Dominium Setup: Final Spec Alignment, Gap Closure, and Hardening Pass" prompt. `_Source: docs/archive/conversations/dominium_setup/dominium_setup_handoff__05_reader_brief.md`.
- **EVC-01343 decision:** 1. Make Dominium/DOMINO portable, modular, extensible, and reusable for other games and engine projects. 2. Allow entire code/data/files/directories to be replaced or rewritten while preserving stable contracts and behavior. 3. Develop the project like a... `_Source: docs/archive/conversations/omega_xi_pi_architecture_future/dominium_omega_xi_pi_architecture_future_proofing_planning__01_human_readable_report.md`.
- **EVC-01363 decision:** 1. Preserve all uncertainty labels. 2. Do not restart Omega/Xi/Pi unless the user explicitly asks. 3. Treat user-reported repo status as user-reported fact, not independently verified truth. 4. Verify live repo reality before exact implementation plans... `_Source: docs/archive/conversations/omega_xi_pi_architecture_future/dominium_omega_xi_pi_architecture_future_proofing_planning__10_accompanying_human_readable_detailed_summary_and_report.md`.
- **EVC-01395 decision:** See DECISION-01 through DECISION-27 in the registers. Highest priority: DECISION-01, DECISION-06, DECISION-10, DECISION-21, DECISION-23. `_Source: docs/archive/conversations/testx_repos_governance/dominium_testx_repos_governance_handoff__05_reader_brief.md`.
- **EVC-01399 decision:** The chat produced a large set of Codex prompts, not verified implementation. These include an 11-prompt foundational plan, a final UI Editor implementation prompt, a six-prompt UU plan for import/CLI/ops/launcher/setup/hardening, and an IDE live-editing... `_Source: docs/archive/conversations/ui_editor_tool_editor_planning/dominium_ui_editor_tool_editor_planning__05_reader_brief.md`.
- **EVC-00001 specification:** Future Series: Sigma-1, Sigma-2, Sigma-3, Sigma-4, Sigma-5, Phi, Upsilon, Zeta Replacement Target: none; later mirrors and machine-readable governance surfaces must derive from this file rather than compete with it Binding Sources... `_Source: AGENTS.md`.

- **EVC-00003 specification:** 1. 'docs/canon/constitution_v1.md' 2. 'docs/canon/glossary_v1.md' 3. 1.14 13. Documentation, Archive, and Conversation Corpus

The archive and conversation corpus are evidence layers: they preserve history, contradictions, and intent without becoming current truth.

1.15 14. Reality, Space, Time, Scale, and Existence

The world model treats reality, existence, space, time, and scale as governed simulation concerns rather than renderer conveniences.

- **EVC-00274 decision:** The key technical conclusion was that the world cannot be treated as a normal game-engine level full of live actors. The world must be a deterministic simulation and data system first. Domino should store the true universe as seeds, rules, fields, sparse... __Source:__ docs/archive/conversations/

Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md.

- EVC-00605 **decision:** The chat concluded that Dominium’s requirements exceed what UE5, UE6, Domino, or any single commercial engine can provide out of the box. The game should be architected as a custom deterministic simulation and persistent world backend, with Unreal as a... __Source: __ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md.
- EVC-00165 **specification:** Major game-system design also emerged: deterministic fixed-point numeric policy, integer item storage, world origin at center/sea level, sparse 3D surface grid, Keplerian on-rails space, seamless surface/space transitions via reference frames and sim... __Source: __ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md.
- EVC-00242 **specification:** 1. Domino should probably be the deterministic simulation/data core. 2. Unreal should not be assumed to own the authoritative universe. 3. Planets should be science-bounded procedural outputs, not arbitrary slider toys. 4. Designer painting should be an... __Source: __ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md.
- EVC-00601 **specification:** What is Domino exactly? Should Unreal be first frontend? Which language/math stack should DominiumSim use? What terrain model is best? How exact must collapsed simulation be? What first MMO scale target is realistic? __Source: __ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__06_reader_brief.md.
- EVC-00971 **specification:** The chat began with the user pasting what they called the latest README. That README already had a strong direction: deterministic C89 engine core, C++98 higher layers, fixed-point math, bit-identical simulation across platforms, sparse planetary-scale... __Source: __ docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md.
- EVC-00269 **constraint:** The mothership solves several design problems at once. It explains why players have a HUD, blueprints, recipes, construction guidance, and advanced technical knowledge. Players do not need to reinvent CPUs, railway gauges, smelting, computing, or... __Source: __ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_human_readable_detailed_summary_report.md.
- EVC-00560 **constraint:** The main outcome is not that Dominium needs a conceptual rewrite. The outcome is that Dominium’s existing model is directionally correct, but needs boundary hardening: audit all DSYS backend timers, freeze ACT units and serialization semantics, prevent... __Source: __ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__01_human_readable_report.md.

1.16 15. Worldgen, Celestial Systems, and Domains

Worldgen and celestial systems are recurring design themes that must remain deterministic, data-driven, and contract-bound.

- **EVC-00274 decision:** The key technical conclusion was that the world cannot be treated as a normal game-engine level full of live actors. The world must be a deterministic simulation and data system first. Domino should store the true universe as seeds, rules, fields, sparse... `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md.`
- **EVC-00282 decision:** This report should be read as a summary of the whole visible conversation, not as a final design specification. Some items were clearly stated by the user and are marked as FACT. Some were assistant-proposed architecture or design synthesis and are... `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md.`
- **EVC-00233 specification:** The user then refined the project substantially. The conversation moved from general engine feasibility to a concrete game premise: a robotic seed-civilisation game. The user described science-bounded procedural star systems and planets, where designers... `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__01_human_readable_report.md.`

- **EVC-00242 specification:** 1. Domino should probably be the deterministic simulation/data core. 2. Unreal should not be assumed to own the authoritative universe. 3. Planets should be science-bounded procedural outputs, not arbitrary slider toys. 4. Designer painting should be an... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md`.
- **EVC-00280 specification:** The user then gave the project its strongest identity. Humans sent a robotic mothership to another solar system. It lands, manufactures robot bodies, and begins rebuilding civilisation. Players spawn as robots from physical machines. They can choose... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md`.
- **EVC-00288 specification:** 1. **Exact launch scope:** The user used broad language around solar systems, galaxies, universes, and multiverses. The first official scope still needs to be chosen. 2. **Planet generator schema:** The exact physical parameters, realism scoring, and... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00286 constraint:** The user wants star systems/solar systems and planets generated from realistic parameters. The wording briefly used "galaxy," but the described scope was closer to custom solar systems with many planets. This remains an open scope issue: whether the... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00299 constraint:** 1. The user wants science-bounded procedural solar-system/planet generation. 2. The initial scope is better understood as a star/solar system, not a full galaxy. 3. Planet generation should not rely primarily on manual painting. 4. Painted/data overrides... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__06_reader_brief.md`.
- **EVC-01247 constraint:** The chat also developed a strong UI architecture. CLI, TUI, rendered GUI, OS-native GUI, and headless output are projections of the same semantic view model. TUI is first-class, not a toy fallback. Rendered UI should be data-described through layouts... `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__01_human_readable_report.md`.
- **EVC-00705 prerequisite:** Before reading the rest of this report, remember this: this chat's central contribution is not one isolated feature. It is a whole design philosophy for Dominium's world engine. The game should be deterministic, fixed-point, sparse, modular... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00278 prerequisite:** The project includes planets, civilisations, terraforming, factories, megaprojects, and MMO persistence. The immediate risk is trying to build all of it before proving the smallest fun loop. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md`.
- **EVC-01051 prerequisite:** Before reading the rest of this report, remember this: this chat's central contribution is not one isolated feature. It is a whole design philosophy for Dominium's world engine. The game should be deterministic, fixed-point, sparse, modular... `_Source:_ docs/archive/conversations/_reader/by_chat/world_architecture.md`.
- **EVC-00373 unresolved_question:** The fourth major theme was reference projects. The user asked about SpaceEngine, Celestia, PCGUniverse2, Valian/pgg, and other engines/games. The answer separated "use as dependency" from "study as reference." SpaceEngine is a design reference only... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__01_human_readable_report.md`.

- **EVC-00775 risk:** The assistant created those files and reported that the chat label was inferred as **Dominium Development Routes**. The package was said to be safe for aggregation **with caveats**. The main caveats were that the substantive project transcript was short... `_Source:_ docs/archive/conversations/_reader/by_chat/development_routes.md`.
- **EVC-00284 change_of_direction:** The conversation then shifted from pure engine feasibility to game identity. The user described a procedural star-system generator where planets are created from scientifically plausible parameters rather than arbitrary sliders. The designer should be... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_complete_preservation_package/Dominium_Complete_Conversation_Preservation__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00265 design_goal:** The practical purpose is simple: a future reader should be able to open this one file and quickly understand the substance of the conversation without needing to reread the whole transcript. It is not a replacement for the structured package; it is the... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00296 design_goal:** The user also clarified how planet generation should work. The game should procedurally generate a star/solar system and planets using realistic science-bounded parameters, not arbitrary sliders. Designers should be able to tweak and override results... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__01_human_readable_report.md`.
- **EVC-01015 design_goal:** The preservation task at the end changes the purpose of the chat from discussion to archive. The user uploaded a detailed preservation prompt requiring a human-readable report, structured registers, a context-transfer packet, a YAML-style spec sheet, an... `_Source:_ docs/archive/conversations/_reader/by_chat/timekeeping_and_2038_resilience.md`.
- **EVC-01469 fact:** This authorization remains narrow. It does not authorize broad Workbench UI, gameplay, renderer, native GUI, runtime provider expansion, package runtime, release publication, or domain feature work. `_Source:_ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00887 fact:** Another rejected idea was using external reference projects directly without license review. This matters because later assistants might see Celestia, PCGUniverse2, pgg, or SpaceEngine and assume code can be copied. The chat did not authorize that. `_Source:_ docs/archive/conversations/_reader/by_chat/framework_open_source_provider.md`.
- **EVC-01153 decision:** 04 registers: workstreams, decisions, tasks, constraints, questions, artifacts, risks, verification, timeline, spec contributions. `_Source:_ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__09_in_chat_reader.md`.

1.17 16. Civilization, Economy, Logistics, Institutions, and Signals

Civilization-scale behavior is intended to emerge from logistics, economy, institutions, trust, communication, and signals under law.

- **EVC-00280 specification:** The user then gave the project its strongest identity. Humans sent a robotic mothership to another solar system. It lands, manufactures robot bodies, and begins rebuilding civilisation. Players spawn as robots from physical machines. They can choose... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/existing_companion_report_package/Dominium_Complete_Conversation_Companion_Report__human_readable_detailed_summary.md`.
- **EVC-00589 constraint:** The user then escalated the technical scope substantially. They asked whether UE5, UE6, or any other engine could handle a deterministic full-scale real solar system with fully recreated procedural planets, player-built civilizations, terraforming... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md`.
- **EVC-01019 constraint:** The user then escalated the technical scope substantially. They asked whether UE5, UE6, or any other engine could handle a deterministic full-scale real solar system with fully recreated procedural planets, player-built civilizations, terraforming... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-00622 contradiction:** The assistant identified what remained weak: domain constitutions, deep primitives consolidation, failure ontology, five truth-state taxonomy, player-facing formalization workflows, ordinary-life grounding... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__01_human_readable_report.md`.
- **EVC-01316 third_order_effect:** This conversation was a long architecture, feasibility, implementation-readiness, and preservation discussion for the **Domino engine** and **Dominium game** project. The central question was how to build a deterministic, portable, modular, reusable... `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__10_companion_detailed_summary_report.md`.
- **EVC-00592 fact:** The user then asked a far more ambitious question. They described a game with a deterministic real-scale solar system, data-driven procedural planets, player-built civilizations, terraforming, cut/fill terrain, megaprojects, player-designed machines and... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md`.
- **EVC-01934 specification:** 1. INT should model room/portal topology directly as 'NetworkGraph' plus 'SpatialNode' hierarchy. 2. POSE and MOB should model guide/docking/coupling restrictions via 'ConstraintComponent' and 'StateMachineComponent'. 3. CTRL should map orchestration... `_Source:_ docs/archive/audit/CORE_ABSTRACTIONS_BASELINE.md`.
- **EVC-02125 specification:** 'python scripts/dev/gate.py strict --repo-root . --profile-report' currently returns non-zero because 'testx.group.core.invariants' reports 'required_tests_missing' in this workspace baseline. This is pre-existing gate behavior unrelated to SIG-6 instit `_Source:_ docs/archive/audit/INSTITUTIONAL_COMMS_BASELINE.md`.

- **EVC-04054 specification:** Reason: document already declares an explicit replacement path Stability: provisional Future Series: DOC-CONVERGENCE Replacement Target: explicit replacement document listed in the supersession header `__Source: __ docs/archive/stray_root_docs/CIV4_SCALE_AND_LOGISTICS.md`.
- **EVC-04467 specification:** History becomes a living constraint on trust, law, conflict, and knowledge, enabling emergent narrative without scripted lore. `__Source: __ docs/domains/worldgen/CIVILIZATIONS_AND_HISTORY_BASELINE.md`.
- **EVC-05012 specification:** This framework inherits from 'Lambda-0' through 'Lambda-3'. It does not create a parallel ontology. It formalizes repo-grounded direction already visible in surfaces such as 'materials/blueprint_engine.py', 'materials/maintenance/decay_engine.py'... `__Source: __ docs/reference/specs/reality/SPEC_FORMALIZATION_CHAIN.md`.

1.18 17. Content, Modding, Providers, and Data-Driven Extension

Content and modding belong behind pack, registry, capability, compatibility, and refusal law.

- **EVC-00695 decision:** The user also made a clear versioning decision. **FACT:** The user wanted **major.minor.patch semantic versioning** for all components/packages and for the complete game package. The user explicitly did **not** want build numbers or build dates in... `__Source: __ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00498 decision:** This report is reliable for explaining what was discussed in the visible chat. It is not proof that the real repository has the recommended structure, not proof that the user formally accepted every recommendation, and not a substitute for verifying the... `__Source: __ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__10_accompanying_detailed_summary_report.md`.
- **EVC-00835 decision:** The final part of the conversation dealt with repo status and task queue. The user pasted status reports indicating that 'PRESENTATION-CONTRACT-01' completed with warnings, and then chose to generate six maintenance prompts before replanning... `__Source: __ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-00035 specification:** Packs provide capabilities, data, and assets; executables do not embed content. `__Source: __ docs/README.md`.
- **EVC-00382 specification:** Top tasks: verify repo baseline, draft framework ABI, add provider manifests, add forbidden include validator, implement null providers, implement raylib providers, create profiles, and define work-lease/CAD schemas. `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00385 specification:** Verify repository state, raylib/SDL2/Lua versions and platform support, licenses for reference projects, and any second-wave dependency licenses. `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00392 specification:** Ask next: "Draft DOMINO-FRAMEWORK-WEDGE-01," "Define the provider ABI header," "Verify repo C17/C++17 state," "Design the work-lease protocol," "Create raylib/SDL/Lua provider manifests," or "Turn this into a spec book chapter." `__Source: __ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md`.
- **EVC-00489 specification:** This package preserves the visible current chat about standards-informed assurance, portability, modularity, extensibility, replaceability, directory/API/schema/protocol design, and future-proof Domino/Dominium architecture. `__Source: __ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__09_in_chat_reader.md`.

- **EVC-00739 specification:** The user was trying to prevent Dominion from becoming a brittle one-off project. The repeated concern was that the codebase, files, directories, APIs, schemas, renderers, GUIs, and data formats should remain portable, modular, extensible, replaceable... `_Source: docs/archive/conversations/_reader/by_chat/architecture_ui_providers.md`.
- **EVC-00885 specification:** The exact first implementation branch, versions, and dependency pins are unresolved. The exact Domino Framework ABI is unresolved. The exact Lua version is unresolved. The current repository baseline must be verified. The formal policy for... `_Source: docs/archive/conversations/_reader/by_chat/framework_open_source_provider.md`.
- **EVC-00934 specification:** The conclusion was that all products should boot through AppShell, use shared command registries, expose descriptors, validate packs/contracts before session start, and never have ad hoc boot paths. This matters for portability, setup/launcher... `_Source: docs/archive/conversations/_reader/by_chat/omega_xi_pi_architecture_future.md`.
- **EVC-01460 constraint:** Foundation Lock does not mean full CTest is green, every compatibility corpus exists, every provider is implemented, every runtime trust rule is enforced, Workbench UI exists, or broad feature work is open. `_Source: docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00440 constraint:** 1. '00_manifest.md' - file list and package status. 2. '01_human_readable_report.md' - sections 0-16. 3. '02_context_transfer_packet.md' - future-chat handoff. 4. - **EVC-02136 specification:** There is no authoritative pack bundle schema or pack import engine that inserts packs into the CAS using the LIB-0 store contract. __Source: __ docs/archive/audit/LIB6_RETRO_AUDIT.md.
- **EVC-02182 specification:** Add a new meta-level instrumentation surface registry and engine that references existing action templates, explain contracts, and measurement flows. __Source: __ docs/archive/audit/META_INSTRO_RETRO_AUDIT.md.
- **EVC-02188 specification:** This audit identifies the registry families in scope for the initial stability classification rollout, the existing status-like metadata already present in those families, and the least risky insertion point for stability metadata. __Source: __ docs/archive/audit/META_STABILITY0_RETRO_AUDIT.md.
- **EVC-02189 specification:** Keep the line-registry format loadable and add comment-block stability metadata before each semantic line in: __Source: __ docs/archive/audit/META_STABILITY1_FIX_PLAN.md.
- **EVC-02264 specification:** The compatibility sidecar does not replace MOD-POLICY. It adds explicit offline contract, registry, and degrade declarations. __Source: __ docs/archive/audit/PACK_COMPAT_BASELINE.md.
- **EVC-02265 specification:** The pipeline scans portable 'archive/generated/dist/packs', validates 'pack.json' plus 'pack.compat.json', checks contract ranges against the pinned/default universe contract bundle, verifies registry requirements, applies MOD-POLICY gates, and dry-runs... __Source: __ docs/archive/audit/PACK_VERIFICATION_BASELINE.md.

- **EVC-02306 specification:** 1. Add process capsule schemas and registry: `__Source: __ docs/archive/audit/PROC5_RETRO_AUDIT.md`.
- **EVC-02307 specification:** Explain registry has 'explain.drift_detected' but lacks 'warning/critical/revalidation/capsule-invalidated-by-drift' contracts. `__Source: __ docs/archive/audit/PROC6_RETRO_AUDIT.md`.
- **EVC-02313 specification:** Changed: PROC schema surface + CompatX registry key set + process archetype registry. `__Source: __ docs/archive/audit/PROCESS_DEFINITION_BASELINE.md`.
- **EVC-02335 specification:** 1. RND-3 hardware backend can consume unchanged 'RenderModel'/snapshot contracts. 2. RND-4 interaction layer can reuse snapshot artifacts for inspect/debug workflows. 3. Material/visual enrichment can remain registry-driven without changing truth... `__Source: __ docs/archive/audit/RENDERER_BASELINE_REPORT.md`.
- **EVC-02428 specification:** Tier contract registry present at 'data/registries/tier_contract_registry.json' with baseline subsystem entries for 'ELEC', 'THERM', 'MOB', 'SIG', and 'PHYS'. `__Source: __ docs/archive/audit/TIER_COUPLING_EXPLAIN_BASELINE.md`.
- **EVC-02440 specification:** Control dependency edges are synthesized for modules that reference control-plane APIs. `__Source: __ docs/archive/audit/TOPOLOGY_MAP.md`.

1.19 18. Decisions Already Made

Several decisions are already strongly supported: authority order, process-only mutation, no hidden fallback, profiles over mode flags, pack-driven integration, and advisory status for archive/conversations.

- **EVC-00065 decision:** Travel scheduling, replay, and law decisions become nondeterministic. `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-01433 decision:** Rendering is presentational only and MUST NOT mutate truth or enforce authority decisions. `__Source: __ docs/canon/constitution_v1.md`.
- **EVC-00682 decision:** What disposition should be chosen for this unresolved claim: The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The...? `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00686 decision:** What disposition should be chosen for this unresolved claim: This chat was about preserving and re-grounding Dominium's architecture around a very old constitutional contract, then checking whether the current GitHub repository still foll...? `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00689 decision:** 'DECISION-0001': What disposition should be chosen for this unresolved claim: The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The...? `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00690 decision:** 'DECISION-0003': What disposition should be chosen for this unresolved claim: Future work must define the client's allowed dependency surface and whether it can access any simulation-adjacent prediction layer.? `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00692 decision:** 'DECISION-0007': What disposition should be chosen for this unresolved claim: Before relying on this chat as project authority, a future assistant or human reviewer must confirm whether Dominium is actually intended to be simulation-heavy, whether strict...? `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.

- **EVC-00693 decision:** 'DECISION-0009': What disposition should be chosen for this unresolved claim: This chat was about preserving and re-grounding Dominion's architecture around a very old constitutional contract, then checking whether the current GitHub repository still foll...? `_Source: docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00697 decision:** This context matters because the rest of the conversation happened inside those constraints. The launcher could not become a dumping ground for OS-specific behavior, sim mutation, renderer decisions, or nondeterministic game-state changes. It had to fit... `_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00699 decision:** The user later asked where to create Visual Studio and Xcode apps after opening the repo as a folder. The assistant advised that Visual Studio and Xcode projects should be generated through CMake, not hand-authored or treated as authoritative source... `_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-00703 decision:** The user pasted the final README after those cleanup changes. At that point, the README had the current active form: deterministic constraints clarified, ports unified under one source hierarchy, '/ports' metadata-only if retained, Section 9 normative... `_Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-01068 decision:** Safe now: archive reading, decision review, promotion review, reconciliation crosswalks, docs-only microtask preparation, and validators. `_Source: docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-01414 decision:** Use: design intent, review backlog, decision and promotion candidates `_Source: docs/archive/docs_corpus/_archive/DOCS_CONVERSATION_CORPUS_INTEGRATION_v0.md`.
- **EVC-00110 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source: docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__01_human_readable_report.md`.
- **EVC-00117 decision:** Which recommendations are decisions versus advice? `_Source: docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__09_in_chat_reader.md`.
- **EVC-00123 decision:** **Chat label:** Dominion Build and Future-Proofing Architecture **Date anchor:** 2026-05-27 Australia/Melbourne **Scope:** This report covers the visible conversation and the preservation task that produced the accompanying handoff files. It does **not**... `_Source: docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00135 decision:** DECISION-06: Calendars are pure renderers and never affect physics. [FACT] `_Source: docs/archive/conversations/Chronology_Celestial_Systems/Dominium_Chronology_Celestial_Systems__05_reader_brief.md`.
- **EVC-00136 decision:** DECISION-12: HPC-E Year Day and Leap Day are appended after February; canonical mode is undated and compatibility mode may use Feb 29/30. [FACT / INFERENCE] `_Source: docs/archive/conversations/Chronology_Celestial_Systems/Dominium_Chronology_Celestial_Systems__05_reader_brief.md`.
- **EVC-00151 decision:** DECISION-03: Adopt base-16 spatial ladder from subnano to surface. `_Source: docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.
- **EVC-00152 decision:** DECISION-04: Store surfaces as sparse microgrids/chunks, not continuous dense arrays. `_Source: docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.

- **EVC-00153 decision:** DECISION-06: Support canonical surface plus multiple surface instances for shards/mirrors. `__Source: __ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md.`
- **EVC-00158 decision:** The user finalized platform support tiers: Tier 1 is Windows NT 2000 SP4-latest, Mac OS X 10.6-10.14, Linux 3.2-current; Tier 2 extends to Windows 98 SE-Me, Mac OS 9-9.2, Mac OS X 10.6-15.0, Linux 2.6.18-current; Tier 3 covers MS-DOS 3.3-6.2, Windows 3... `__Source: __ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md.`
- **EVC-00159 decision:** Final support tiers are user-defined and must be preserved. `__Source: __ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md.`
- **EVC-00161 decision:** Preserve final Tier 1/2/3 OS support ranges. `__Source: __ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md.`
- **EVC-00169 decision:** See Decision Register in full report. Highest priority: DECISION-03, DECISION-05, DECISION-07, DECISION-08, DECISION-12, DECISION-19, DECISION-28. `__Source: __ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md.`
- **EVC-00175 decision: DECISION-01:** The old v1 contract/glossary were accepted as the baseline for this chat because the user supplied them as the old ground truth and asked later questions against them. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__01_human_readable_report.md.`
- **EVC-00186 decision:** Kept assistant portability doctrine as recommendation/inference unless clearly accepted. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__07_verification_and_audit.md.`
- **EVC-00195 decision:** 1. context loaded, 2. top active priorities, 3. key constraints, 4. open questions, 5. contradictions or uncertainties, 6. recommended next action. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__08_future_chat_bootstrap_prompt.md.`
- **EVC-00211 decision:** 18. What are the biggest ways a future assistant might misunderstand this conversation? 19. Which refactors are dangerous before build/test proof? 20. Which items are still assistant suggestions rather than user decisions? `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md.`
- **EVC-00214 decision:** 1. 'Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md' - direct narrative explanation of the whole conversation. 2. 'Dominium_Canon_Portability_Audit__01_human_readable_report.md' - prior full preservation... `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__README_FIRST.md.`
- **EVC-00236 decision:** This was recommended by the assistant, not explicitly accepted by the user. It follows from the user's deterministic, persistent, sparse, MMO-scale requirements. The alternative would be to make Unreal or a normal scene graph the source of truth, but... `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__01_human_readable_report.md.`
- **EVC-00300 decision:** See Decision Register. The strongest user-stated decisions are DECISION-02, DECISION-04, DECISION-05, DECISION-06, DECISION-08, and DECISION-09. DECISION-11 and DECISION-12 are assistant recommendations pending user ratification. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__06_reader_brief.md.`

- **EVC-00313 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion__human_readable_detailed_summary_report.md`.
- **EVC-00321 decision:** A second major theme was unification of presentation surfaces. The user wanted CLI, TUI, rendered GUI, and OS-native GUI to share code and semantics. The decision emerged that these should not be four separate systems. Instead, all products should expose... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__01_human_readable_report.md`.
- **EVC-00330 decision:** This chat is a major planning pivot. It began with a Windows UI Editor/Tool Editor design and ended with a broader Dominium Workbench Platform architecture. The old editor plan is superseded as a final product. Its useful pieces should be recycled into... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__06_reader_brief.md`.
- **EVC-00334 decision:** This package preserves a chat that pivoted from a Windows UI Editor plan to a modular Dominium Workbench Platform architecture. It captures decisions, tasks, risks, artifacts, open questions, and spec-book integration guidance. `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__09_in_chat_reader.md`.
- **EVC-00338 decision:** What was the biggest decision in this chat? `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__09_in_chat_reader.md`.
- **EVC-00371 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__01_human_readable_report.md`.
- **EVC-00381 decision:** See Decision Register. Most important: framework/provider architecture, raylib as first provider suite, service-first layout, profiles for provider selection, Lua/SDL2 as first-wave providers, and sparse deterministic delegated simulation as design doctrine. `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__06_reader_brief.md`.
- **EVC-00390 decision:** '04_registers.md': decisions, tasks, risks, questions, artifacts, verification items. `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md`.
- **EVC-00403 decision:** This chat decided Dominium's modern language/platform architecture. The key outcome is C17 + C++17, 64-bit, little-endian, C-compatible ABI, deterministic fixed-width data, and provider/capability modularity. `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__06_reader_brief.md`.
- **EVC-00458 decision:** This preservation package explains the chat, records decisions, tasks, artifacts, risks, and open questions, and exports a structured spec/aggregation packet for future merging. `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__09_in_chat_reader.md`.
- **EVC-00486 decision:** Additional points: DDAP/DIL is proposed; repo not inspected; conformance tests prove modularity; data compatibility must be formalized; generated output needs validation; future aggregation must preserve recommendation-vs-decision labels. `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__06_reader_brief.md`.

- **EVC-00496 decision:** 1. Read the human-readable report. 2. Review the decision register and mark accepted/rejected/needs revision. 3. Inspect the actual repo. 4. Draft public API and data evolution policies. 5. Choose one conformance-test pilot. `_Source:_ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__09_in_chat_reader.md`.
- **EVC-00509 decision:** Do not keep 'source/dominium/products' in the final layout. `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00512 decision:** See DECISION-01 through DECISION-22 in the registers. Highest impact: DECISION-01, DECISION-02, DECISION-03, DECISION-06, DECISION-08, DECISION-11, DECISION-13, DECISION-14, DECISION-18, DECISION-19. `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00525 decision:** '04_registers.md': workstreams, decisions, tasks, constraints, artifacts, risks, verification. `_Source:_ docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__09_in_chat_reader.md`.
- **EVC-00547 decision:** Verify SemVer primary spec, repo/build files, OS/toolchain feasibility, final product/suite inventory, and capability-profile relationship. `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00558 decision:** The conversation then moved from the general 2038 problem into representation design. The user clarified that they did not need millions of years of date support, only roughly 10,000 years into the future and past. This turned the problem into a... `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__01_human_readable_report.md`.
- **EVC-00566 decision:** The most important repo-supported decision is that Dominium authority must remain logical ACT, not wall-clock. The strongest recommendations are to freeze ACT units/serialization, audit DSYS timers, and keep civil time as projection-only. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__06_reader_brief.md`.
- **EVC-00576 decision:** Which repo files supported the Dominium conclusion? `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md`.
- **EVC-00579 decision:** 1. Save the ZIP. 2. Confirm which recommendations are accepted as requirements. 3. Audit DSYS timer backends. 4. Audit ACT serialization. 5. Draft canonical Dominium time architecture documentation. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md`.
- **EVC-00607 decision:** 1. Confirm whether the architecture recommendations should become project decisions. 2. Define Domino's role. 3. Verify UE5/UE6 facts. 4. Specify the deterministic MVP. 5. Prototype fixed-tick replay and state hashes. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00611 decision:** Main caveats: Partial transcript access; UE5/UE6 facts need verification; assistant recommendations need user confirmation before becoming final project decisions. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.
- **EVC-00615 decision:** The package also preserves assistant recommendations, but it does not treat every recommendation as a final user decision. The user clearly asked strategic questions and requested preservation. They did not explicitly ratify every architecture detail as... `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__10_accompanying_human_readable_detailed_summary_and_report.md`.

- **EVC-00646 decision:** This report is not a perfect raw transcript substitute. It reconstructs the working state from the visible conversation, user-pasted transcripts, assistant outputs, repo-state checks performed in this chat, and the final uploaded preservation... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__01_human_readable_report.md`.
- **EVC-00659 decision:** This preservation package explains the conversation, records the current task state, preserves decisions and rejected options, and prepares the chat for aggregation into a master Project Spec Book. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__09_in_chat_reader.md`.
- **EVC-00724 decision:** A large set of prompts was then generated to lock down architecture, determinism, performance, schema governance, rendering, epistemic UI, sharding, interest sets, and fidelity projection. This became the Phase 1 hardening layer. Additional audit prompts... `_Source:_ docs/archive/conversations/_reader/by_chat/app_testx_codehygiene.md`.
- **EVC-00736 decision:** The final state of the conversation is therefore: the architecture and implementation-roadmap discussion has been preserved, but the actual next work is elsewhere-especially the Path D advanced simulation conversation. `_Source:_ docs/archive/conversations/_reader/by_chat/architecture_codex_prompts.md`.
- **EVC-00749 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source:_ docs/archive/conversations/_reader/by_chat/build_and_future_proofing.md`.

1.20 19. Open Decisions and User Questions

Open decisions are the main bottleneck after preservation and synthesis: what becomes current docs, what stays archive-only, and what needs future queue opening.

- **EVC-01457 decision:** Foundation Lock is the repository decision gate that determines whether Dominium can leave the Foundation Lock queue and begin a first narrow governed product slice. `_Source:_ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00682 decision:** What disposition should be chosen for this unresolved claim: The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00686 decision:** What disposition should be chosen for this unresolved claim: This chat was about preserving and re-grounding Dominium's architecture around a very old constitutional contract, then checking whether the current GitHub repository still foll...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00687 decision:** None in this docket. Current generated decisions are user decisions, queue decisions, or deferrals. `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00689 decision:** 'DECISION-0001': What disposition should be chosen for this unresolved claim: The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00690 decision:** 'DECISION-0003': What disposition should be chosen for this unresolved claim: Future work must define the client's allowed dependency surface and whether it can access any simulation-adjacent prediction layer.? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.

- **EVC-00691 decision:** 'DECISION-0006': Should this conversation-derived claim become a future review item, remain historical, or be deferred: The assistant formalized this as the Perfect Earth Calendar, later called HPC-E. The final structure is clear, though the exact leap... __Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md.
- **EVC-00693 decision:** 'DECISION-0009': What disposition should be chosen for this unresolved claim: This chat was about preserving and re-grounding Dominium's architecture around a very old constitutional contract, then checking whether the current GitHub repository still foll...? __Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md.
- **EVC-00699 decision:** The user later asked where to create Visual Studio and Xcode apps after opening the repo as a folder. - EVC-00547 **decision:** Verify SemVer primary spec, repo/build files, OS/toolchain feasibility, final product/suite inventory, and capability-profile relationship. `_Source: docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md.`
- EVC-00576 **decision:** Which repo files supported the Dominium conclusion? `_Source: docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md.`
- EVC-00584 **decision:** The answer distinguished system width from time representation. The important conclusion was that 2038 is caused by signed 32-bit time counters reaching their maximum representable value. The risk appears where signed 32-bit Unix-style timestamps are... `_Source: docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__10_accompanying_detailed_summary_report.md.`
- EVC-00588 **decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md.`
- EVC-00607 **decision:** 1. Confirm whether the architecture recommendations should become project decisions. 2. Define Domino's role. 3. Verify UE5/UE6 facts. 4. Specify the deterministic MVP. 5. Prototype fixed-tick replay and state hashes. `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md.`
- EVC-00611 **decision:** Main caveats: Partial transcript access; UE5/UE6 facts need verification; assistant recommendations need user confirmation before becoming final project decisions. `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md.`
- EVC-00615 **decision:** The package also preserves assistant recommendations, but it does not treat every recommendation as a final user decision. The user clearly asked strategic questions and requested preservation. They did not explicitly ratify every architecture detail as... `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__10_accompanying_human_readable_detailed_summary_and_report.md.`
- EVC-00716 **decision:** The idea is attractive because it supports broad distribution and long-term extensibility. But it is not a final decision. Dynamic plugins introduce ABI, packaging, security, and platform restrictions. Static registration may be simpler. A hybrid may be... `_Source: docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md.`

- **EVC-00724 decision:** A large set of prompts was then generated to lock down architecture, determinism, performance, schema governance, rendering, epistemic UI, sharding, interest sets, and fidelity projection. This became the Phase 1 hardening layer. Additional audit prompts... `_Source:_ docs/archive/conversations/_reader/by_chat/app_testx_codehygiene.md`.
- **EVC-00736 decision:** The final state of the conversation is therefore: the architecture and implementation-roadmap discussion has been preserved, but the actual next work is elsewhere-especially the Path D advanced simulation conversation. `_Source:_ docs/archive/conversations/_reader/by_chat/architecture_codex_prompts.md`.
- **EVC-00749 decision:** The final uploaded prompt asked for this preservation package. The key thing to preserve is that most architecture proposals are recommendations, not accepted user decisions yet. The next best action is to decide which recommendations become canon, then... `_Source:_ docs/archive/conversations/_reader/by_chat/build_and_future_proofing.md`.
- **EVC-00773 decision:** The first answer was assertive. It stated that Dominion must follow Route C and described the route as the only viable one for Dominion. Later parts of the chat corrected the status of that claim. FACT: the assistant made that recommendation. UNCERTAIN /... `_Source:_ docs/archive/conversations/_reader/by_chat/development_routes.md`.
- **EVC-00782 decision:** The final phase of the chat moved away from project documentation and into preserving the chat itself. The user requested a maximum-fidelity Context Transfer Packet, then requested that it be turned into a final downloadable/shareable report package... `_Source:_ docs/archive/conversations/_reader/by_chat/documentation_standards_readme.md`.

1.22 21. Prohibitions, Blocked Scope, and Non-Goals

The current queue and canon define non-goals as actively as goals: broad UI, renderer, gameplay, provider runtime, package runtime, native GUI, and release publication are blocked.

- **EVC-00012 decision:** Keep target-specific project state in `'aide/memory/';` do not copy source AIDE memory, queue history, generated context, reports, route decisions, cache-key reports, Gateway/provider status reports, `'aide.local/'`, raw prompts, raw responses, or secrets. `_Source:_ AGENTS.md`.
- **EVC-00123 decision:** **Chat label:** Dominion Build and Future-Proofing Architecture **Date anchor:** 2026-05-27 Australia/Melbourne **Scope:** This report covers the visible conversation and the preservation task that produced the accompanying handoff files. It does **not**... `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00211 decision:** 18. What are the biggest ways a future assistant might misunderstand this conversation? 19. Which refactors are dangerous before build/test proof? 20. Which items are still assistant suggestions rather than user decisions? `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md`.
- **EVC-00313 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion__human_readable_detailed_summary_report.md`.
- **EVC-00342 decision:** A major operational shift occurred near the end of the chat: instead of queueing all prompts sequentially, the user decided to run many tasks in parallel through multiple Codex chats and git worktrees. The assistant defined strict parallel-worker rules... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__01_human_readable_report.md`.

- **EVC-00371 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source: docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__01_human_readable_report.md`.
- **EVC-00579 decision:** 1. Save the ZIP. 2. Confirm which recommendations are accepted as requirements. 3. Audit DSYS timer backends. 4. Audit ACT serialization. 5. Draft canonical Dominion time architecture documentation. `_Source: docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md`.
- **EVC-00620 decision:** Finally, the user pasted a newer repo-status summary saying the structure was now clean enough to stop broad structure refactors: canonical structure passed with warnings, fast strict and smoke proof passed, full CTest remained blocked by stale full-gate... `_Source: docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__01_human_readable_report.md`.
- **EVC-00643 decision:** 1. treating the Universe Explorer as a normal renderer/free-camera task; 2. ignoring the current queue and trying to implement broad Workbench UI or gameplay; 3. restarting broad repo structure cleanup; 4. treating assistant recommendations as accepted... `_Source: docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md`.
- **EVC-00756 decision:** This produced a pattern: generate a large Codex/AIDE task, the user ran it or reported a result, then the assistant evaluated what was truly fixed versus what was only validator/document churn. The user eventually demanded a one-shot "actual final... `_Source: docs/archive/conversations/_reader/by_chat/canonical_structure_and_framework.md`.
- **EVC-00852 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source: docs/archive/conversations/_reader/by_chat/domino_dominium_workbench.md`.
- **EVC-00883 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source: docs/archive/conversations/_reader/by_chat/framework_open_source_provider.md`.
- **EVC-00909 decision:** There was also an early suggestion to create a 'DUI' facade, a Dominion UI abstraction, to support native widgets and fallback rendering. This idea was useful as a conceptual stepping stone but was not ultimately locked as a final requirement in the form... `_Source: docs/archive/conversations/_reader/by_chat/launcher_app_layer.md`.
- **EVC-01251 decision:** 1. Old UI Editor / Tool Editor are superseded as final products. 2. Their useful pieces become Workbench modules and services. 3. Workbench is a production environment over the system, not authority. 4. CLI, TUI, rendered GUI, native GUI, headless... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__06_reader_brief.md`.
- **EVC-00014 specification:** create or resume a bounded AIDE task before reporting blocked; ask the user only for semantic authority conflicts, destructive ambiguity, missing external secrets, or required review gates. `_Source: AGENTS.md`.
- **EVC-00031 specification:** Required updates: documentation surface exists, but current canon ownership is not explicit `_Source: docs/README.md`.
- **EVC-00069 specification:** Invariant: Demo is an authority profile, not a build (AUTH3-DEMO-003) `_Source: docs/architecture/INVARIANTS.md`.

- **EVC-01451 specification:** The structured permission context required for all Process execution. Includes authority_origin, law_profile_id, entitlements, epistemic_scope, and privilege_level. `_Source: _ docs/canon/glossary_v1.md`.
- **EVC-00701 specification:** The 32-bit question followed. The answer was to make full native products 64-bit and keep 32-bit as constrained or projection support only. The key caveat was not to make native pointer size part of game law. Save, replay, network, IDs, and renderer IR... `_Source: _ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-01069 specification:** Not safe now: implementation work in blocked scopes, canon/schema/contract rewrites from archive claims, release publication, renderer implementation, gameplay, provider/package runtime, broad Workbench UI, native GUI. `_Source: _ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-01084 specification:** 'workbench' (20 conversations): operator-facing validation, evidence, inspection, and later authoring surfaces. Sources: Dominium Advanced Simulation and Infrastructure Architecture `../_reader/by_chat/advanced_simulation_infrastructure.md`, [Dominium... `_Source: _ docs/archive/conversations/_synthesis/FULL_PROJECT_PICTURE_v0.md`.
- **EVC-01086 specification:** The archive describes Dominium as a long-horizon deterministic simulation product: a game, engine-backed operating environment, validation workbench, content platform, and governance-heavy repository. Across the conversations, the recurring intent is not... `_Source: _ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md`.
- **EVC-01090 specification:** The conversations strongly prefer a rich Workbench and eventual editor/operator surfaces. Current authority is narrower: broad Workbench UI, renderer implementation, and native GUI remain blocked. Therefore synthesis may describe intent, but follow-up... `_Source: _ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md`.
- **EVC-01095 specification:** 1. Keep this synthesis advisory and archive-scoped. 2. Build a claim review matrix against canon, glossary, AGENTS, current queue, contracts, schema law, and targeted current docs. 3. Triage promotion candidates into serious, historical, stale, noisy... `_Source: _ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md`.
- **EVC-00164 specification:** The chat also established core architecture: Domino is the reusable engine layer; Dominium is the game/product layer. Products should be described once and presented through arbitrary UI/backend combinations using product contracts, capability... `_Source: _ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md`.
- **EVC-00173 specification:** The final major turn shifted from "does it align?" to "what practices should we follow to make it robust for decades?" The user asked for broad and deep guidance on portability, modularity, extensibility, structure, file names, function names, schemas... `_Source: _ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__01_human_readable_report.md`.
- **EVC-00199 specification:** Which recommendations should become formal requirements? `_Source: _ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__09_in_chat_reader.md`.
- **EVC-00328 specification:** The user also emphasized portability and future-proofing. The project should be built like a proper OS/game engine, not a one-off indie project. This led to engineering-law queues around public surface registry, API/ABI canon, dependency direction... `_Source: _ docs/archive/conversations/Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning__01_human_readable_report.md`.
- **EVC-00351 specification:** 1. Dominium is now framed as a deterministic contract-governed simulation platform. 2. Domino is reusable substrate. 3. Workbench is production/evidence environment, not authority. 4. AIDE is repo/control-plane harness. 5. Contracts are law... `_Source: _ docs/archive/conversations/`

Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__06_reader_brief.md.

- EVC-00393 **specification:** raylib as provider suite, not engine law __Source__: docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md.
- EVC-00415 **specification:** The launcher became an optional all-in-one Dominium control center, not a hard dependency. The game must still run directly without launcher involvement. The setup system became a separate canonical install/repair/uninstall authority. The user then fixed... __Source__: docs/archive/conversations/Launcher_Setup_Architecture/Dominium_Launcher_Setup_Architecture__05_reader_brief.md.
- EVC-00455 **specification:** 1. CLI is mandatory, TUI expected, GUI modular. 2. GUI shells are thin projections over command/service contracts. 3. Current repo authority is post-CONVERGE roots. 4. Domain work splits across contracts/game/content/docs/tests. 5. Current code is partly... __Source__: docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__06_reader_brief.md.
- EVC-00469 **specification:** The fourth level was reality checking. The user asked how the current repo code actually works from process start to client UI/world interaction. The audit found that the repo has real modular scaffolding: native product targets, an engine library, a... __Source__: docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__10_accompanying_detailed_summary_report.md.
- EVC-00630 **specification:** 1. The user wants planning/exploration here, not implementation. 2. The visible chat includes pasted earlier Dominium architecture content. 3. The assistant cannot recover hidden Dominium One/Two transcripts. 4. Repo truth must outrank chat memory. 5... __Source__: docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__06_reader_brief.md.
- EVC-00656 **specification:** 1. Foundation Lock is PASS_WITH_WARNINGS, not clean. 2. Fast strict passes; full CTest remains T4 debt. 3. Dependency-direction has 0 violations but known warnings. 4. - **EVC-01317 specification:** The conversation also produced several long-term architecture principles. Domino should be the reusable deterministic simulation substrate; Dominium should be one game/product layer built on it. The engine should define mechanisms, not Dominium-specific... `_Source:_ docs/archive/conversations/engine_baseline_architecture/dominio_dominium_engine_baseline_architecture__10_companion_detailed_summary_report.md`.
- **EVC-01358 specification:** The user's central concern was that the project must be built to last. The desired system is not a throwaway indie codebase. It should be portable, modular, extensible, reusable for different games on the same Domino engine, reusable for other engine... `_Source:_ docs/archive/conversations/omega_xi_pi_architecture_future/dominium_omega_xi_pi_architecture_future_proofing_planning__10_accompanying_human_readable_detailed_summary_and_report.md`.
- **EVC-00016 constraint:** The current queue does not authorize broad feature work. Broad Workbench UI, runtime module loading, provider runtime, package runtime, gameplay, renderer implementation, native GUI, and release publication remain blocked until later reviewed phases... `_Source:_ README.md`.
- **EVC-01067 constraint:** Current blocked queue scopes: 'broad_workbench_ui', 'gameplay', 'native_gui', 'package_runtime', 'provider_runtime', 'release_publication', 'renderer_implementation', 'runtime_module_loader'. `_Source:_ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-01083 constraint:** 'setup_launcher' (25 conversations): setup, repair, rollback, launcher profiles, instances, and product orchestration. Sources: Dominium APP0 Runtime, Platform, and Renderer Architecture `../_reader/by_chat/app_runtime_platform_renderers.md`, [Dominium...] `_Source:_ docs/archive/conversations/_synthesis/FULL_PROJECT_PICTURE_v0.md`.
- **EVC-00124 constraint:** First, the user provided prior context about Dominium's build and compatibility constraints. That context treated the engine as C89, the game layer as C++98, the simulation as deterministic/fixed-point, and the release process as governed by... `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00368 constraint:** After Foundation Lock closed with warnings, the user wanted to stop queueing prompts one at a time. The assistant proposed a parallel worktree system. `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md`.
- **EVC-00372 constraint:** The third major theme was service-first architecture. Earlier suggestions used paths like 'runtime/render/raylib', but the conversation refined that to 'runtime/<service>/providers/<provider>'. The intended services include platform, input, render, draw... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Dominio_Framework_Open_Source_Provider_Architecture__01_human_readable_report.md`.
- **EVC-00621 constraint:** The pasted material proposed seven universal layers: ontology, materialization, recognition, encapsulation, substitution, verification, and governance. It argued for representation ladders rather than graphical LOD, explicit semantic ascent/descent... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__01_human_readable_report.md`.

- **EVC-00644 constraint:** > Verify the latest repo queue and Foundation Lock, then draft 'PRESENTATION-CONTRACT-01' if it is not complete; if it is complete, draft 'UNIVERSE-EXPLORER-CONTRACT-01' as a planning artifact, preserving Workbench projection discipline... `__Source: __ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md`.
- **EVC-00752 constraint:** INFERENCE: The user is trying to prevent Dominium from accumulating accidental architecture. They want mechanical governance rather than relying on memory or assistant recommendations. They also want future assistants to stop repeating conceptual advice... `__Source: __ docs/archive/conversations/_reader/by_chat/build_and_future_proofing.md`.
- **EVC-00774 constraint:** After the downloadable package was generated, the user asked not to create another handoff package but to render the package contents into a readable, navigable in-chat report. This led to an "IN-CHAT REPORT READER" response. That response explained the... `__Source: __ docs/archive/conversations/_reader/by_chat/development_routes.md`.
- **EVC-00836 constraint:** Verify live repo state, then review/run 'FULL-GATE-LEGACY-TEST-ROUTE-01', then generate 'PACK-INTERNAL-LAYOUT-CANON-01' if the queue/status supports the maintenance lane. `__Source: __ docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-01154 constraint:** 07 verification and audit: self-audit and verification queue. `__Source: __ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__09_in_chat_reader.md`.
- **EVC-01178 constraint:** 1. Proof hygiene: fix stale AuditX/identity evidence and launcher marker debt so fast-strict/RepoX gates are clean. 2. Full-gate maintenance: run or shard full CTest and classify nonpath failures. 3. Projection conformance: prove... `__Source: __ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__01_human_readable_report.md`.
- **EVC-00046 prohibition:** Responsibilities and forbidden dependencies (quick map) `__Source: __ docs/architecture/CANONICAL_SYSTEM_MAP.md`.
- **EVC-01426 prohibition:** It does not open blocked renderer, gameplay, provider runtime, package runtime, broad Workbench UI, native GUI, or release publication work. `__Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_CURRENT_PROJECT_PICTURE_v0.md`.
- **EVC-00105 prohibition:** AIDE was positioned as a build intelligence and evidence layer. It should probe the machine, explain which tuples are available or blocked, generate local presets, run tuple verification, and record evidence. XStack should remain umbrella orchestration... `__Source: __ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__01_human_readable_report.md`.
- **EVC-00126 prohibition: RECOMMENDATION:** Keep CMake as the canonical build executor, but do not make 'CMakePresets.json' carry every host machine, IDE projection, OS floor, renderer, package lane, and development preference. `__Source: __ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.

1.23 22. Contradictions, Drift, and Stale Claims

The corpus contains stale and contradictory claims because it preserves old design states alongside current authority.

- **EVC-00012 decision:** Keep target-specific project state in 'aide/memory/'; do not copy source AIDE memory, queue history, generated context, reports, route decisions, cache-key reports, Gateway/provider status reports, 'aide.local/', raw prompts, raw responses, or secrets. `__Source: __ AGENTS.md`.

- **EVC-00065 decision:** Travel scheduling, replay, and law decisions become nondeterministic. `__Source: __ docs/architecture/INVARIANTS.md`.
- **EVC-01433 decision:** Rendering is presentational only and MUST NOT mutate truth or enforce authority decisions. `__Source: __ docs/canon/constitution_v1.md`.
- **EVC-01457 decision:** Foundation Lock is the repository decision gate that determines whether Dominium can leave the Foundation Lock queue and begin a first narrow governed product slice. `__Source: __ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00687 decision:** None in this docket. Current generated decisions are user decisions, queue decisions, or deferrals. `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00691 decision:** 'DECISION-0006': Should this conversation-derived claim become a future review item, remain historical, or be deferred: The assistant formalized this as the Perfect Earth Calendar, later called HPC-E. The final structure is clear, though the exact leap... `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00692 decision:** 'DECISION-0007': What disposition should be chosen for this unresolved claim: Before relying on this chat as project authority, a future assistant or human reviewer must confirm whether Dominium is actually intended to be simulation-heavy, whether strict...? `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00703 decision:** The user pasted the final README after those cleanup changes. At that point, the README had the current active form: deterministic constraints clarified, ports unified under one source hierarchy, '/ports' metadata-only if retained, Section 9 normative... `__Source: __ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-01427 decision:** Decision items are review prompts. The default disposition is defer unless a later explicit task opens the scope. `__Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_DECISION_DOCKET_v0.md`.
- **EVC-00123 decision:** **Chat label:** Dominium Build and Future-Proofing Architecture **Date anchor:** 2026-05-27 Australia/Melbourne **Scope:** This report covers the visible conversation and the preservation task that produced the accompanying handoff files. It does **not**... `__Source: __ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__10_accompanying_human_readable_detailed_summary_report.md`.
- **EVC-00136 decision:** DECISION-12: HPC-E Year Day and Leap Day are appended after February; canonical mode is undated and compatibility mode may use Feb 29/30. [FACT / INFERENCE] `__Source: __ docs/archive/conversations/Chronology_Celestial_Systems/Dominium_Chronology_Celestial_Systems__05_reader_brief.md`.
- **EVC-00153 decision:** DECISION-06: Support canonical surface plus multiple surface instances for shards/mirrors. `__Source: __ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.
- **EVC-00159 decision:** Final support tiers are user-defined and must be preserved. `__Source: __ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md`.
- **EVC-00161 decision:** Preserve final Tier 1/2/3 OS support ranges. `__Source: __ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md`.
- **EVC-00175 decision:** **DECISION-01:** The old v1 contract/glossary were accepted as the baseline for this chat because the user supplied them as the old ground truth and asked later questions against them. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__01_human_readable_report.md`.

- **EVC-00186 decision:** Kept assistant portability doctrine as recommendation/inference unless clearly accepted. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__07_verification_and_audit.md`.
- **EVC-00195 decision:** 1. context loaded, 2. top active priorities, 3. key constraints, 4. open questions, 5. contradictions or uncertainties, 6. recommended next action. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__08_future_chat_bootstrap_prompt.md`.
- **EVC-00198 decision:** '04_registers': workstreams, decisions, tasks, risks, verification queue. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Canon_Portability_Audit__09_in_chat_reader.md`.
- **EVC-00211 decision:** 18. What are the biggest ways a future assistant might misunderstand this conversation? 19. Which refactors are dangerous before build/test proof? 20. Which items are still assistant suggestions rather than user decisions? `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md`.
- **EVC-00214 decision:** 1. 'Dominium_Entire_Conversation_Accompanying_Report__10_accompanying_detailed_summary_report.md' - direct narrative explanation of the whole conversation. 2. 'Dominium_Canon_Portability_Audit__01_human_readable_report.md' - prior full preservation... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report__README_FIRST.md`.
- **EVC-00313 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/dominium_workbench_full_conversation_companion__human_readable_detailed_summary_report.md`.
- **EVC-00342 decision:** A major operational shift occurred near the end of the chat: instead of queueing all prompts sequentially, the user decided to run many tasks in parallel through multiple Codex chats and git worktrees. The assistant defined strict parallel-worker rules... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__01_human_readable_report.md`.
- **EVC-00356 decision:** Read: 1. Human-readable report for full understanding. 2. Reader brief for short review. 3. Context transfer packet for new chat. 4. Registers for tasks/decisions/artifacts. 5. Spec sheet for aggregation. 6. Audit file for uncertainty and verification queue. `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__09_in_chat_reader.md`.
- **EVC-00371 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__01_human_readable_report.md`.
- **EVC-00403 decision:** This chat decided Dominium's modern language/platform architecture. The key outcome is C17 + C++17, 64-bit, little-endian, C-compatible ABI, deterministic fixed-width data, and provider/capability modularity. `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__06_reader_brief.md`.
- **EVC-00467 decision:** The user asked for a single downloadable bundle containing all the files plus an accompanying human-readable detailed report of the conversation: what was discussed, what was decided, what was deferred, what was produced, and what still needs follow-up... `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__10_accompanying_detailed_summary_report.md`.

- **EVC-00509 decision:** Do not keep 'source/dominium/products' in the final layout. `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00566 decision:** The most important repo-supported decision is that Dominium authority must remain logical ACT, not wall-clock. The strongest recommendations are to freeze ACT units/serialization, audit DSYS timers, and keep civil time as projection-only. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__06_reader_brief.md`.
- **EVC-00579 decision:** 1. Save the ZIP. 2. Confirm which recommendations are accepted as requirements. 3. Audit DSYS timer backends. 4. Audit ACT serialization. 5. Draft canonical Dominium time architecture documentation. `_Source:_ docs/archive/conversations/Timekeeping_and_2038_Resilience/Dominium_Timekeeping_and_2038_Resilience__09_in_chat_reader.md`.
- **EVC-00620 decision:** Finally, the user pasted a newer repo-status summary saying the structure was now clean enough to stop broad structure refactors: canonical structure passed with warnings, fast strict and smoke proof passed, full CTest remained blocked by stale full-gate... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__01_human_readable_report.md`.
- **EVC-00643 decision:** 1. treating the Universe Explorer as a normal renderer/free-camera task; 2. ignoring the current queue and trying to implement broad Workbench UI or gameplay; 3. restarting broad repo structure cleanup; 4. treating assistant recommendations as accepted... `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md`.
- **EVC-00756 decision:** This produced a pattern: generate a large Codex/AIDE task, the user ran it or reported a result, then the assistant evaluated what was truly fixed versus what was only validator/document churn. The user eventually demanded a one-shot "actual final... `_Source:_ docs/archive/conversations/_reader/by_chat/canonical_structure_and_framework.md`.
- **EVC-00773 decision:** The first answer was assertive. It stated that Dominium must follow Route C and described the route as the only viable one for Dominium. Later parts of the chat corrected the status of that claim. FACT: the assistant made that recommendation. UNCERTAIN /... `_Source:_ docs/archive/conversations/_reader/by_chat/development_routes.md`.
- **EVC-00782 decision:** The final phase of the chat moved away from project documentation and into preserving the chat itself. The user requested a maximum-fidelity Context Transfer Packet, then requested that it be turned into a final downloadable/shareable report package... `_Source:_ docs/archive/conversations/_reader/by_chat/documentation_standards_readme.md`.
- **EVC-00821 decision:** DECISION-01:** The old v1 contract/glossary were accepted as the baseline for this chat because the user supplied them as the old ground truth and asked later questions against them. `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_complete_conversation.md`.
- **EVC-00852 decision:** The second central decision is that CLI, TUI, rendered GUI, OS-native GUI, and headless automation must be **projections of the same command/result/refusal/document/view spine**. A GUI button, a TUI hotkey, a CLI command, a headless JSON job, and a... `_Source:_ docs/archive/conversations/_reader/by_chat/domino_dominium_workbench.md`.
- **EVC-00868 decision:** The visible conclusion was that the engine has real deterministic substrate pieces, but these must be hardened through small playable slices and proof/replay tests. Determinism is not only a mathematical preference; it enables multiplayer authority... `_Source:_ docs/archive/conversations/_reader/by_chat/engine_baseline_architecture.md`.
- **EVC-00876 decision:** The key conclusion was that Workbench is not the general module system; it is one consumer of the module/command/service/provider/pack/artifact system. Workbench must not call private tools directly. It must route through registered commands and typed... `_Source:_ docs/archive/conversations/_reader/by_chat/foundation_workbench_codex.md`.

- **EVC-00883 decision:** The second major theme was the raylib ecosystem. The user liked raylib and asked whether its subprojects could be used: raylib itself, 'rlgl', 'rlsw', 'raymath', 'raygui', 'raudio', texture/model/font systems, and examples. The conclusion was yes, but... `_Source:_ docs/archive/conversations/_reader/by_chat/framework_open_source_provider.md`.
- **EVC-00909 decision:** There was also an early suggestion to create a 'DUI' facade, a Dominion UI abstraction, to support native widgets and fallback rendering. This idea was useful as a conceptual stepping stone but was not ultimately locked as a final requirement in the form... `_Source:_ docs/archive/conversations/_reader/by_chat/launcher_app_layer.md`.
- **EVC-00987 decision:** A major middle phase focused on XStack. XStack began as a Dominion-specific governance stack grown out of TestX, then expanded into RepoX, AuditX, and other concepts. We initially explored making XStack a general portable metaharness, but that proved too... `_Source:_ docs/archive/conversations/_reader/by_chat/refactor_control_plane.md`.
- **EVC-01003 decision:** The user then asked whether the implementation was industry-accepted and what could be improved. The response framed the approach as closer to game engines, operating systems, and long-lived infrastructure than typical game development. The important... `_Source:_ docs/archive/conversations/_reader/by_chat/testx_repo_x_governance.md`.
- **EVC-01036 decision:** The final plan accepted the newer repo status: structure is clean enough to stop giant structure prompts. Remaining cleanup should be targeted: stale full-gate tests, pack layout canon, residual taxonomy, AIDE state classification, public header ABI... `_Source:_ docs/archive/conversations/_reader/by_chat/universe_explorer_planning.md`.
- **EVC-01162 decision:** By the end, user reports indicated that several actual cleanup commits landed. Important reported commits included provider-structure work, actual final structure cleanup, full-gate legacy path routing, and Domino framework boundary definition. The... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__01_human_readable_report.md`.
- **EVC-01173 decision:** Ask: "What decisions are final?", "What is still uncertain?", "What is the next prompt?", "Which rejected options should we avoid?", "What should go into the master spec book?" `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__09_in_chat_reader.md`.
- **EVC-01180 decision:** 1. Is full CTest/T4 now green? Known answer from chat: no, not yet. It needs auditing and repair. 2. Are stale AuditX/identity evidence and launcher marker debt fixed? Last visible status said no or still pending. 3. Are raylib/SDL2/Lua providers... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__01_human_readable_report.md`.
- **EVC-01190 decision: Generated:** 2026-05-27 21:03:35 AEST **Scope:** This conversation's accessible content, the prior generated handoff package, visible user status reports, and uploaded/mounted summaries. **Purpose:** A human-readable companion report that explains what... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary.md`.
- **EVC-01198 decision: Generated:** 2026-05-27 21:03:35 AEST **Scope:** This conversation's accessible content, the prior generated handoff package, visible user status reports, and uploaded/mounted summaries. **Purpose:** A human-readable companion report that explains what... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary.txt`.
- **EVC-01207 decision:** This report summarizes the accessible conversation and the mounted artifacts available in '/mnt/data'. It incorporates the prior handoff/preservation files, user-reported commit statuses, repeated directory-structure reviews, and the architecture... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary_report.md`.

- **EVC-01227 decision:** Python 3 and CMake are the chosen quality-gate implementation route. `_Source: docs/archive/conversations/documentation_standards_readme/documentation_standards_readme_handoff__05_reader_brief.md`.
- **EVC-01251 decision:** 1. Old UI Editor / Tool Editor are superseded as final products. 2. Their useful pieces become Workbench modules and services. 3. Workbench is a production environment over the system, not authority. 4. CLI, TUI, rendered GUI, native GUI, headless... `_Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__06_reader_brief.md`.
- **EVC-01275 decision:** This chat was primarily about the Dominium / Domino Setup system: a deterministic, auditable, reversible installer/updater/verifier/rollback authority. It began with cross-platform setup architecture and directory planning, then shifted to canonical... `_Source: docs/archive/conversations/dominium_setup/dominium_setup_handoff__05_reader_brief.md`.
- **EVC-01352 decision:** This preservation package captures the substance of the chat: what was discussed, why it mattered, what was decided, what remains pending, what is uncertain, and how a future chat should continue. `_Source: docs/archive/conversations/omega_xi_pi_architecture_future/dominium_omega_xi_pi_architecture_future_proofing_planning__09_in_chat_reader.md`.
- **EVC-01384 decision:** Final README keeps `'/ports'` only as metadata/build config/capability descriptors, but this may need confirmation. `_Source: docs/archive/conversations/readme_ports_determinism/dominium_readme_ports_determinism__05_reader_brief.md`.
- **EVC-01395 decision:** See DECISION-01 through DECISION-27 in the registers. Highest priority: DECISION-01, DECISION-06, DECISION-10, DECISION-21, DECISION-23. `_Source: docs/archive/conversations/testx_repos_governance/dominium_testx_repos_governance_handoff__05_reader_brief.md`.
- **EVC-00001 specification:** Future Series: Sigma-1, Sigma-2, Sigma-3, Sigma-4, Sigma-5, Phi, Upsilon, Zeta Replacement Target: none; later mirrors and machine-readable governance surfaces must derive from this file rather than compete with it Binding Sources... `_Source: AGENTS.md`.
- **EVC-00014 specification:** create or resume a bounded AIDE task before reporting blocked; ask the user only for semantic authority conflicts, destructive ambiguity, missing external secrets, or required review gates. `_Source: AGENTS.md`.
- **EVC-00031 specification:** Required updates: documentation surface exists, but current canon ownership is not explicit `_Source: docs/README.md`.
- **EVC-00040 specification:** Archived documents are kept for provenance only. Canonical contracts are in `'docs/architecture/'`. `_Source: docs/README.md`.
- **EVC-00044 specification:** Dependency direction is authoritative and must not be inverted. `_Source: docs/architecture/CANONICAL_SYSTEM_MAP.md`.

1.24 23. Prerequisites, Dependencies, and Future Queue Work

Future work depends on validation, queue openings, contracts, docs promotion, and sometimes full-gate debt.

- **EVC-00012 decision:** Keep target-specific project state in `'aide/memory/'`; do not copy source AIDE memory, queue history, generated context, reports, route decisions, cache-key reports, Gateway/provider status reports, `'aide.local/'`, raw prompts, raw responses, or secrets. `_Source: AGENTS.md`.
- **EVC-00687 decision:** None in this docket. Current generated decisions are user decisions, queue decisions, or deferrals. `_Source: docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.

- **EVC-01427 decision:** Decision items are review prompts. The default disposition is defer unless a later explicit task opens the scope. `_Source:_ docs/archive/docs_corpus/_reconciliation/DOCS_DECISION_DOCKET_v0.md`.
- **EVC-00356 decision:** Read: 1. Human-readable report for full understanding. 2. Reader brief for short review. 3. Context transfer packet for new chat. 4. Registers for tasks/decisions/artifacts. 5. Spec sheet for aggregation. 6. Audit file for uncertainty and verification queue. `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__09_in_chat_reader.md`.
- **EVC-00517 decision:** The most important decisions were DECISION-03 through DECISION-10. The user accepted that XStack should remain Dominium's strict profile, not the public general system. AIDE should become the portable repo-native operating layer. AIDE's first product... `_Source:_ docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__01_human_readable_report.md`.
- **EVC-00532 decision:** The uploaded instruction file defines this as a maximum-fidelity preservation, explanation, handoff, audit, spec-prep, and export task for the current chat. The extraction below is grounded in the visible conversation context and the uploaded prompt. The... `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__01_human_readable_report.md`.
- **EVC-00543 decision:** See Decision Register in file 04. `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00828 decision:** The user then asked for recommendations. The assistant recommended a clean startup policy: explicit flags first, no environment/config override in v1, terminal detection through dsys, generic AUTO behavior, product-specific headless handling for the... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_domino_codex_planning.md`.
- **EVC-00860 decision:** After the architecture and prompts were created, the user asked for a maximum-fidelity context transfer packet. The assistant produced one. The user then asked for a downloadable report package; the assistant generated package files and a ZIP. The user... `_Source:_ docs/archive/conversations/_reader/by_chat/domino_engine_refactor_prompts.md`.
- **EVC-00924 decision:** The conversation implies a goal of turning Dominium into a long-lived product-line platform rather than a single-game repository. It also implies a desire for auditability: decisions should be grounded, visible, mechanically enforceable, and later... `_Source:_ docs/archive/conversations/_reader/by_chat/modularity_aide_refactorability.md`.
- **EVC-00980 decision:** The user then shifted from architecture implementation to preservation. They asked for prompts that would cause Codex to generate starter prompts for future ChatGPT conversations, including an extended master starter prompt. Finally, they asked for a... `_Source:_ docs/archive/conversations/_reader/by_chat/refactor_architecture.md`.
- **EVC-00987 decision:** A major middle phase focused on XStack. XStack began as a Dominium-specific governance stack grown out of TestX, then expanded into RepoX, AuditX, and other concepts. We initially explored making XStack a general portable metaharness, but that proved too... `_Source:_ docs/archive/conversations/_reader/by_chat/refactor_control_plane.md`.
- **EVC-00995 decision:** The conversation then moved into how this might fit XStack. The model shifted from "better public version number" to "layered identity model." The assistant recommended preserving per-product versions, a global build number, build IDs, compatibility... `_Source:_ docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.
- **EVC-00996 decision:** The chat was then summarized into a knowledge base. After that, the user proposed an even deeper internal rule: use capabilities instead of versions for compatibility. The response accepted this as

a stronger model: versions identify releases... `_Source:_ docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.

- **EVC-01050 decision:** The future relevance of this chat is high. It should feed directly into the future project spec book and into a corrected implementation prompt. But it should not be treated as final implementation detail everywhere. Many high-level decisions are... `_Source:_ docs/archive/conversations/_reader/by_chat/world_architecture.md`.
- **EVC-01236 decision:** DECISION-03 - All platform interaction must go through dsys. (FACT) `_Source:_ docs/archive/conversations/dominium_domino_codex_planning/dominium_domino_codex_planning__05_reader_brief.md`.
- **EVC-01251 decision:** 1. Old UI Editor / Tool Editor are superseded as final products. 2. Their useful pieces become Workbench modules and services. 3. Workbench is a production environment over the system, not authority. 4. CLI, TUI, rendered GUI, native GUI, headless... `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/Dominium_Workbench_AIDE_Presentation_Provider_Strategy__06_reader_brief.md`.
- **EVC-01330 decision:** Define the GUI/binary architecture doctrine and backend/UI contract first, then map products and platforms into matrices. Do not generate code or final prompts until those decisions are explicit. `_Source:_ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md`.
- **EVC-01368 decision:** Final active plan is the 9-prompt pack, not earlier superseded plans. `_Source:_ docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-01372 decision:** Download this package, then if continuing implementation, inspect the repo/archive and run Final Prompt 1 in Codex. `_Source:_ docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-00014 specification:** create or resume a bounded AIDE task before reporting blocked; ask the user only for semantic authority conflicts, destructive ambiguity, missing external secrets, or required review gates. `_Source:_ AGENTS.md`.
- **EVC-01070 specification:** Any claim touching canon, glossary, authority order, contracts, schema law, current queue, release, implementation, or blocked scope. `_Source:_ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-01077 specification:** 'ui' (45 conversations): presentation, tools, editor concepts, perceived model surfaces, and command/result display. - **EVC-01095 specification:** 1. Keep this synthesis advisory and archive-scoped. 2. Build a claim review matrix against canon, glossary, AGENTS, current queue, contracts, schema law, and targeted current docs. 3. Triage promotion candidates into serious, historical, stale, noisy... `_Source:_ docs/archive/conversations/_synthesis/PROJECT_SYNTHESIS_BOOK_v0.md`.
- **EVC-01104 specification:** Do not patch canon, contracts, schema, implementation, release, or queue files from this atlas. `_Source:_ docs/archive/conversations/_synthesis/READ_THIS_FIRST_v0.md`.
- **EVC-01415 specification:** Non-use: canon, contract/schema, implementation, release, or queue override `_Source:_ docs/archive/docs_corpus/_archive/DOCS_CONVERSATION_CORPUS_INTEGRATION_v0.md`.
- **EVC-01425 specification:** It does not rewrite canon, contracts, schema, implementation, release, or queue state. `_Source:_ docs/archive/docs_corpus/_reconciliation/DOCS_CURRENT_PROJECT_PICTURE_v0.md`.

- **EVC-00118 specification:** Write the implementation prompt for public surface registry. `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture_09_in_chat_reader.md.`
- **EVC-00119 specification:** Write the implementation prompt for tuple-driven build contracts. `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture_09_in_chat_reader.md.`
- **EVC-00147 specification:** This chat developed the Dominion project from broad systems brainstorming into a detailed deterministic engine architecture and Codex-ready implementation plan. It covered the world model, building model, cut/fill and terrain layers... `_Source:_ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II_05_reader_brief.md.`
- **EVC-00148 specification:** The most immediate practical output is a set of V4 spec replacements and Codex prompts. The important current target is a playable MVP: one full-size Earth surface; all systems minimally interactable; Lua for all data; Windows/DX9/Win32/SDL2 path; 2D... `_Source:_ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II_05_reader_brief.md.`
- **EVC-00220 specification:** CRITICAL RULES: 1. Do not invent facts. 2. Do not silently infer. 3. Do not turn brainstorms into decisions. 4. Do not treat assistant suggestions as user decisions unless the user clearly accepted them. 5. Preserve tentative status where applicable. 6... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Dominium_Entire_Conversation_Accompanying_Report_source_uploaded_preservation_prompt.txt.`
- **EVC-00228 specification:** CRITICAL RULES: 1. Do not invent facts. 2. Do not silently infer. 3. Do not turn brainstorms into decisions. 4. Do not treat assistant suggestions as user decisions unless the user clearly accepted them. 5. Preserve tentative status where applicable. 6... `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/Accompanying_Report/Pasted_text.txt.`
- **EVC-00328 specification:** The user also emphasized portability and future-proofing. The project should be built like a proper OS/game engine, not a one-off indie project. This led to engineering-law queues around public surface registry, API/ABI canon, dependency direction... `_Source:_ docs/archive/conversations/Domino_Dominium_Workbench/prior_preservation_files/dominium_workbench_presentation_spine_universe_explorer_planning_01_human_readable_report.md.`
- **EVC-00345 specification:** This led to the Foundation Lock queue: public surface registry, API/ABI canon, dependency direction, command surface, diagnostics/evidence, artifact identity, schema/protocol evolution, capability/refusal, provider model, module/workbench/app... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation_01_human_readable_report.md.`
- **EVC-00416 specification:** The final major direction change was the user's requirement that the launcher be designed and implemented using the Domino platform/rendering layers: 'dsys' for platform services and 'dgfx' for rendering, with strict C89 APIs and retro/modern support... `_Source:_ docs/archive/conversations/Launcher_Setup_Architecture/Dominium_Launcher_Setup_Architecture_05_reader_brief.md.`
- **EVC-00431 specification:** This chat established a future-proofing doctrine for Dominion: stable repository ownership, AIDE-driven refactorability, portable modular code, reusable engine/runtime/contracts, and mechanically enforced compatibility boundaries. `_Source:_ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture_06_reader_brief.md.`
- **EVC-00540 specification:** Reader Brief - Dominion XStack Release Identity and Versioning `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning_06_reader_brief.md.`
- **EVC-00548 specification:** In-Chat Reader - Dominion XStack Release Identity and Versioning `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning_09_in_chat_reader.md.`

- **EVC-00549 specification:** This package preserves the chat's versioning/release-identity design work for later human reading and aggregation. It includes a full report, context transfer packet, YAML-style spec sheet, structured registers, aggregator packet, reader brief... `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.
- **EVC-00552 specification:** What should the manifest schema be? `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.
- **EVC-00553 specification:** How should capabilities/contracts be named and negotiated? `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.
- **EVC-00555 specification:** Start with Release Constitution and SemVer Component Inventory. Then define suite policy, build identity, channel/lifecycle, artifact names, manifest schema, target taxonomy, and capabilities. `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.
- **EVC-00656 specification:** 1. Foundation Lock is `PASS_WITH_WARNINGS`, not clean. 2. Fast strict passes; full CTest remains T4 debt. 3. Dependency-direction has 0 violations but known warnings. 4. Broad feature work remains blocked. 5. Package mount slice is complete only as... `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__06_reader_brief.md`.
- **EVC-00715 specification:** The discussion then moved into what APP0 really needs to accomplish. The user clarified that the long-term macro-prompt plan should not merely produce documentation or empty stubs. At the end of that plan, the project should have a **running executable**... `_Source:_ docs/archive/conversations/_reader/by_chat/app_runtime_platform_renderers.md`.
- **EVC-00779 specification:** The conversation began with a practical question: the user wanted Codex to generate documentation for every file, including metadata, functions, definitions, dependencies, and related information, and wanted to know whether that documentation should live... `_Source:_ docs/archive/conversations/_reader/by_chat/documentation_standards_readme.md`.
- **EVC-00829 specification:** However, the later context transfer packet treated that inspection claim as **UNCERTAIN / UNVERIFIED**. This was careful and correct: within the visible chat, there was no reliable tool trace proving the repo had actually been inspected. Therefore... `_Source:_ docs/archive/conversations/_reader/by_chat/dominium_domino_codex_planning.md`.
- **EVC-00947 specification:** The chat began with a questionnaire requirement. The user explicitly told the assistant not to assume what "platforms, renderers, APIs, and done" meant. A questionnaire was asked and the user supplied detailed answers: Tier-1 platforms such as Win32 and... `_Source:_ docs/archive/conversations/_reader/by_chat/platform_renderer_api_plan.md`.
- **EVC-00994 specification:** This chat was about designing a durable release identity, versioning, compatibility, build, and packaging system for Dominium/XStack. The user began from dissatisfaction with products that change versioning policies midstream, citing examples such as... `_Source:_ docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.
- **EVC-01106 specification:** [FACT] This chat developed architecture for the Dominium/Domino deterministic engine, beginning with advanced simulation systems and expanding into gameplay layering, infrastructure construction, arbitrary placement, corridors/splines... `_Source:_ docs/archive/conversations/advanced_simulation_infrastructure/dominium_advanced_simulation_infrastructure_architecture__05_reader_brief.md`.
- **EVC-01230 specification:** This chat was about preserving and extending planning state for the Dominium + Domino project. The user first supplied a detailed master architecture prompt: Domino is a deterministic ISO C89 fixed-point engine; Dominium is a portable C++98 product... `_Source:_ docs/archive/`

conversations/dominium_domino_codex_planning/dominium_domino_codex_planning__05_reader_brief.md.

- **EVC-01233 specification:** The user later asked for platform/render/API questionnaire filling based on dominium.zip. The answer given in the prior chat must be treated as unverified until the repo is inspected in a new chat. `__Source: docs/archive/conversations/dominium_domino_codex_planning/dominium_domino_codex_planning__05_reader_brief.md.`
- **EVC-01256 specification:** A second major line of discussion was repo governance and development process. The project's queue evolved through Foundation Lock, product-spine slices, package mount, replay proof, bare-bones client shell, product-spine review, presentation contracts... `__Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md.`
- **EVC-01266 specification:** 1. Old UI Editor/Tool Editor is superseded. 2. Workbench is the new production environment. 3. Workbench is not authority. 4. Domino is reusable substrate; Dominium is product family. 5. AIDE governs tasks/evidence; Codex executes patches. 6... `__Source: docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__06_reader_brief.md.`
- **EVC-01278 specification:** The user stated that two large Codex prompts had already been applied: one for VS2026/CMake/build repair and one for engine purity/contract ownership. A further prompt was generated in this chat to finish setup code/docs/spec alignment. Actual repo state... `__Source: docs/archive/conversations/dominium_setup/dominium_setup_handoff__05_reader_brief.md.`
- **EVC-01335 specification:** Two Codex prompts were said to have been applied: one for CMake/VS2026/build repair and one for engine purity/contract ownership. Their results must still be verified against the repo. The likely next action is to run verification gates, then execute or... `__Source: docs/archive/conversations/launcher_app_layer/dominium_launcher_app_layer_handoff__05_reader_brief.md.`
- **EVC-00016 constraint:** The current queue does not authorize broad feature work. Broad Workbench UI, runtime module loading, provider runtime, package runtime, gameplay, renderer implementation, native GUI, and release publication remain blocked until later reviewed phases... `__Source: README.md.`
- **EVC-00688 constraint:** Items touching blocked queue scope must remain explanatory or deferred; no implementation scope is opened. `__Source: docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md.`
- **EVC-01067 constraint:** Current blocked queue scopes: 'broad_workbench_ui', 'gameplay', 'native_gui', 'package_runtime', 'provider_runtime', 'release_publication', 'renderer_implementation', 'runtime_module_loader'. `__Source: docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md.`
- **EVC-01105 constraint:** Do not open blocked queue scopes from old conversations. `__Source: docs/archive/conversations/_synthesis/READ_THIS_FIRST_v0.md.`

1.25 24. Second- and Third-Order Effects

Dominium decisions have downstream effects across replay, portability, release identity, validation, assistant workflows, and documentation governance.

- **EVC-00694 decision:** [INFERENCE] The conclusion was not a finalized implementation but a working architecture: each simulation domain should be deterministic, fixed-point, content-driven, versioned, replayable, and integrated through clear read/write boundaries. `__Source: docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md.`

- **EVC-00140 decision:** The visible chat generated many implementation-spec prompts across engine, platform, render, audio, systems, and the start of game. It also preserved important decisions: UTF-8 internal text, retro fallbacks, semantic versioning, build metadata policy... `_Source: docs/archive/conversations/Dominium_Architecture_I/Dominium_Architecture_I__05_reader_brief.md`.
- **EVC-00243 decision:** See DECISION-01 through DECISION-13. Strongest user-stated decisions: science-bounded procedural planets, robotic mothership premise, robot bodies, nanobot construction, automation over worker NPCs, mothership-limited fabrication, machine process... `_Source: docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__06_reader_brief.md`.
- **EVC-00517 decision:** The most important decisions were DECISION-03 through DECISION-10. The user accepted that XStack should remain Dominium's strict profile, not the public general system. AIDE should become the portable repo-native operating layer. AIDE's first product... `_Source: docs/archive/conversations/Refactor_Control_Plane/AIDE_XStack_Dominium_Refactor_Control_Plane__01_human_readable_report.md`.
- **EVC-00532 decision:** The uploaded instruction file defines this as a maximum-fidelity preservation, explanation, handoff, audit, spec-prep, and export task for the current chat. The extraction below is grounded in the visible conversation context and the uploaded prompt. The... `_Source: docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__01_human_readable_report.md`.
- **EVC-00543 decision:** See Decision Register in file 04. `_Source: docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__06_reader_brief.md`.
- **EVC-00588 decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source: docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__01_human_readable_report.md`.
- **EVC-00668 decision:** The conclusion was not to globally simulate everything. Instead, the architecture should support deterministic lazy historical evaluation: `_Source: docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__10_accompanying_detailed_summary.md`.
- **EVC-00794 decision:** This chat was mainly about turning the **Dominium** game/engine from a broad, ambitious design into a coherent, Codex-ready architecture. The user had already explored many individual systems elsewhere or earlier in the same chat: railways, roadways... `_Source: docs/archive/conversations/_reader/by_chat/dominium_architecture_ii.md`.
- **EVC-00834 decision:** The discussion then moved into AIDE. The user wanted to automate as much as possible through Codex and AIDE. We developed a task operating model: AIDE creates WorkUnits, tracks attempts, blockers, evidence, repairs, resumes, checkpoints, and promotion... `_Source: docs/archive/conversations/_reader/by_chat/dominium_full_conversation.md`.
- **EVC-00876 decision:** The key conclusion was that Workbench is not the general module system; it is one consumer of the module/command/service/provider/pack/artifact system. Workbench must not call private tools directly. It must route through registered commands and typed... `_Source: docs/archive/conversations/_reader/by_chat/foundation_workbench_codex.md`.
- **EVC-00891 decision:** An assistant initially rewrote that prompt into a cleaner Codex-ready form. The user then corrected the process: **before generating prompts, the group needed to discuss the design**. That changed the status of the rewritten prompt. It became a useful... `_Source: docs/archive/conversations/_reader/by_chat/gui_binary_content.md`.

- **EVC-00938 decision:** This chat was about rethinking Dominium from a conventional game project into a much broader, more modular, deterministic, extensible software environment. The user repeatedly asked whether the current plan was the best possible version, and the... `_Source:_ docs/archive/conversations/_reader/by_chat/os_interface_repo_architecture.md`.
- **EVC-00970 decision:** This chat was mainly about refining the root 'README.md' for the **Dominium / Domino** project and then preserving the resulting decisions in a form that could survive into later chats. The project, as described in the README, is a deterministic... `_Source:_ docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md`.
- **EVC-00980 decision:** The user then shifted from architecture implementation to preservation. They asked for prompts that would cause Codex to generate starter prompts for future ChatGPT conversations, including an extended master starter prompt. Finally, they asked for a... `_Source:_ docs/archive/conversations/_reader/by_chat/refactor_architecture.md`.
- **EVC-00995 decision:** The conversation then moved into how this might fit XStack. The model shifted from "better public version number" to "layered identity model." The assistant recommended preserving per-product versions, a global build number, build IDs, compatibility... `_Source:_ docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.
- **EVC-00996 decision:** The chat was then summarized into a knowledge base. After that, the user proposed an even deeper internal rule: use capabilities instead of versions for compatibility. The response accepted this as a stronger model: versions identify releases... `_Source:_ docs/archive/conversations/_reader/by_chat/release_identity_and_versioning.md`.
- **EVC-01018 decision:** The first answer established the central architectural position of this chat: Dominium should not wait for UE6 or treat UE6 as the whole game platform. The recommended path was to build using current Unreal technology where useful, structure the project... `_Source:_ docs/archive/conversations/_reader/by_chat/ue6_domino_deterministic_universe.md`.
- **EVC-01050 decision:** The future relevance of this chat is high. It should feed directly into the future project spec book and into a corrected implementation prompt. But it should not be treated as final implementation detail everywhere. Many high-level decisions are... `_Source:_ docs/archive/conversations/_reader/by_chat/world_architecture.md`.
- **EVC-01162 decision:** By the end, user reports indicated that several actual cleanup commits landed. Important reported commits included provider-structure work, actual final structure cleanup, full-gate legacy path routing, and Domino framework boundary definition. The... `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_architecture_repo_foundation__01_human_readable_report.md`.
- **EVC-01236 decision:** DECISION-03 - All platform interaction must go through dsys. (FACT) `_Source:_ docs/archive/conversations/dominium_domino_codex_planning/dominium_domino_codex_planning__05_reader_brief.md`.
- **EVC-01261 decision:** The user accepted that the old UI Editor/Tool Editor were good general ideas but bad final products. The new direction became a cross-platform rendered Workbench that uses the same runtime, renderer, UI, command, pack, and diagnostics systems as the... `_Source:_ docs/archive/conversations/dominium_full_conversation/previous_preservation_files/dominium_workbench_aide_architecture_preservation__01_human_readable_report.md`.
- **EVC-01330 decision:** Define the GUI/binary architecture doctrine and backend/UI contract first, then map products and platforms into matrices. Do not generate code or final prompts until those decisions are explicit. `_Source:_ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md`.
- **EVC-01368 decision:** Final active plan is the 9-prompt pack, not earlier superseded plans. `_Source:_ docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.

- **EVC-01372 decision:** Download this package, then if continuing implementation, inspect the repo/archive and run Final Prompt 1 in Codex. `_Source:_ docs/archive/conversations/platform_renderer_api_plan/dominium_codex_platform_renderer_api_plan__05_reader_brief.md`.
- **EVC-00003 specification:** 1. 'docs/canon/constitution_v1.md' 2. 'docs/canon/glossary_v1.md' 3. 'AGENTS.md' 4. scope-specific canonical planning, semantic, schema, contract, release, and policy artifacts named by the active task 5. operational registries, projections, mirrors... `_Source:_ AGENTS.md`.
- **EVC-00696 specification:** The entire conversation is anchored by the requirement that Dominium must run deterministically. This means the same initial state and same inputs must produce the same state across machines, compilers, operating systems, and eventually retro and modern... `_Source:_ docs/archive/conversations/_promotion/PROMOTION_WAVE_1_CANDIDATES_v0.md`.
- **EVC-01077 specification:** 'ui' (45 conversations): presentation, tools, editor concepts, perceived model surfaces, and command/result display. - **EVC-00553 specification:** How should capabilities/contracts be named and negotiated? `_Source:_ docs/archive/conversations/Release_Identity_and_Versioning/Dominium_XStack_Release_Identity_and_Versioning__09_in_chat_reader.md`.

1.26 25. Recommended Next Steps

The best next work is review and controlled promotion, not more bulk rendering or broad implementation.

- **EVC-01457 decision:** Foundation Lock is the repository decision gate that determines whether Dominium can leave the Foundation Lock queue and begin a first narrow governed product slice. `_Source:_ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00682 decision:** What disposition should be chosen for this unresolved claim: The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00687 decision:** None in this docket. Current generated decisions are user decisions, queue decisions, or deferrals. `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00689 decision:** 'DECISION-0001': What disposition should be chosen for this unresolved claim: The user then asked whether arbitrary placement was possible or whether the system was stuck to grids. The answer established that the engine should be grid-agnostic. [FACT] The...? `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-00691 decision:** 'DECISION-0006': Should this conversation-derived claim become a future review item, remain historical, or be deferred: The assistant formalized this as the Perfect Earth Calendar, later called HPC-E. The final structure is clear, though the exact leap... `_Source:_ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md`.
- **EVC-01068 decision:** Safe now: archive reading, decision review, promotion review, reconciliation crosswalks, docs-only microtask preparation, and validators. `_Source:_ docs/archive/conversations/_synthesis/CURRENT_PROJECT_ATLAS_v0.md`.
- **EVC-01414 decision:** Use: design intent, review backlog, decision and promotion candidates `_Source:_ docs/archive/docs_corpus/_archive/DOCS_CONVERSATION_CORPUS_INTEGRATION_v0.md`.
- **EVC-01427 decision:** Decision items are review prompts. The default disposition is defer unless a later explicit task opens the scope. `_Source:_ docs/archive/docs_corpus/_reconciliation/DOCS_DECISION_DOCKET_v0.md`.
- **EVC-00117 decision:** Which recommendations are decisions versus advice? `_Source:_ docs/archive/conversations/Build_and_Future_Proofing/Dominium_Build_and_Future_Proofing_Architecture__09_in_chat_reader.md`.

- **EVC-00151 decision:** DECISION-03: Adopt base-16 spatial ladder from subnano to surface. `_Source:_ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.
- **EVC-00152 decision:** DECISION-04: Store surfaces as sparse microgrids/chunks, not continuous dense arrays. `_Source:_ docs/archive/conversations/Dominium_Architecture_II/Dominium_Architecture_II__05_reader_brief.md`.
- **EVC-00158 decision:** The user finalized platform support tiers: Tier 1 is Windows NT 2000 SP4-latest, Mac OS X 10.6-10.14, Linux 3.2-current; Tier 2 extends to Windows 98 SE-Me, Mac OS 9-9.2, Mac OS X 10.6-15.0, Linux 2.6.18-current; Tier 3 covers MS-DOS 3.3-6.2, Windows 3... `_Source:_ docs/archive/conversations/Dominium_Architecture_III/Dominium_Architecture_III__05_reader_brief.md`.
- **EVC-00169 decision:** See Decision Register in full report. Highest priority: DECISION-03, DECISION-05, DECISION-07, DECISION-08, DECISION-12, DECISION-19, DECISION-28. `_Source:_ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md`.
- **EVC-00300 decision:** See Decision Register. The strongest user-stated decisions are DECISION-02, DECISION-04, DECISION-05, DECISION-06, DECISION-08, and DECISION-09. DECISION-11 and DECISION-12 are assistant recommendations pending user ratification. `_Source:_ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__06_reader_brief.md`.
- **EVC-00342 decision:** A major operational shift occurred near the end of the chat: instead of queueing all prompts sequentially, the user decided to run many tasks in parallel through multiple Codex chats and git worktrees. The assistant defined strict parallel-worker rules... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__01_human_readable_report.md`.
- **EVC-00356 decision:** Read: 1. Human-readable report for full understanding. 2. Reader brief for short review. 3. Context transfer packet for new chat. 4. Registers for tasks/decisions/artifacts. 5. Spec sheet for aggregation. 6. Audit file for uncertainty and verification queue. `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__09_in_chat_reader.md`.
- **EVC-00390 decision:** '04_registers.md': decisions, tasks, risks, questions, artifacts, verification items. `_Source:_ docs/archive/conversations/Framework_Open_Source_Provider/Domino_Framework_Open_Source_Provider_Architecture__09_in_chat_reader.md`.
- **EVC-00458 decision:** This preservation package explains the chat, records decisions, tasks, artifacts, risks, and open questions, and exports a structured spec/aggregation packet for future merging. `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__09_in_chat_reader.md`.
- **EVC-00467 decision:** The user asked for a single downloadable bundle containing all the files plus an accompanying human-readable detailed report of the conversation: what was discussed, what was decided, what was deferred, what was produced, and what still needs follow-up... `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__10_accompanying_detailed_summary_report.md`.
- **EVC-00512 decision:** See DECISION-01 through DECISION-22 in the registers. Highest impact: DECISION-01, DECISION-02, DECISION-03, DECISION-06, DECISION-08, DECISION-11, DECISION-13, DECISION-14, DECISION-18, DECISION-19. `_Source:_ docs/archive/conversations/Refactor_Architecture/Dominium_Domino_Refactor_Architecture__05_reader_brief.md`.
- **EVC-00607 decision:** 1. Confirm whether the architecture recommendations should become project decisions. 2. Define Domino's role. 3. Verify UE5/UE6 facts. 4. Specify the deterministic MVP. 5. Prototype fixed-tick replay and state hashes. `_Source:_ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md`.

- **EVC-00611 decision:** Main caveats: Partial transcript access; UE5/UE6 facts need verification; assistant recommendations need user confirmation before becoming final project decisions. `__Source: __ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__09_in_chat_reader.md.`
- **EVC-00615 decision:** The package also preserves assistant recommendations, but it does not treat every recommendation as a final user decision. The user clearly asked strategic questions and requested preservation. They did not explicitly ratify every architecture detail as... `__Source: __ docs/archive/conversations/UE6_Domino_Deterministic_Universe/Dominium_UE6_Domino_Deterministic_Universe__10_accompanying_human_readable_detailed_summary_and_report.md.`
- **EVC-01110 decision:** The hard user-stated decisions are DECISION-01 through DECISION-05. The strongest design commitments are DECISION-08, DECISION-10, DECISION-13, DECISION-15, DECISION-16, and DECISION-17. See the registers file for exact statuses and labels. `__Source: __ docs/archive/conversations/advanced_simulation_infrastructure/dominium_advanced_simulation_infrastructure_architecture__05_reader_brief.md.`
- **EVC-01214 decision:** The crucial caveat is that the user did not visibly accept the proposed route. Treat it as a strong assistant proposal, not as a confirmed project decision. The chat then shifted into continuity preservation: the user requested a maximum-fidelity Context... `__Source: __ docs/archive/conversations/development_routes/dominium_development_routes__05_reader_brief.md.`
- **EVC-01329 decision:** Do not treat assistant suggestions as user decisions. `__Source: __ docs/archive/conversations/gui_binary_content/dominium_gui_binary_content_handoff__05_reader_brief.md.`
- **EVC-01463 constraint:** Continue narrow governed product-spine slices recorded by `'aide/queue/current.toml'`. `__Source: __ docs/repo/FOUNDATION_LOCK.md.`
- **EVC-01467 constraint:** Keep Queue B hardening planned but not a substitute for the blocker repair. `__Source: __ docs/repo/FOUNDATION_LOCK.md.`
- **EVC-00688 constraint:** Items touching blocked queue scope must remain explanatory or deferred; no implementation scope is opened. `__Source: __ docs/archive/conversations/_decision/DECISION_SUMMARY_v0.md.`
- **EVC-01105 constraint:** Do not open blocked queue scopes from old conversations. `__Source: __ docs/archive/conversations/_synthesis/READ_THIS_FIRST_v0.md.`
- **EVC-01416 constraint:** The current queue blocks these broad work areas. Docs-corpus outputs record them for navigation only. `__Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_BLOCKED_SCOPE_ALIGNMENT_v0.md.`
- **EVC-01421 constraint:** Use generated contradictions and promotion queues to plan later tasks. `__Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_CURRENT_PROJECT_PICTURE_v0.md.`
- **EVC-01428 constraint:** This queue records later review candidates. It does not apply any live-doc patch. `__Source: __ docs/archive/docs_corpus/_reconciliation/DOCS_PROMOTION_QUEUE_v0.md.`
- **EVC-00167 constraint:** Manual and queued work both flow through jobs. `__Source: __ docs/archive/conversations/Dominium_Architecture_IV/Dominium_Architecture_IV__05_reader_brief.md.`
- **EVC-00250 constraint:** `'07_verification_and_audit.md'`: sections 32-34 and verification queue. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/deterministic_solar_system_handoff_file/Dominium_Deterministic_Solar_System_Architecture__09_in_chat_reader.md.`
- **EVC-00307 constraint:** 07 Verification and audit: Sections 32-34 and verification queue. `__Source: __ docs/archive/conversations/Dominium_Complete_Conversation/robotic_seed_civilisation_handoff_file/Dominium_Robotic_Seed_Civilisation_Architecture__09_in_chat_reader.md.`

- **EVC-00350 constraint:** This chat was about getting Dominion out of endless repo refactor and into governed product work. It preserved the architecture, task queue, constraints, and next steps. `__Source: __ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__06_reader_brief.md.`
- **EVC-00368 constraint:** After Foundation Lock closed with warnings, the user wanted to stop queueing prompts one at a time. The assistant proposed a parallel worktree system. `__Source: __ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md.`
- **EVC-00440 constraint:** 1. '00_manifest.md' - file list and package status. 2. '01_human_readable_report.md' - sections 0-16. 3. '02_context_transfer_packet.md' - future-chat handoff. 4. '03_spec_sheet.yaml' - machine-readable aggregation sheet. 5. '04_registers.md' -... `__Source: __ docs/archive/conversations/Modularity_AIDE_Refactorability/Dominium_Modularity_AIDE_Refactorability_Architecture__09_in_chat_reader.md.`
- **EVC-00463 constraint:** File 07 verification/audit: self-audit and verification queue. `__Source: __ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__09_in_chat_reader.md.`
- **EVC-00491 constraint:** '04_registers.md' - workstreams, decisions, tasks, constraints, preferences, questions, artifacts, rejected options, risks, verification queue, timeline, spec contributions. `__Source: __ docs/archive/conversations/Portability_Assurance_Future_Proof/Domino_Dominium_Portability_Assurance_Future_Proof_Architecture__09_in_chat_reader.md.`
- **EVC-00637 constraint:** Verify current repo queue and then draft the next authorized planning artifact. `__Source: __ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__09_in_chat_reader.md.`
- **EVC-00652 constraint:** Current expected state from this chat: Foundation Lock is 'PASS_WITH_WARNINGS', fast strict passes, dependency-direction strict has 0 violations with known warnings, full CTest remains T4/full-gate debt, and broad feature work remains blocked... `__Source: __ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__01_human_readable_report.md.`
- **EVC-00774 constraint:** After the downloadable package was generated, the user asked not to create another handoff package but to render the package contents into a readable, navigable in-chat report. This led to an "IN-CHAT REPORT READER" response. That response explained the... `__Source: __ docs/archive/conversations/_reader/by_chat/development_routes.md.`
- **EVC-00974 constraint:** The reason this mattered is that deterministic engines often fail not because of obvious random numbers, but because of subtle ordering differences: thread scheduling, map iteration order, future event queues, or timing-dependent commits. The README... `__Source: __ docs/archive/conversations/_reader/by_chat/readme_ports_determinism.md.`
- **EVC-01055 constraint:** After the transcript appeared, the user asked for a maximum-fidelity Context Transfer Packet. The assistant produced one, with sections such as workstreams, decisions, tasks, constraints, open questions, risks, artifacts, and verification queue. Then the... `__Source: __ docs/archive/conversations/_reader/by_chat/xstack_lab_galaxy.md.`
- **EVC-01154 constraint:** 07 verification and audit: self-audit and verification queue. `__Source: __ docs/archive/conversations/architecture_ui_providers/dominium_architecture_ui_providers_robot_os_strategy__09_in_chat_reader.md.`
- **EVC-01286 constraint:** Bounded work with deterministic carryover queues. `__Source: __ docs/archive/conversations/domino_engine_refactor_prompts/dominium_domino_engine_refactor_prompts__05_reader_brief.md.`

- **EVC-01462 prohibition:** 'FOUNDATION-CLOSEOUT-01' was blocked because dependency-direction strict reported '358' violations and '38' warnings. `_Source:_ docs/repo/FOUNDATION_LOCK.md`.
- **EVC-00346 prohibition:** The live repo check showed Foundation Lock initially blocked by dependency-direction strict validation. This was the first serious foundation validator still red: 358 violations and 38 warnings. The next prompt was generated to repair dependency... `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__01_human_readable_report.md`.
- **EVC-00367 prohibition:** A live repo check during the conversation found Foundation Lock initially blocked by dependency-direction strict validation: `_Source:_ docs/archive/conversations/Foundation_Workbench_Codex/Dominium_Foundation_Workbench_Parallel_Codex_Preservation__10_accompanying_detailed_summary_report.md`.
- **EVC-00401 prohibition:** The immediate next action is not more architecture brainstorming. The latest project task/review packets say Foundation Lock is blocked because dependency-direction strict validation reports 358 violations and 38 warnings. The next task is... `_Source:_ docs/archive/conversations/Language_Platform_Architecture/Dominium_Language_Platform_Architecture_Baseline__01_human_readable_report.md`.
- **EVC-00452 prohibition:** The code audit concluded that the current repo is modular at source/build level and partly data-driven through registries and validators, but not yet a fully data-driven moddable runtime. The client still has hard-coded help, command descriptors, session... `_Source:_ docs/archive/conversations/OS_Interface_Repo_Architecture/Dominium_OS_Interface_Repo_Architecture__01_human_readable_report.md`.
- **EVC-00641 prohibition:** full CTest remains blocked by unrelated legacy/full-gate tests expecting old roots; `_Source:_ docs/archive/conversations/Universe_Explorer_Planning/Dominium_Universe_Explorer_Planning_Handoff__10_accompanying_human_readable_detailed_summary.md`.
- **EVC-00669 prohibition:** A large part of the conversation became repo-grounded. The repo had already gone through many convergence and cleanup phases before or during the chat. Foundation Lock moved from blocked to 'PASS WITH WARNINGS'. `_Source:_ docs/archive/conversations/Workbench_AIDE_Product_Spine/Dominium_Architecture_Workbench_AIDE_Product_Spine_Planning__10_accompanying_detailed_summary.md`.
- **EVC-00903 prohibition:** The immediate next action is not more architecture brainstorming. The latest project task/review packets say Foundations Lock is blocked because dependency-direction strict validation reports 358 violations and 38 warnings. The next task is... `_Source:_ docs/archive/conversations/_reader/by_chat/language_platform_architecture.md`.
- **EVC-00945 prohibition:** Future assistants might overstate implementation status. Much of this chat defines direction, not completed code. Product boot and portable projection proof were partial/blocked in inspected docs. `_Source:_ docs/archive/conversations/_reader/by_chat/os_interface_repo_architecture.md`.
- **EVC-01192 prohibition:** 2.1 Initial problem: repo structure blocked real work `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary.md`.
- **EVC-01200 prohibition:** 2.1 Initial problem: repo structure blocked real work `_Source:_ docs/archive/conversations/canonical_structure_and_framework/dominium_canonical_structure_and_framework__10_accompanying_detailed_summary.txt`.
- **EVC-01320 prohibition:** The user then expressed worry that the project might be impossible and that they did not know how to write engines. The first answer framed the repo as a working deterministic foundation but not a full playable engine. The user then pasted a much more... `_Source:_ docs/archive/conversations/engine_baseline_architecture/domino_dominium_engine_baseline_architecture__10_companion_detailed_summary_report.md`.
